## EXECUTIVE SUMMARY

Parametrix conducted a Phase I Environmental Site Assessment (ESA) for the Tacoma Dome Link Extension (TDLE) project in conformance with the scope and limitations of American Society of Testing Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as Tacoma Dome (TD) properties TD 3947 and TD 3933. Any exceptions to, or deletions from, the Standard Practice are described in Section 4.1 of this report.

The subject property is located on Pierce County Tax Lots 320013136 and 320013141 (Figure 1) and is currently occupied by a gasoline service station and convenience store. The subject property encompasses an area of approximately 1.6 acres and is zoned for commercial use. The convenience store on the subject property is 4,050-square-feet in size.

The first known development of the site was in the 1950s with two structures. Prior to the development, the subject property was undeveloped agricultural land. The subject property appeared developed as a gas station, similar to current conditions by 1990. There have been no significant changes to the subject property between 1990 and the present. Surrounding land use has remained commercial and industrial. According to City records, the convenience store structure was built in 1992.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property except for the following:

### **Recognized Environmental Conditions**

The subject property is listed on multiple databases on the Environmental Data Resources (EDR) report, including the Confirmed and Suspected Contaminated Site List (CSCSL) and Petroleum Technical Assistance Program (PTAP) databases. Contamination originating from a Leaking Underground Storage Tank (LUST) and associated fuel lines resulted in soil and groundwater impacts at the subject property. Cleanup levels were exceeded for diesel and gasoline-range hydrocarbons in soil and groundwater as well as associated benzene, toluene, ethylbenzene, and xylenes. Remedial actions, including the removal of the tank, soil excavation, and injection of an oxidizing agent, have been completed at the site, and groundwater monitoring is ongoing. Additional remedial actions are ongoing, including quarterly groundwater monitoring to determine whether contamination is stable or declining. A remedial investigation (RI) report is tentatively approved with the requirement that the data gaps are addressed, including stormwater drainage issues. The presence of soil and groundwater contamination at the subject property represents a REC.

According to the RI, the feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated.

The storage of petroleum products, two UST fields, was noted on the subject property during site reconnaissance (from public rights-of-way). Monitoring wells were also noted throughout the subject property indicating cleanup activities. The storage of petroleum products and the observed monitoring wells are a REC to the subject property.

## **Data Gaps**

An on-site reconnaissance (within subject property boundaries) and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13 (2013). However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

# 1. INTRODUCTION

Parametrix was retained by Sound Transit to conduct a Phase I Environmental Site Assessment (ESA) on the site located at 4310 Pacific Highway E in Fife, Washington (herein referred to as the subject property; see Figure 1), as part of the Tacoma Dome Light Rail Extension (TDLE) project. The subject property includes Pierce County parcels 320013136 and 320013141 (TDLE parcel IDs TD 3947 and TD 3933, respectively). The subject property, known as Gull Station, is an operating gasoline service station and convenience store. The Phase I ESA was conducted to support environmental due diligence related to potential acquisition of the property associated with the TDLE project.

The subject property encompasses approximately 1.6 acres and includes a single structure that consists of a convenience store and two covered pump areas, one for larger trucks and one for commercial passenger vehicles. The structure was constructed in 1992 and is 4,050 square feet in size. The boundaries of the subject property are shown in Figure 2.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: 1) a review of documents and of oral information (if available) and 2) a site examination. Conclusions and recommendations in this report are based solely on observed evidence and data collected during the performance of this assessment.

