

FUTURE POSSIBILITIES—NORTH

Over the past eighteen months, this region has been working to identify the next set of mass transit system investments—Sound Transit 2. From hundreds of initial projects, the most promising candidates were identified. On January 12, 2006, the Sound Transit Board directed further study of most of the projects listed below. Subsequently, they asked for evaluation of additional light rail extensions. Ultimately, some of these projects will be part of a transportation measure proposed for voter approval in November, 2007. For more information on Sound Transit 2 or to tell us what you think, please visit our Web site at www.soundtransit.org/st2.

MAP KEY

New stations, stops or enhancements	New light rail	New or expanded express bus
HOV direct access ramp or improvements	Transit lane or signal improvements	Parking
	Faded lines show existing Sound Transit projects
