~~Dear Sound Transit,~~

I think it is very immature of you not to consider monorail. It would not cost too much and it would fill us with joy. Not to say, but monorail is cost effective and you wouldn't have to sit in traffic. There has only been one death by monorail and right this moment there is an accident in Portland.

Sincerely,

Sophia K Winkler-Schor

Thank you for your comments supporting monorail technology. This option is among the alternative technologies being considered in the Regional Transit Long-Range Plan SEIS as an option to the Plan Alternative.