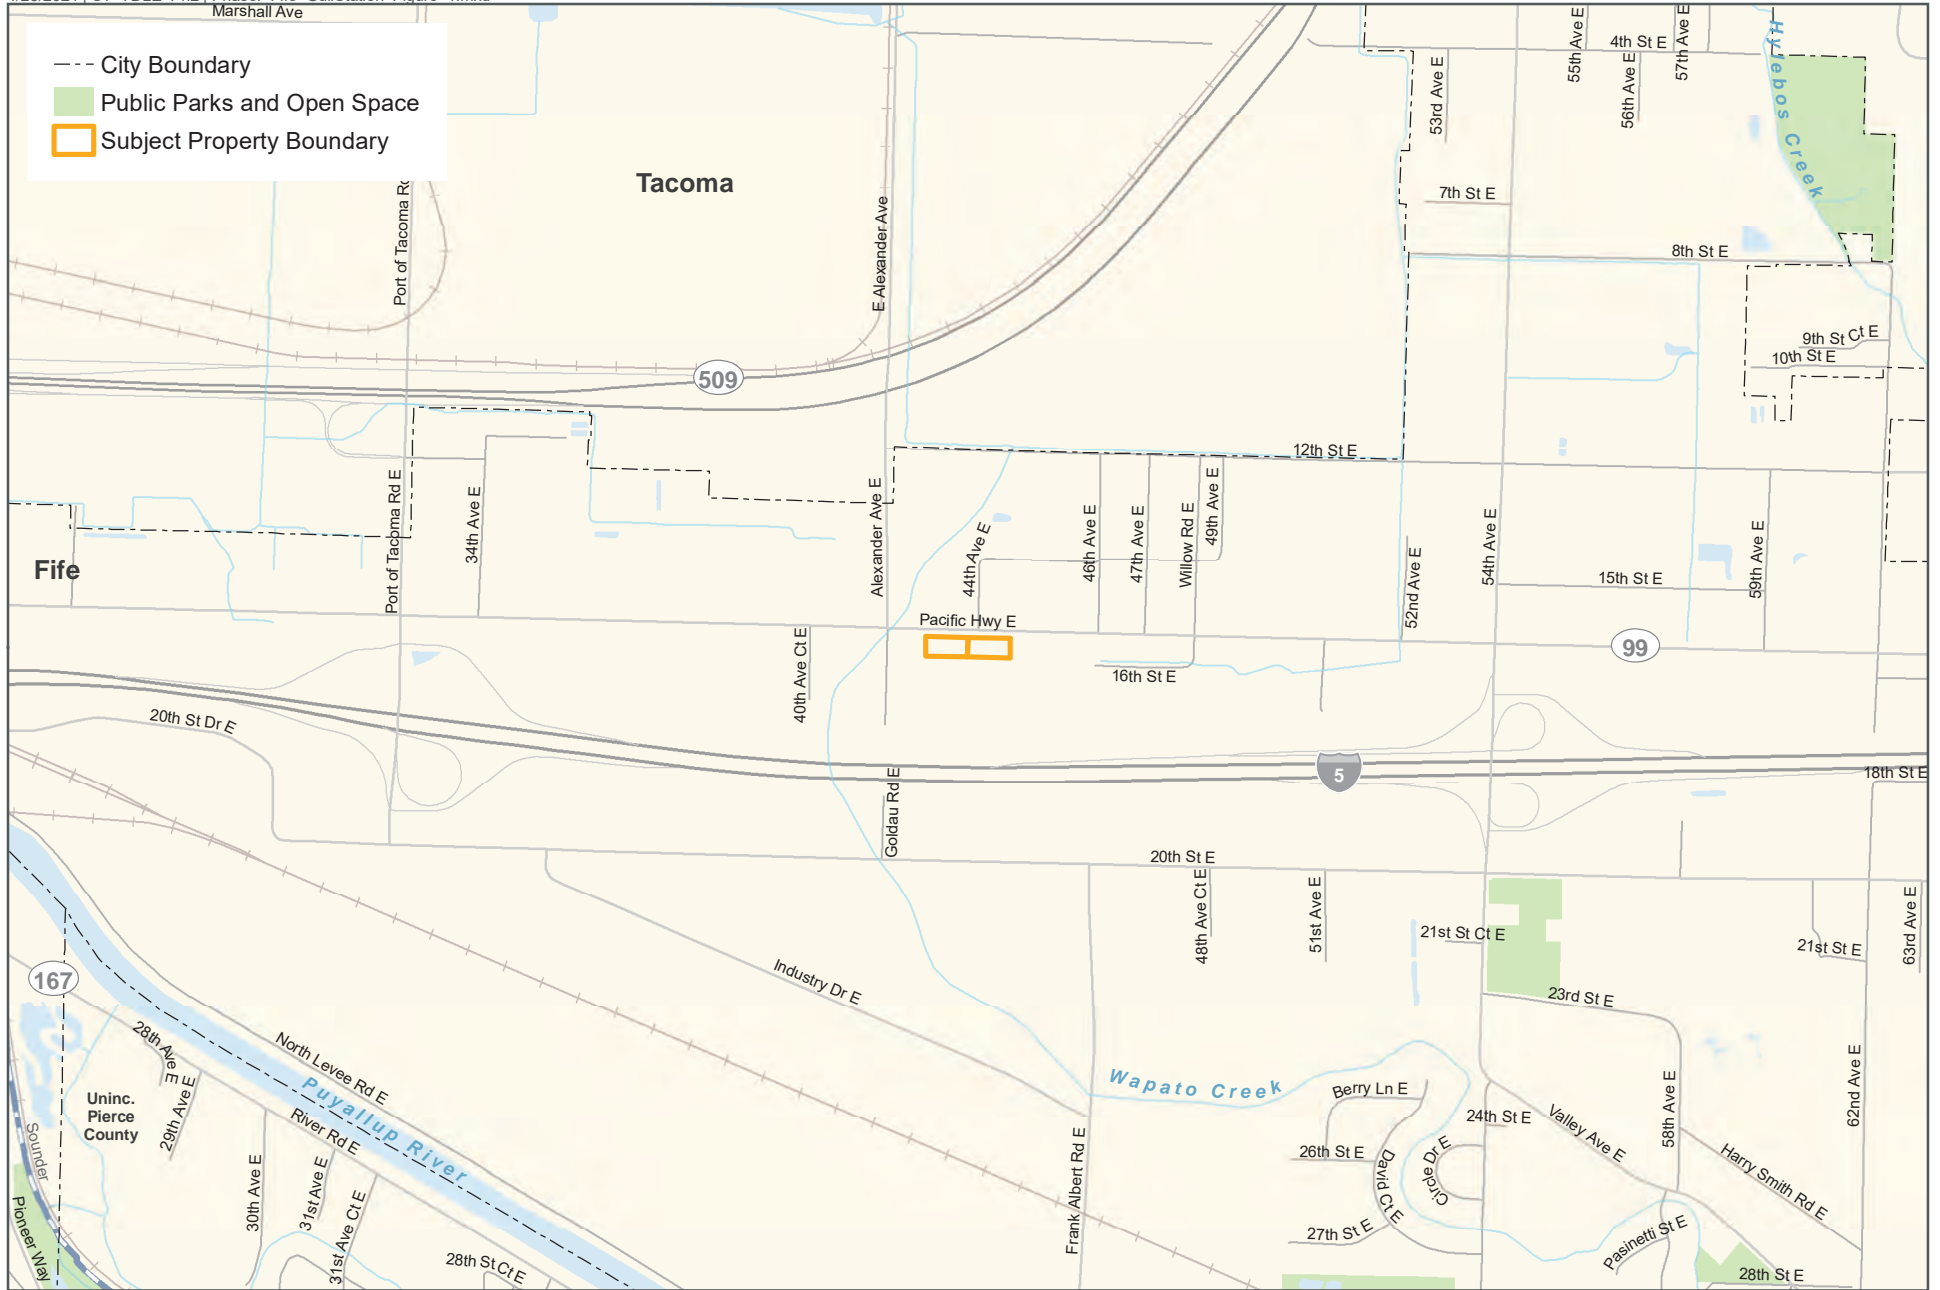

## 1.1 Purpose

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2013). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and, as such, constitutes “all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice” as defined by 42 United States Code §9601 (35)(B).

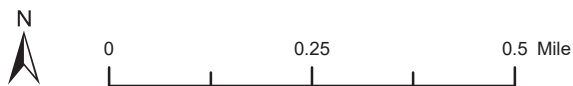

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term Recognized Environmental Condition is defined in ASTM Standard E1527-13 as:

“...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a threat of a future *release* to the environment. *De minimis conditions* are not *recognized environmental conditions*.”

In accordance with ASTM Standard E1527-13, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

