Welcome to the Operations & Maintenance Centre South (OMF South) Project Information Website!

Thank you for your interest in the Operations & Maintenance Centre South (OMF South) Project. This website provides information about the OMF South Project, including the environmental review process, project alternatives, and how to share comments and questions.

Please note: Comments and questions submitted on this website are not reviewed in real-time. Please allow 2-3 business days for a response. For urgent matters, please contact the Project Information Line at 1-855-244-8550.

Welcome

What's the latest?

Thank you for your interest in the Operations & Maintenance Centre South (OMF South) Project.

We are now in the early stages of the environmental review process, and are seeking your input on the project's potential effects and how we can minimize them. We are also seeking your input on potential locations for the OMF South Project.

What is an Operations and Maintenance Facility?

An Operations and Maintenance Facility (OMF) is a building where vehicles are stored, cleaned, and maintained. It also includes offices for staff who operate and maintain the vehicles, and other facilities such as a training room and a cafeteria.

What is an Operations and Maintenance Centre?

An Operations and Maintenance Centre (OMC) is a group of facilities that are located together to support the operation and maintenance of a transit system. It may include an OMF, a station, and other facilities such as a power substation and a traction power substation.

What is the OMF South?

The OMF South is a new Operations and Maintenance Centre (OMC) that will be built to support the operation and maintenance of the Mobility Line and Kitsilano Line. The OMF South will be located in the Cambie Corridor, and will include:

- Operations and Maintenance Facilities (OMF) for the Mobility Line and Kitsilano Line
- Traction Power Substation (TPSS)
- Underground Station (Cambie Station)
- Underground Tunnel

Who is TransPower?

TransPower is a private company that is working with the City of Vancouver to design, build, finance, and maintain the OMF South. TransPower is also responsible for the environmental review process for the OMF South Project.

Who is the Canadian Pacific Railway?

Canadian Pacific Railway (CPR) is a private company that owns the land where the OMF South will be located. TransPower is working with CPR to develop the OMF South
