Sound Transit Telephone Survey
February 22 – 28, 2008
N = 819

Overall Results Margin of Error, ± 4.0 percentage points

A minimum quota of 160 interviews per subdistrict was set.
The overall margin of error is calculated on 589 interviews, equaling a ± 4.0 percentage point
margin of error at the 95% confidence interval.
This confidence interval means that if the survey were repeated 100 times, the results shown
would be the same 95 times out of 100 to within ± 4.0 percentage points.

Overall results were weighted to reflect subdistrict proportions of the Sound Transit District.

Hello, my name is ____________ . May I speak to (NAME ON LIST).
Hello, my name is ____________ and I'm taking a survey for EMC Research. We're
trying to find out how the people in the Puget (“PYEW-jet”) Sound region feel about some of the issues
facing them. I'd like to ask you a few questions on a strictly confidential basis.

------------------------------------------------------------------------------------------------------------------------------

3. Are you registered to vote at this address?
   Yes-------------------------->CONTINUE  100%
   No--------------------------> (TERMINATE)
4. Do you feel things in the Puget Sound region are generally going in the right direction, or do you feel things have gotten pretty seriously off on the wrong track?
   - Right direction: 49%
   - Wrong track: 36%
   - (Don't know): 15%

5. What do you think is the most important problem facing the Puget Sound region today? (ONE RESPONSE)
   - Transportation/Mass Transit: 24%
   - Traffic congestion: 23%
   - Environment/Pollution: 6%
   - Roads/Highways: 5%
   - Economy: 5%
   - Housing/Housing Cost: 4%
   - Population Growth: 3%
   - High Taxes: 3%
   - Politics/Government Management (Public Funds, Legislation): 3%
   - Education/Educational Fund: 3%
   - High Price(Gas)/High Cost of living: 3%
   - Jobs/Employment: 2%
   - Crime: 2%
   - Healthcare: 2%
   - None: 1%
   - Others: 6%
   - Don't know/Refused: 5%
I'm going to read you a list of public organizations. Please tell me if you have a strongly favorable, somewhat favorable, somewhat unfavorable or strongly unfavorable opinion of each one. If you have never heard of one please just say so.

As you may know Sound Transit was created by voters in nineteen ninety six to build a mass transit system that connects regional population centers in King, Pierce, and Snohomish counties. Sound Transit currently operates Sounder commuter trains between Everett and Seattle and Tacoma and Seattle, ST Express regional buses that connect Seattle, Bellevue, Everett, and Tacoma with largest urban centers in the region, and Link light rail in downtown Tacoma. Light rail service between Downtown Seattle and Sea-Tac Airport will be completed in two thousand nine.

20. In general, do you strongly favor, somewhat favor, somewhat oppose or strongly oppose continued expansion of this mass transit system of commuter rail, express buses, and light rail?

- Strongly Favor: 57%
- Somewhat Favor: 25% => 82%
- Somewhat Oppose: 6% => 17%
- Strongly Oppose: 10%
- (Need More Info/Undecided): 1%

21. The Sound Transit Board of Directors will soon decide whether or not to put a transit expansion measure on the ballot in November of this year. In general, do you strongly favor, somewhat favor, somewhat oppose or strongly oppose putting a transit expansion measure on the ballot in November of two thousand eight?

- Strongly Favor: 47%
- Somewhat Favor: 28% => 75%
- Somewhat Oppose: 9% => 22%
- Strongly Oppose: 13%
- (Need More Info/Undecided): 3%

(IF Q21 = 3 OR 4, ASK Q22; ELSE SKIP TO Q23)

22. Do you think the Sound Transit Board should put a transit expansion measure on the ballot sometime after two thousand eight or not at all?

- After 2008: 26%
- Not at all: 71%
- (Don't know): 3%
(RESUME ASKING EVERYONE)

23. Which comes closer to your opinion, even if neither one is exactly right:
   We should:
   A. Vote on a measure to expand mass transit options as soon as possible 54%
      (Lean A) 1% => 55%
   OR
   B. Wait two years before expanding mass transit so a new directly elected agency can be created to coordinate and plan roads and transit projects 38%
      (Lean B) 1% => 39%
   Neither 4%
   Refused 3%
There are a variety of services or projects that could be funded by a future transit measure. For each of the following, please tell me how important you personally think it is to include that service or project in a future transit measure. Use a scale of one to seven where one means including that service or project is not at all important and seven means including that project or service is extremely important. You can use any number from one to seven.

43. In East King County, one issue is whether to provide funds to develop passenger rail service on the BNSF rail corridor between Renton and Woodinville. Which option do you prefer:

**Option A** would make building light rail across Lake Washington and expanding Eastside express bus service along state route five twenty the main funding priorities through twenty twenty. This option calls for waiting until a future phase to consider rail service on the BNSF corridor.

**Option B** would be to leave express bus service close to what it is now, and instead build light rail along eye ninety from Seattle to Bellevue or Redmond, and invest in a demonstration commuter rail line on the BNSF corridor on existing track between Snohomish, Woodinville, Kirkland, Bellevue, and Renton.

There are a number of factors that affect the design of a transit plan. I’d like to ask you about three of them – the cost of the plan, the time it takes to implement the plan, and where it goes. (IF “Neither/Don’t know” Well, if you had to pick one or the other…[RECORD as “Lean”])

44. In general would you prefer a transit measure that:
   A. Costs more – $125 a year - but is completed sooner – in 12 years 73%
      (Lean Statement A) 0% => 73%
   B. Costs less – $75 a year - but takes longer to complete – 20 years instead of 12 21% => 21%

      (Neither) 4%
      (Don't know) 1%

45. In general would you prefer a transit measure that:
   A. takes longer to complete – 20 years -- but expands light rail further -- building 50 miles connecting Lynnwood, Redmond, and Tacoma through Seattle - as well as additional commuter rail and express bus service. 44%
      (Lean Statement A) 0% => 44%
   B. is completed sooner – in 12 years -- but has less new light rail - 16 miles connecting Northgate and Bellevue through Seattle, as well as additional commuter rail and express bus service. 44% => 45%

52. (One/Another) option is a twelve year mass transit package that would fund sixteen miles of light rail expansions and at the same time put significant focus on commuter rail and express bus improvements. Light rail would extend to Northgate and Bellevue but would not expand south from the airport. Corridors not served by light rail lines would receive expanded commuter rail and/or express bus service. This twelve year package would cost approximately six billion dollars which is an additional seventy five dollars a year in sales taxes for the typical household. Would you strongly support, somewhat support, somewhat oppose, or strongly oppose this proposal?