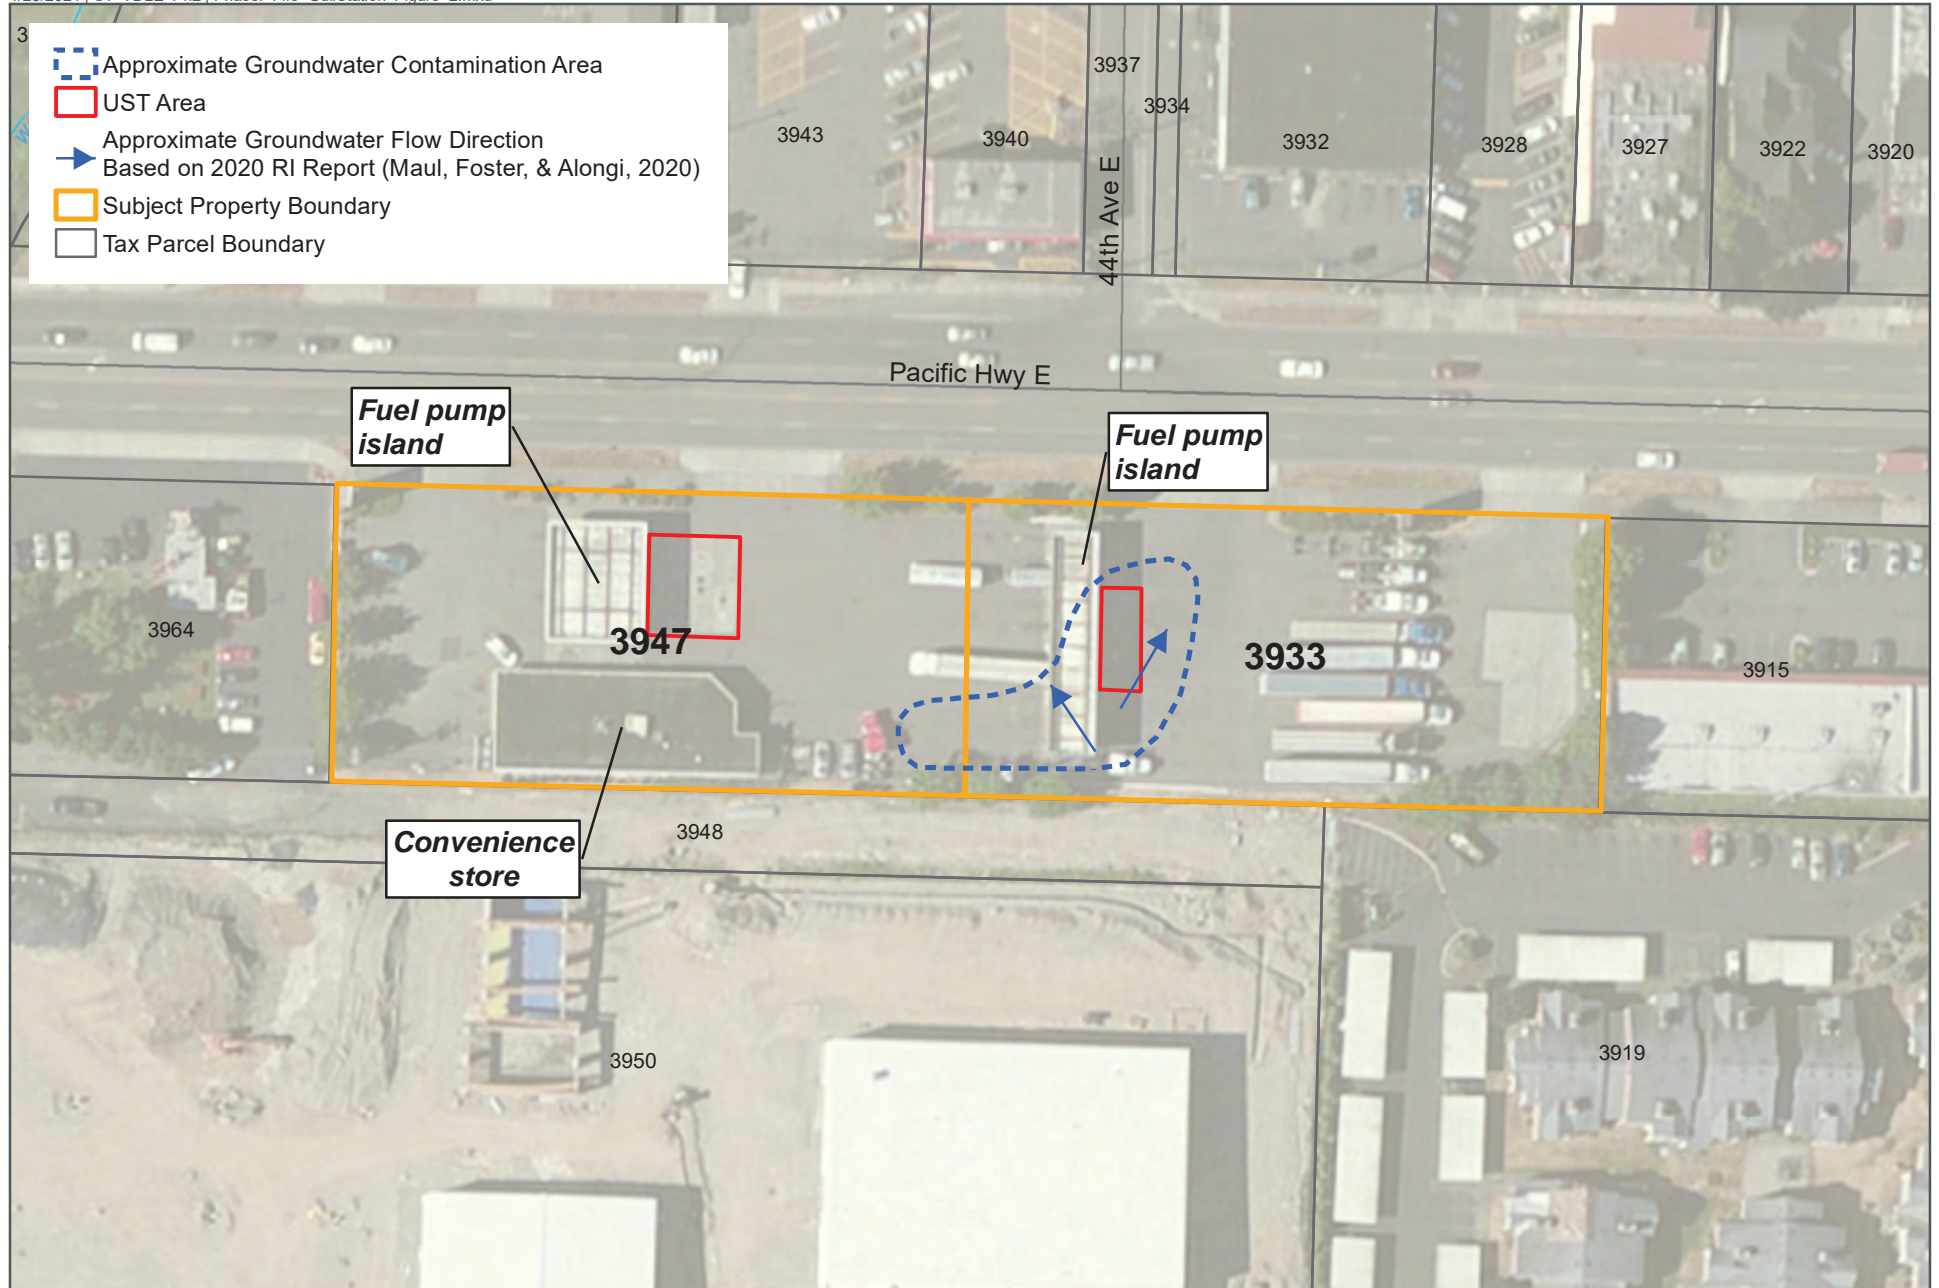

Data Sources: EDR, King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2019).

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

**FIGURE 1**  
 Site Vicinity Map  
 Gull Station  
 4310 Pacific Highway E, Fife, WA  
 Tacoma Dome Link Extension

Data Sources: EDR, King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2019).

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

**FIGURE 2**  
 Site Map  
 Gull Station  
 4310 Pacific Highway E, Fife, WA  
 Tacoma Dome Link Extension

An HREC is defined as:

*“...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.”*

A CREC is defined as:

*“...a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.” (ASTM 2013)*

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

## 1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property on foot. Unless otherwise stated, no exceptions to the guidelines presented in ASTM E1527-13 were made during completion of this Phase I ESA.

## 1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site but were not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff
- Contacts and discussions with regulatory agencies and others
- Review of available hazardous substance or solid waste lists
- Opinions and judgments of Parametrix based on the information available

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

## 2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

### 2.1 Location

The subject property is located at 4310 Pacific Highway E in Fife, Washington. It is a 1.6-acre property bounded by Pacific Highway E to the north, by commercial properties to the east and west, and by 16th Street East to the south, followed by commercial properties. According to the Pierce County Assessment Office, Thorp Properties, Inc is the current owner of the subject property. The subject property includes Pierce County parcels 320013136 and 320013141 (TDLE parcel IDs TD 3947 and TD 3933, respectively). The site location is shown on Figure 1. The boundaries of the subject property and project construction footprint are shown on Figure 2.

### 2.2 Site and Vicinity Characteristics

The subject property includes Gull Station, a gasoline service station with two pump islands and a convenience store (4,050 square feet, built in 1992).

The vicinity of the subject property is developed for industrial and commercial uses. Properties in the direct vicinity include restaurants and commercial businesses to the east and west, a car dealership and service center to the south, and parking lots and a tobacco shop to the north (Figure 2).

### 2.3 Physical Setting

The subject property is at an elevation of approximately 55 feet above mean sea level. The topography of the site gently slopes to the north towards the Puyallup River and Puyallup basin (USGS 2020). Soils in the area of the subject property are mapped as Sultan silt loam by the U.S. Department of Agriculture (USDA 1955). These are described as moderately well drained. Made land is mapped to the north of the subject property. The made land is dredged material that was deposited artificially over marshy tideflats for grading.

The surface geology of the subject property is mapped as Quaternary Vashon recessional outwash ice contact deposits and Quaternary pre-Fraser age coarse-grained deposits. These are described as sand and gravel to silty sand and gravel with some clay portions. These deposits generally have a high porosity and permeability.

The site is underlain by artificial fill. Groundwater at the site is found at a depth of approximately 3 to 10 feet below ground surface. The groundwater flow direction below the subject property is primarily to the north.

The nearest surface waterbody is the Blair Waterway, located 4,500 feet northwest of the subject property. The Puyallup River is located 4,500 feet southwest of the subject property.

## 2.4 Current Use of the Property

The subject property is currently a gasoline service station (Gull Station) with two pump islands and a convenience store. Access to the gas station is from Pacific Highway E to the north. Zoning for both parcels of the subject property is listed as Commercial.

## 2.5 Descriptions of Improvements on the Subject Property

Based on Pierce County property assessment records, the subject property includes 1.6 acres with a single structure (convenience store) constructed in 1992 and 4,050 square feet in size. Two gasoline/diesel pump islands with canopies are also located on the property, one to the north of the structure and one to the east of the structure. The exterior of the building is finished with asphalt parking and other hardscaping. Local records indicate that electricity, gas, water, and sanitary sewer are provided by local utilities.

## 2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. Parametrix reviewed the Pierce County Records database for liens against the current owner. No environmental liens were identified within the recorded documents filed for the current owner of the subject property. Additionally, Parametrix reviewed the Washington State Department of Ecology's environmental covenant database. No environmental (restrictive) covenants were filed for the subject property. Therefore, no evidence of activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

A Property History Guarantee title report was supplied by Sound Transit for the subject property (attached in Appendix A). There are no records in the title summary report indicating activity or use limitations or environmental liens affecting the property. No evidence of activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

### 3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: 1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and 2) a compilation of historical uses of the subject property and site vicinity properties to determine whether past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by EDR. The EDR report is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix B. Historical information is based on review of historical Sanborn Fire Insurance Maps and aerial photographs (Appendices C and D).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Any data gaps identified during the document review were addressed by interviewing Tacoma-Pierce County Health Department personnel, by making observations during the site examination, or by additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

#### 3.1 Standard Environmental Record Sources

The following section summarizes information collected from database records maintained by the U.S. Environmental Protection Agency (EPA) and Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR report (Appendix B). Only standard and key additional databases are listed below. Parametrix reviewed the information in the EDR report to screen properties in the vicinity of the subject property for sites with potential to impact the subject property. The screening process involved reviewing the type of listings, types of contaminants, proximity, and position relative to the subject property, the topography, and groundwater gradient. Listings for sites found in the standard environmental records sources that could not be screened to verify potential impacts to the subject property were further evaluated by file reviews (see Section 4).

