Kent Station

Kent Station Parking Garage Improvements

Home | Background | Timeline and next steps | Share your feedback | Learn more

Welcome!

Sound Transit is improving access to Kent Station for others, including people who walk, bike, ride the bus, and drive alone. We want to make it safer and faster for people to get around the neighborhood. We are also making improvements to the parking garage at Kent Station.

Sound Transit is seeking your input on the design of our new parking garage and other improvements. The Sound Transit Board will consider your input when it makes its decision in spring 2019.

How to use this site:

- Scroll through the pages to learn about the project
- Share your input on the design of the parking garage on the "Share your feedback" page

Background

In 2011, Sound Transit worked closely with the City of Kent and community members to develop a plan for improvements to the parking garage and other improvements. The Sound Transit Board then adopted the plan in 2012. The plan includes improvements to the garage and other improvements that increase North to the Kent parking garage, improve access to the station for people who walk and bike, and improve the regional connections to transit. We paused work on the project in 2016 due to financial uncertainties caused by the voters' rejection of Sound Transit's ballot measure.

In addition to the garage, the original plan included:

- Improvements to the North Building (formerly known as the Sounder Building) to make it safer and more inviting
- Improvements to the intersection of 2nd Avenue and Washington Avenue
- Sidewalk improvements and a bicycle connection between the Sounder station and the garage
