Bicycle access and facilities
All Sounder train stations, other Link light rail stations and ST Express transit facilities have racks and/or lockers for bicycles. The goal is for as many bicyclists as possible to have convenient bicycle storage. Sound Transit encourages bicyclists to secure their bikes at our facilities, but also allows bicycles on board vehicles.

Using grant dollars, Sound Transit has added more than 300 bicycle rack and locker spaces at King, Snohomish and Pierce County facilities in the last few years.

Coordinating with our partners
Sound Transit works regularly on bicycle issues with regional jurisdictions and other organizations to help make sure that bicycling remains a viable part of the regional transportation network.

Partner agencies include:
Community Transit, King County Metro Transit, Pierce Transit, Washington State Department of Transportation, the Port of Seattle, Puget Sound Regional Council, the Cascade Bicycle Club, the Bicycle Alliance of Washington and the City of Seattle.
Sound Transit also works with its partners to ensure that bicycle access is part of the region’s current and future bicycle infrastructure. The agency contributes to bicycle wayfinding and guides produced by its partners. And, new Sound Transit facilities will include maps and community information specific to the bicycling community.

Since 2010, Sound Transit has conducted bicycle counts that assist the agency and its partners in planning and building future facilities, and helps us to better understand how bicyclists use transit.

Make your voice heard
Bicycle advocates, along with local and state transportation and transit agencies, helped shape the agency’s bicycle policies. Citizens are invited to review station designs, parking and connection improvement plans, to discuss issues with staff or Boardmembers, and to contact Sound Transit Customer Service with concerns regarding transit operations or facilities.

In addition, Sound Transit’s Bicycle Advisory Group is a strong link between the bicycling community and Sound Transit. The Bicycle Advisory Group meets regularly to review plans for Sound Transit services and facilities and to ensure bicycle access is encouraged and supported.

The Bicycle Advisory Group includes representatives from the bicycling community, Cascade Bicycle Club, Bicycle Alliance of Washington, City of Seattle, Washington State Department of Transportation, Puget Sound Regional Council, King County Metro Transit and Pierce Transit.

In-house expertise
A Sound Transit staff bicycle committee ensures coordination between departments on bicycle issues. As a result, Sound Transit has significantly increased bicycle parking at completed facilities. They contribute detailed recommendations for bicycle facilities to the agency’s design guidelines, conduct regular bicycle counts and incorporate bicycles into system access plans.