##### 3.1.1 Review of Washington State Department of Ecology Databases

The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Ecology Hazardous Site List (HSL)
- Ecology Confirmed and Suspected Contaminated Site List (CSCSL)

- Ecology CSCSL No Further Action (CSCSL NFA) List
- Ecology Leaking Underground Storage Tank (LUST) List
- Ecology Underground Storage Tank (UST) List
- Ecology Aboveground Storage Tank (AST) List
- Ecology Institutional Controls (INST CONTROL) List
- Ecology Voluntary Cleanup Program (VCP) List
- Ecology Independent Cleanup Report (ICR) List
- Ecology and Pollution Liability Insurance Agency Petroleum Technical Assistance Program (PTAP) List
- Ecology Brownfields List
- Ecology Reported Spills (SPILLS) List
- Ecology Drycleaners List

#### 3.1.1.1 Ecology HSL, CSCSL, and CSCSL NFA Databases

The Ecology CSCSL database contains sites in Washington State that have been confirmed or have been suspected of contaminant releases and is the state equivalent to the federal Comprehensive Environmental Response, Compensation and Liability Information System (known as CERCLIS). The HSL is a subset of the CSCSL database for sites that have been formally ranked using the Washington Ranking Method. The CSCSL NFA database is former CSCSL sites that have achieved an NFA determination from Ecology.

The subject property was found on the CSCSL database:

- Pacific Xpress (currently operating as Gull Station) at 4310 Pacific Highway E is listed on the CSCSL database related to an ongoing release of petroleum hydrocarbons. This represents a REC to the subject property. Further information is provided in Section 4.

Forty-five sites within one mile of the subject property were reported on the CSCSL database, three sites within one mile were reported on the HSL database, and ten sites within 0.5 mile were reported on the CSCSL NFA database. One CSCSL NFA site was reported within 0.125 mile from the subject property:

- The Susan Kaelin Property at 1409 Alexander Avenue East (470 feet northwest and down-gradient) is listed on the CSCSL NFA database. Petroleum hydrocarbons were remediated below cleanup levels in soil and suspected in groundwater. The site achieved a NFA status from Ecology in 2001. The site was evaluated in the Remedial Investigation (RI) Report (Maul Foster & Alongi, Inc. 2020) conducted for the subject property in April 2020 and is not expected to impact the subject property based on the gradient of groundwater flow determined at the subject property (up-gradient from the Susan Kaelin Property). Based on the downgradient location and NFA status, this site is not considered a REC to the subject property.

The remaining HSL, CSCSL, and CSCSL NFA sites identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

### 3.1.1.2 Ecology UST and AST Databases

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database. The Ecology UST database contains registered commercial USTs. Residential heating oil USTs are not included in the Ecology UST database. USTs are regulated under Subtitle I of the RCRA. Unless otherwise noted, the presence of USTs near the site does not, in itself, constitute a REC.

The Ecology AST database is a listing of aboveground storage tank locations regulated by the Department of Ecology's Spill Prevention, Preparedness and Response Program. Unless otherwise noted, the presence of ASTs near the site does not, in itself, constitute a REC.

The subject property is listed on the UST database:

- Petrocard Inc. (subject property) is on the UST database related to having three USTs removed in 1996, one UST removed in 2018, and four operational USTs installed in 1990. Based on the listings indicating a REC for the subject property, a file review was conducted and is further discussed in Section 4.

Five sites were reported on the UST database within 0.25 mile of the subject property, and no AST sites were reported within 0.25 mile of the subject property. Two of these sites were reported within 0.125 mile from the subject property:

- B & J Bingo located at 4401 15th Street East (575 feet north-northeast of the subject property) is listed on the UST databases. The site lists one UST that was closed and removed in 1991. Based on the distance and gradient from the subject property and the lack of reported releases, this site is not considered a REC to the subject property.
- TT2 APR Forwarders Inc located at 4503 15th Street East (600 feet northeast of the subject property) is listed on the UST databases. The site lists one UST that was removed in 1996. Based on the distance and gradient from the subject property and the lack of reported releases, this site is not considered a REC to the subject property.

### 3.1.1.3 Ecology LUST Database

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed in the LUST database; however, there has been a LUST onsite. Further details can be found in Section 4.

Eight sites were reported on the LUST database within 0.5 mile of the subject property. No LUST sites were listed within 0.125 mile of the subject property. The remaining listed sites on the UST and LUST databases identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

### 3.1.1.4 Ecology VCP, PTAP, ICR

The Voluntary Cleanup Program (VCP) database is a list of sites that have been entered into the Ecology VCP and are undergoing cleanup. The PTAP database is a list of petroleum release sites that have been entered into the Pollution Liability Insurance Agency (PLIA) PTAP program and are undergoing cleanup.

The ICR database is a subset of the VCP or former VCP sites that have reported interim cleanup actions to Ecology.

The subject property was reported on the PTAP database:

- Pacific Xpress (currently operating as Gull Station) at 4310 Pacific Highway E is listed on the PTAP database related to an ongoing cleanup of a former release of petroleum hydrocarbons. This represents a REC to the subject property. As noted above, based on the listings for the subject property, a file review was conducted and summarized in Section 4.

Fourteen sites within 0.5 mile of the subject property were reported on the VCP database. One of these sites was reported within 0.125 mile from the subject property:

- The Susan Kaelin Property at 1409 Alexander Avenue East (470 feet northwest) is listed on the VCP database. Petroleum hydrocarbons were remediated below cleanup levels in soil and suspected in groundwater. The site achieved a NFA status from Ecology in 2001. The site was evaluated in the RI Report (Maul Foster & Alongi, Inc. 2020) conducted for the subject property in April 2020 and is not expected to impact the subject property based on the gradient of groundwater flow determined at the subject property (up-gradient from the Susan Kaelin Property). Based on the downgradient location and NFA status, this site is not considered a REC to the subject property.

The remaining listed sites on the VCP database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

No sites within 0.5 mile of the subject property were reported on the PTAP database.

Seven sites within 0.5 mile of the subject property were reported on the ICR database. None are within 0.125 mile from the subject property. The listed sites on the ICR database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

Two sites within 0.5 mile of the subject property were reported on the INST CONTROL database. One of the sites is over 900 feet and down-gradient from the subject property. It has an NFA issued by Ecology and does not appear to represent a REC to the subject property. The remaining listed site on the INST CONTROL database identified in the EDR report appears to be at sufficient distance from the subject property and/or cleanup activities have been completed so that it does not appear to represent a REC to the subject property.

### **3.1.1.5 Ecology Solid Waste Facilities/Landfill**

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. No Solid Waste Facilities/Landfill sites were reported within 0.5 mile of the subject property.

#### **3.1.1.6 Ecology Brownfields List**

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is “a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination.”

The subject property is not listed as a State Brownfields site. No State Brownfields site were reported within 0.5 mile of the subject property.

#### **3.1.1.7 Ecology SPILLS Databases**

The Ecology SPILLS database reports potential small releases to the subsurface that have the potential to cause contamination.

The subject property is listed in the SPILLS database:

- Pacific Xpress (currently operating as Gull Station) at the subject property address is listed on the SPILLS database. According to the listing, 15 gallons of diesel fuel was released in 2008. Further discussion on listings for the subject property is present in Section 4.

The remaining listed sites on the SPILLS database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

#### **3.1.1.8 Ecology Solid Waste Facilities/Landfill**

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology’s Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. No Solid Waste Facilities/Landfill sites were reported within 0.25 mile of the subject property.

#### **3.1.1.9 Ecology Drycleaner Database**

The drycleaner database is a listing of former or current drycleaners in Washington. No drycleaners were reported within 0.25 mile of the subject property. No inactive drycleaners were reported within 0.25 mile of the subject property.

### **3.1.2 EPA Database Review**

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases:

- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS) database
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)

- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

#### 3.1.2.1 NPL List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within one mile of the subject property; however, there is one NPL site which impacts the vicinity of the subject property:

- The Asarco Tacoma Smelter Plume is a part of the Commencement Bay Nearshore Tidelands NPL site and includes large portions of Pierce, King, Kitsap, and Thurston Counties related to windblown contamination of arsenic and lead deposited from operation of the Asarco Smelter in Ruston, Washington, for a period of nearly 100 years (Ecology 2020). The area of the subject property is mapped within an area of impact from arsenic of less than 20 parts per million. Based on the mapped concentrations, this represents *de minimis* conditions at concentrations less than Model Toxics Control Act (MTCA) Method A cleanup levels and is not considered a REC for the subject property.

#### 3.1.2.2 SEMS Database

The EPA's Superfund Enterprise Management System (SEMS) database identifies sites that may potentially pose a threat to the environment or the health of the public.

Information contained in the EDR report indicates that the subject property is not listed as a SEMS site. One SEMS sites was identified within 0.5 mile of the subject property:

- The Petarcik site (911 Pacific Highway E) is located approximately 1,190 feet east of the subject property. This listing is related to corrosive waste and halogenated organics contamination confirmed in soil and suspected in groundwater. Soil has been remediated at the site, and there is ongoing monitoring and cleanup at the site. This site is not an NPL site and is not considered a REC based on the proximity and position related to the subject property.

The EPA also publishes the SEMS-ARCHIVE list, which identifies SEMS sites that have been designated "no further remedial action planned" and removed from the SEMS List. Information contained in the EDR report indicates that the subject property is not listed as a SEMS-ARCHIVE site. No SEMS-ARCHIVE sites were identified within 0.5 mile of the subject property.

#### 3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicated that the subject property is not listed as a CORRACTS site. No CORRACTS sites are listed within one mile of the subject property.

#### **3.1.2.4 RCRA Generators List**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Very small quantity generators generate less than 100 kilograms (kg) of hazardous waste or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste or more than 1 kg of acutely hazardous waste per month. Non-generators do not currently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA generator database.

Four RCRA Non-generators are listed within 0.125 mile of the subject property. Based on lack of violations or the nature of violations, these sites do not represent RECs for the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal (TSD) facilities. Information contained in the EDR report indicates the subject property is not listed as a TSD site. No TSD sites are identified within 0.5 mile of the subject property.

#### **3.1.2.5 ERNS List**

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed near the subject property.

#### **3.1.2.6 US Brownfields List**

The EPA's US Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a US Brownfields site. No US Brownfields site is listed within 0.5 mile of the subject property.

### **3.1.3 Other Databases**

The following subsections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

#### **3.1.3.1 EDR Proprietary Databases**

EDR has conducted research on the occurrence of historical business practices that may pose a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Because of the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

## EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to, gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that the subject property is listed on the EDR Historical Auto Station database:

- Express Stop was identified as a gasoline service station between 1972 and 2014. Further discussion on listings for the subject property is presented in Section 4.

Three EDR Historical Auto Stations sites were identified on the EDR report within 0.125 mile of the subject property. None of these sites are located upgradient of the subject property. Unless otherwise noted, the mere presence of historical auto stations near a site does not, in itself, constitute an REC. Based on lack of reported releases and other supplemental information, the identified sites do not appear to represent a REC to the subject property.

## EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The byproducts from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No manufactured gas sites are listed within one mile of the subject property.

## EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there is one EDR Historical Dry Cleaner site within 0.125 mile of the subject property:

- M Best Cleaners (4420 Pacific Highway E) is located approximately 230 feet east of the subject property. This site was identified as being a cleaners in 2004 and 2010. The site is now a restaurant. The site does not appear on any databases that report releases or spills of hazardous materials and is not listed as a cleanup site. Based on the distance from the subject property and the lack of reported releases, the site does not appear to represent a REC for the subject property.

Unless otherwise noted, the mere presence of a historical dry cleaner near a site does not, in itself, constitute a REC. The identified site does not appear to represent a REC for the subject property.

### 3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for the orphan sites, none appear to represent a potential REC for the subject property.

### 3.1.5 Vapor Encroachment

ASTM Standard E1527-13 defines vapor migration as “the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface” (ASTM 2013). The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The target property and adjacent sites were reviewed in an effort to determine whether vapor migration has, or has the potential to have, occurred at the site from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. Groundwater and soil contamination on site are limited primarily to diesel and oil-range hydrocarbons, metals, and polycyclic hydrocarbons, which do not typically cause vapor intrusion issues. Limited detected concentrations of volatile organic compounds in groundwater and naphthalene in soil are at levels that do not appear to warrant a concern for vapor intrusion. According to the RI Report (Maul Foster & Alongi, Inc. 2020), vapor migration exposure pathways are incomplete and not considered a concern at the subject property.

## 3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the Certified Sanborn Maps and the historical aerial photos.

### 3.2.1 Certified Sanborn Maps

A copy of the Certified Sanborn Map Report for the TDLE project area is included in Appendix C (EDR 2019). Maps were not available for the Gull Station site.

### 3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area examined for the years 1941, 1957, 1968, 1980, 1990, 2006, 2013, and 2017. Copies of the aerial photographs are included in Appendix D. Observations are discussed below.

1941      The subject property appears to be undeveloped, agricultural land. A roadway (Pacific Highway) is visible to the north of the subject property. Some rural residential development is visible to the north of the roadway. The vicinity of the subject property appears to be rural residential development and undeveloped, agricultural land.

- 1957-1980 The subject property appears to be developed with two structures, one situated on the southeastern portion and one situated on the southwestern portion of the subject property. The vicinity of the subject property remains undeveloped agricultural land and rural residential properties.
- 1990 A canopy/structure is visible on the western portion of the subject property, replacing the former structure. The structure on the southeastern portion of the subject property is still visible. Commercial development is visible to the north and southwest of the subject property.
- 2006-2009 The subject property appears much as it did in the 1990 photo and similar to present day conditions, developed with a gasoline service station. The car dealership to the adjacent south is partially developed. Much of the rest of the vicinity of the subject property appears similar to the 1990 photo.
- 2013-2017 The subject property and vicinity are developed similar to present day conditions. The car dealership to the adjacent south of the subject property is further developed with several large buildings.

Based on the historical document review, the subject property first appeared developed with two developed structures in the 1957 aerial photograph. Prior to the development, the subject property was undeveloped, agricultural land. The subject property appeared developed similar to current conditions in 1990. There have been no significant changes to the subject property between 1990 and the present. The presence of a gasoline service station on the subject property shown in the aerial photographs is a REC.

### 3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following subsections.

#### 3.2.3.1 City of Fife

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or ASTs) was completed. Multiple UST permits were listed for multiple years. No additional permits of environmental significance were identified on the City of Fife's Permit Search Tool (City of Fife 2020). A copy of the permit list is included in Appendix F.

#### 3.2.3.2 Pierce County

Based on information from the Pierce County Property Assessor-Treasurer Information Portal, the subject property is located on Tax Lots 320013136 and 320013141 and is approximately 1.6 acres. The subject property is currently owned by Thorp Properties, Inc.

Pierce County records indicate that one structure constructed in 1992 is located on the subject property.

### 3.2.4 Additional Environmental Information

The following subsections provide a summary of additional environmental information obtained for the site.

#### **3.2.4.1 Asbestos**

The manufacture of most asbestos-containing material was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the structure (1992), there is low potential for asbestos-containing materials to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

#### **3.2.4.2 Lead-Based Paint**

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the structure (constructed in 1992), there is low potential for LBP to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

#### **3.2.4.3 Polychlorinated Biphenyls**

Transformers can potentially contain polychlorinated biphenyls (PCBs). There are no transformers located on the subject property. Based on the age of the structure (constructed in 1992), there is low potential for PCBs to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

#### **3.2.4.4 Radon**

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors, such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Pierce County ZIP code 98424 is located in Federal EPA Radon Zone 3. The Zone 3 indoor average radon level is less than 2 pCi/L (pico Curies per Liter). Based on this limited information, radon likely does not represent an environmental concern at the property. In addition, based on lack of a basement and the occupational nature of the site (limited working hours), radon is not expected to be a potential REC for the subject property.

## **4. FILE REVIEW**

In accordance with ASTM Standard E1527-13, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

### **4.1 Previous Investigations**

Based on the subject property's listing in Ecology's CSCSL database, Parametrix requested available site records from the agency. The subject property is listed as the 'Pacific Xpress' site (CS 14611), a gasoline service station that has been in operation since the 1980's according to the RI (Maul Foster & Alongi, Inc. 2020). The Pacific Xpress site was designated on the CSCSL as a result of contamination found during site upgrades and UST replacement in 2018.

Investigations were initiated after excavation at the site in 2018 found petroleum contaminated soil and shallow groundwater due to a leaking UST system and associated fuel lines. The UST system was replaced, contaminated soil was excavated, groundwater was pumped from the excavation and treated, and an oxidizing agent was applied to the subsurface to support bioremediation of remaining impacts.

During the RI, the lateral extent of groundwater contamination exceeding MTCA Method A cleanup levels was determined to be contained within the boundaries of the subject property. Soil contamination exceeding MTCA Method A cleanup levels was determined to be only in the areas adjacent to the existing diesel UST. In accordance with the recommendations outlined in the RI report, quarterly groundwater monitoring is ongoing at the subject property to determine whether contamination is stable or declining. An environmental covenant could be placed on the property to restrict the use of groundwater at the site. Additional oxidizing agent could also be injected near the area of the LUST to expedite the degradation of contaminants in the groundwater. During the RI, standing water was observed in the manholes of the City's stormwater system due to a drainage issue. The RI recommends the City of Fife resolve this issue so that potential groundwater intrusion can be assessed.

The RI report is tentatively approved by PLIA with the requirement that the data gaps outlined in the RI report are addressed (PLIA 2020). The feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated. The presence of contamination in soil and groundwater at the site is considered a REC. The RI report and Ecology's tentative approval letter is included in Appendix F.

### **4.2 Adjacent Properties File Review**

Several nearby properties were listed on environmental databases, as described in Section 3. In general, sufficient site-specific information was available through review of the EDR report as well as online Ecology files to develop an opinion on the potential for these properties to have affected the subject property.

## 5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on November 20, 2020. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site walk are included in Appendix E.

### 5.1 Subject Property

The subject property is developed with a gasoline service station and a convenience store. The property has two covered pump areas, one for larger trucks and one for commercial passenger vehicles. The northern edge of the subject property is fronted by a wide sidewalk along Pacific Highway E. UST fields were observed to the southeast of the easterly pump island and to the west of the westerly pump island. Monitoring wells were observed throughout the subject property. The confirmed presence of petroleum products and the monitoring wells indicating a release are considered a REC for the subject property.

No evidence of ASTs or other indications of environmental significance were observed on the exterior portions of the property. No evidence of staining, adverse odors, or other indications of potential releases was observed. The monitoring wells are part of the ongoing cleanup at the site further discussed in Section 4.

### 5.2 Adjacent Properties

The vicinity of the subject property is developed primarily with commercial buildings. Adjacent properties were examined from public areas for the presence of environmental conditions that have the potential to impact the subject property.

The subject property is bounded to the east and west by restaurants and commercial businesses, to the south by 16th Street East followed by a car dealership and service center, and parking lots, and to the north by Pacific Highway E followed by a tobacco shop and parking lots. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials identified on visible areas of adjacent properties.

## 6. INTERVIEWS

An interview was not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-13.

A user questionnaire was submitted to Sound Transit to assist in identifying potential RECs affecting the site and identification of background information on the subject property. No RECs were identified through the review of the user questionnaire. A copy of the user questionnaire completed by Sound Transit is attached in Appendix A.

Parametrix completed an interview with Rob Olsen, Environmental Health Specialist of the Tacoma-Pierce County Health Department Environmental Health - Contaminated Properties division on February 4, 2021 (TPCHD 2021). According to Mr. Olsen, TPCHD issued a remediation permit in 2018 and he indicated that the last TPCHD annual cleanup permit was issued in July 2020. TPCHD has not received reports documenting cleanup activities with the permits. Mr. Olsen noted that TPCHD should be notified of cleanup activities but often reports are only sent to PLIA or other appropriate agencies.

## 7. CONCLUSIONS

Parametrix conducted a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 on the subject property identified as TDLE properties TD 3947 and TD 3933. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located on Pierce County Tax Lots 320013136 and 320013141 (Figure 1) and is currently occupied by a gasoline service station and convenience store. The subject property encompasses an area of approximately 1.6 acres and is zoned for commercial use. The convenience store on the subject property is 4,050-square-feet in size.

The first known development of the site was in the 1950s with two structures. Prior to the development, the subject property was undeveloped agricultural land. The subject property appeared developed as a gas station, similar to current conditions by 1990. There have been no significant changes to the subject property between 1990 and the present. Surrounding land use has remained commercial and industrial. According to City records, the convenience store structure was built in 1992.

This assessment has revealed no evidence of RECs in connection with the subject property except for the following:

### **Recognized Environmental Conditions**

The subject property is listed on multiple databases on the EDR report, including the CSCSL and PTAP databases. Contamination originating from a LUST and associated fuel lines resulted in soil and groundwater impacts at the subject property. Cleanup levels were exceeded for diesel and gasoline-range hydrocarbons in soil and groundwater as well as associated benzene, toluene, ethylbenzene, and xylenes. Remedial actions, including the removal of the tank, soil excavation, and injection of an oxidizing agent, have been completed at the site, and groundwater monitoring is ongoing. Additional remedial actions are on-going including quarterly groundwater monitoring to determine whether contamination is stable or declining. An RI report is tentatively approved with the requirement that the data gaps are addressed, including stormwater drainage issues. The presence of soil and groundwater contamination at the subject property represents a REC.

According to the RI, the feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated.

The storage of petroleum products, two UST fields, was noted on the subject property during site reconnaissance (from public rights-of-way). Monitoring wells were also noted throughout the subject property indicating cleanup activities. The storage of petroleum products and the observed monitoring wells are a REC to the subject property.

### **Data Gaps**

An on-site reconnaissance (within subject property boundaries) and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13 (2013). However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

## Legal Description

### **PARCEL 1:**

That portion of the Southeast quarter of the Southwest quarter of Section 1, Township 20 North, Range 3 East, W.M., in Pierce County, Washington, lying South of the South line of Pacific Highway East;

Except that portion lying East of the West 794.5 feet thereof;

And except the West 514.5 feet thereof.

Together with that portion of vacated P.S.H. 1 (Pacific Highway) adjoining as vacated under Ordinance No. 558 of the City of Fife which upon vacation attached to said property by operation of law.

### **PARCEL 2:**

That portion of the Southeast Quarter of the Southwest Quarter of Section 1, Township 20 North, Range 3 East of the Willamette Meridian described as follows:

Beginning at a point on the South line of said Section which is East 241.5 foot from the Southwest corner of the Southeast quarter of the Southwest quarter of 3aid Section 1;

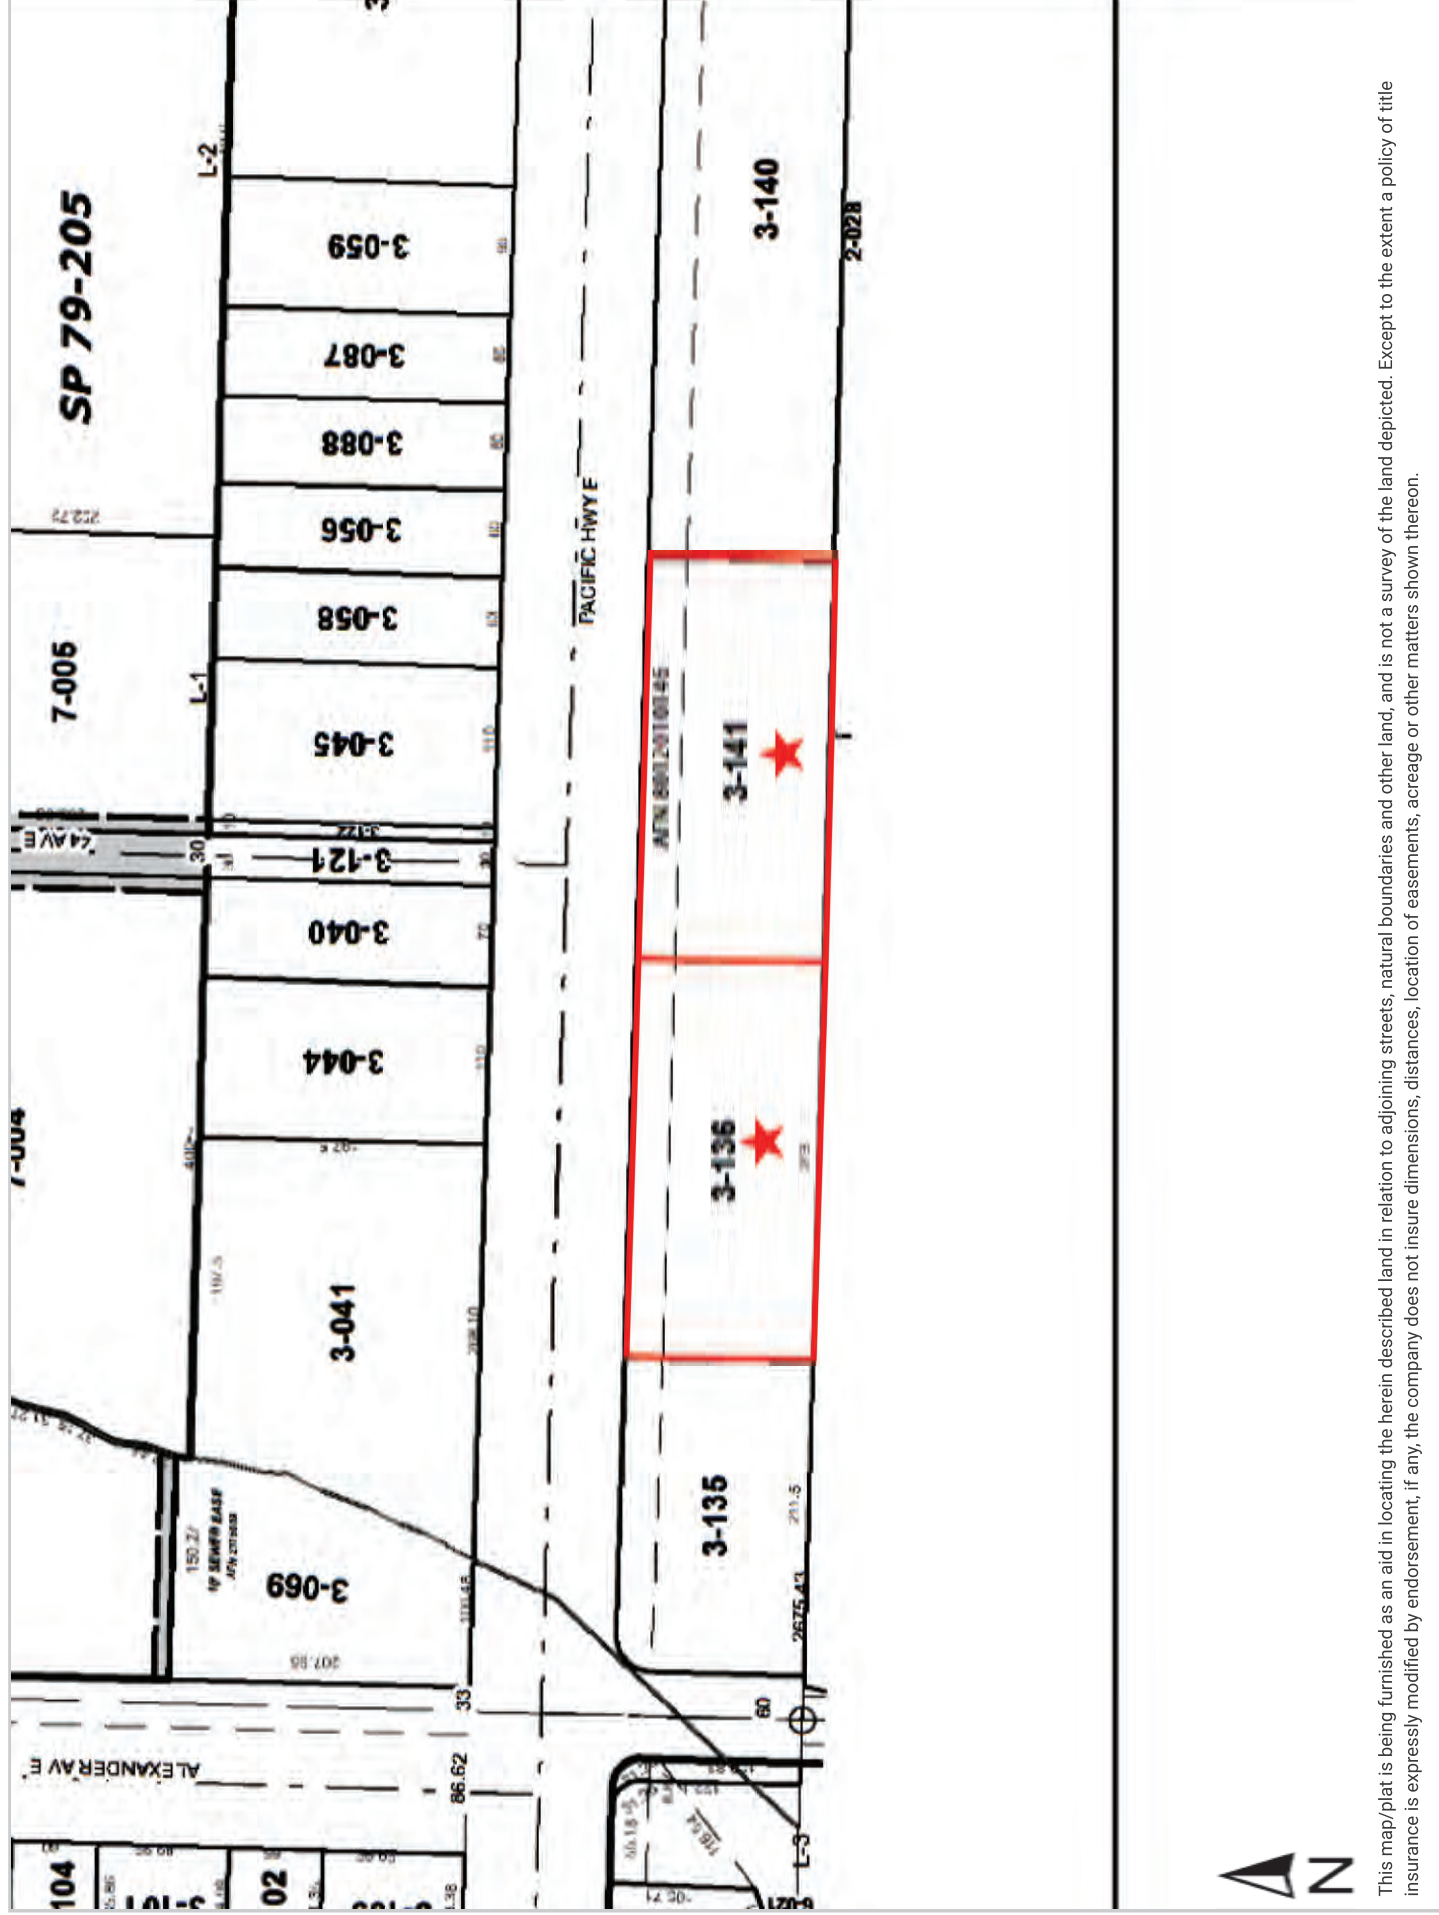

Thence East along said South line 273 feet;

Thence Northerly parallel with the West line of said subdivision to the South margin of Pacific Highway;

Thence Westerly along said margin 273 feet;

Thence Southerly to the point of beginning;

Together with that portion of vacated P.S.H. 1 (Pacific Highway) adjoining as vacated under Ordinance No. 558 of the City of Fife which upon vacation attached to said property by operation of law.

This map/plot is being furnished as an aid in locating the herein described land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

SHORT FORM LEASE

THIS INDENTURE, being a SHORT FORM LEASE, dated as of October 17, 1971, by and between PUGET SOUND POWER & LIGHT COMPANY, a Washington corporation (herein called Lessor) and JOHN O. BULL and BELVA LEE BULL, his wife, (herein called Lessee);

The Lessor in consideration of the rents reserved, hereinafter referred to, and of the terms, covenants, conditions and agreements on the part of the Lessee, does hereby lease unto the Lessee, and the Lessee does hereby hire from Lessor, the following described real property (hereinafter called the Premises) situated in Pierce County, Washington:

A portion of the former Puget Sound Electric Railway right of way in Section 1, Township 20 North, Range 3 East, W.M., more particularly described as follows:

Beginning at a point 5 feet north and 514.5 feet east of the southwest corner of the Southeast 1/4 of the Southwest 1/4 of said Section 1; thence continuing east 5 feet north of and parallel to the south line of said Section 1, a distance of 150 feet; thence northerly 95 feet to the south line of Pacific Highway East; thence west along the south line of Pacific Highway East 150 feet; thence southerly 95 feet to the point of beginning.

TO HAVE AND TO HOLD the Premises for an initial term commencing July 1, 1971, and ending on June 30, 1976, upon the rents, terms, covenants and conditions in a certain collateral lease agreement between the parties hereto and bearing even date herewith.

Said collateral lease agreement containing a covenant by Lessee that at the expiration or sooner termination of this lease all improvements on and to the Premises, whether presently existing or subsequently installed, shall become the property of the Lessor.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands and seals the day and year first above written.

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE, made as of June 5, 1990, by and  
between THORP PROPERTIES, INC., a Washington corporation,  
hereinafter called Landlord, and SOUTH CENTER OIL, INC., a  
Washington corporation, hereinafter called Tenant;

W I T N E S S E T H:

WHEREAS, Landlord and Tenant did enter into a certain lease  
on or about March 1, 1990, concerning premises situated at 4310  
Pacific Highway East, Fife, Pierce County, Washington, upon the  
terms, covenants and conditions therein set forth;

NOW, THEREFORE, in consideration of the rents in that  
certain Lease between the parties dated March 1, 1990, and the  
terms, covenants, conditions and agreements on the part of Tenant  
therein, Landlord leases to Tenant real property in the County of  
Pierce, State of Washington, and more particularly described on  
Exhibit "A" attached hereto and by this reference made a part  
hereof; together with all and singular the building or buildings,  
privileges and advantages, with any and all appurtenances  
belonging or in any way appertaining thereto.

For reference only, not for re-sale.

9006220199

THIS INSTRUMENT is merely a memorandum of the aforesaid Lease and is subject to all of the terms and conditions thereof. In the event of any inconsistency between the terms of this instrument and said Lease, the terms of said Lease shall prevail as between the parties hereof.

VOL. 0637 PAGE 1574

AMENDMENT OF LEASE AND SUBORDINATION OF LEASE

Thorp Properties, Inc., a Washington corporation, leased the property described on the attached exhibit A to South Center Oil, Inc., a Washington corporation. That lease is dated March 1, 1990. The March 1, 1990 lease is hereby amended as follows:

Paragraph 3 Term is amended to read as follows:

3. **Term.** The term of this Lease shall commence on July 1, 1990, and shall terminate 20 years from the date that the Evergreen Community Development Association's debenture is sold pursuant to a United States Small Business Administration (hereafter SBA) authorization and debenture guaranty number CDC-406011-30-08-WA (hereafter "Authorization").

Paragraph 4 Rent is amended to read as follows:

4. **Rent.** Lessee shall pay to Lessor as rent for the premises equal monthly installments of \$12,590, in advance of the first day of each month of the term of the lease. This amount of rent is based on estimates of the Lessor's expenses for debt service, insurance and real estate taxes for the project authorized by the SBA's Authorization. During the term of this lease the rent shall not exceed the amount permitted by the Authorization for the guaranty of a debenture to be issued by the Evergreen Community Development, the proceeds of which are to be loaned to Lessor. If the Lessor's expenses for debt service, insurance and/or real estate taxes are different from those anticipated, and when these expenses change during the term of the lease, the Lessor shall change the Lessee's monthly payment to the amount necessary to reimburse the Lessor's expenses for these costs. The amount of rent may be modified by giving the Lessee 30 days' written notice of the change in rent payments.

The undersigned also hereby subordinate the lien of their March 1, 1990 lease to the lien of \$544,000 deed of trust in favor of the Evergreen Community Development Association which deed of trust will be assigned to the United States Small Business Administration. This \$544,000 deed of trust in which Thorp Properties,

## USER QUESTIONNAIRE INFORMATION (ASTM)

User representative: **Sound Transit – Ross Stainsby**

Date: **February 2021**

Project Name: **Tacoma Dome Link Extension**

Property Name and TD #: **Gull Station, TD 3947, 3933**

Project Number: **AE 0030-17**

## ASTM 1527-13 USER QUESTIONS

ASTM 1527-13 includes a user questionnaire that must be completed by the user in order to qualify for Landowner Liability Protections (LLPs) under CERCLA. The following questions are to be completed by the user or representatives of the user.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?  
\_\_\_ No \_\_\_\_\_
2. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? \_\_\_ No  
\_\_\_\_\_
3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? \_\_\_ No  
\_\_\_\_\_
4. For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? \_\_\_ No  
\_\_\_\_\_
5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? \_\_\_ I am not aware of the purchase price \_\_\_\_\_
6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? \_\_\_ No  
\_\_\_\_\_

For example, as user,

(a) do you know the past uses of the property? \_\_\_ No  
\_\_\_\_\_

(b) do you know of specific chemicals that are present or once were present at the property? \_\_\_ No  
\_\_\_\_\_

(c) do you know of spills or other chemical releases that have taken place at the property? \_\_\_ No  
\_\_\_\_\_

(d) do you know of any environmental cleanups that have taken place at the property? \_\_\_ No  
\_\_\_\_\_

7. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property? \_\_\_ No  
\_\_\_\_\_

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

| <u>Lower Elevation</u>                                    | <u>Address</u>    | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: WAD988521571

### **State- and tribal - equivalent NPL**

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/26/2020 has revealed that there are 3 WA HSL sites within approximately 1 mile of the target property.

### **State- and tribal - equivalent CERCLIS**

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 34 WA CSCSL sites within approximately 1 mile of the target property.

### **State and tribal landfill and/or solid waste disposal site lists**

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there is 1 WA SWF/LF site

## EXECUTIVE SUMMARY

within approximately 0.5 miles of the target property.

### **State and tribal registered storage tank lists**

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 05/12/2020 has revealed that there are 4

## EXECUTIVE SUMMARY

WA UST sites within approximately 0.25 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Lists of Hazardous waste / Contaminated Sites

Information on facilities and sites of interest to the Department of Ecology.

A review of the WA ALLSITES list, as provided by EDR, and dated 04/17/2020 has revealed that there are 87 WA ALLSITES sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/13/2020 has revealed that there are 10 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 13 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: PETROCARD INC  
Address: 4310 PACIFIC HWY E  
City: FIFE  
Zip: 98424

Tank Name: 7 - Retail Diesel  
Tag Number: A3973  
Tank Status: Operational  
Tank Status Date: 08/06/1996  
Tank Install Date: 08/01/1990  
Tank Closure Date: Not reported  
Capacity Range: 5,000 to 9,999 Gallons  
Tank Permit Expiration Date: 10/31/2018  
Tank Upgrade Date: 03/16/1998  
Tank Spill Prevention: Spill Bucket/Spill Box  
Tank Overfill Prevention: Overfill Alarm

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.  
HAZARDOUS WASTE BIENNIAL REPORTER  
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

**FINDS:**

Registry ID: 110005331220

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Code: F005  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F019  
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Waste Stream Comments:**

CORB Waste Sequence Number: 134401  
Comments: A-9a canisters where waste water flow through resins & clears out all contaminants, canisters are sent back to seimens where resins are changed out so that canisters may be reused.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality Programs.  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
