CITATION

Sound Transit. 2021. Phase I Environmental Assessment.
TD 4030, Fife RV Center (East Property),
3520 Pacific Highway E, Fife, Washington.
Prepared by Parametrix, Seattle, Washington.
March 2021.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared by Michael Brady, LG, LHG

EXECUTIVE SUMMARY

Parametrix conducted a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of American Society of Testing and Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as Tacoma Dome (TD) 4030. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located at 3520 Pacific Highway E in Fife, Washington, on Pierce County Parcel Identification number 0320111049 (Figure 1). The subject property is currently owned by KS Family, LLC, and operated as the Fife RV Center East Property, which encompasses the parts and repair department.

The subject property was primarily used as farmland until development of a Holiday Inn motel in 1964. The site was operated as a Holiday Inn through the 1980s, then as the Hometel Inn through at least 2002. The site was used as a Korum outdoor sales lot in 2006 and as a Fife RV sales lot from 2010 through the present. Records indicate an oil-water separator and RV wash pad have been operated on the subject property from at least 2012 through the present. The presence and operation of a wash pad and oil/water separator on the subject property is of some environmental concern but likely represents *de minimis* conditions assuming proper operation and maintenance.

A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases, including the adjacent property to the west (La Casa Real Drum/Fife RV Center), which has an unresolved petroleum release related to a historical gasoline station. Based on the groundwater gradient away from the subject property, soil, groundwater, and vapor contamination from the neighboring release is not expected to have impacted the subject property (Figure 2). No other listed sites are suspected to have impacted the subject property.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property, except for the following:

Recognized Environmental Conditions

The subject property is listed on the Washington State Department of Ecology (Ecology) Confirmed and Suspected Contaminated Sites List (CSCSL) database, Ecology Voluntary Cleanup Program (VCP) database, facility/site information (ALLSITES) database, the Ecology Historical Clandestine Drug Lab (WA HIST CDL) database. The listings are primarily related to metals discovered in groundwater during previous Phase II ESAs. Total arsenic, chromium, and lead are suspected to continue to remain above Model Toxics Control Act (MTCA) Method A cleanup levels (CULs) below the subject property, appearing to be related to area-wide contamination from the Asarco Smelter plume, historical farming activities, or naturally occurring background concentrations. However, dissolved metals concentrations below the property were reported below MTCA Method A CULs in four groundwater monitoring wells. The presence of total metals in groundwater are considered a REC to the subject property. The clandestine drug lab listings for the site were previously resolved, representing a historical REC (HREC) for the site.

Data Gaps

An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with American Society for Testing and Materials Standard (ASTM) E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

1. INTRODUCTION

Parametrix was retained by Sound Transit to perform a Phase I ESA on the subject property located at 3520 Pacific Highway E in Fife, Washington (Figure 1). The property is identified as TD 4030, which is located on Pierce County parcel number 0320111049. It is our understanding the subject property may be acquired by Sound Transit for the completion of the Tacoma Dome Link Extension (TDLE) project. This Phase I ESA was conducted to support the environmental due diligence related to the potential acquisition.

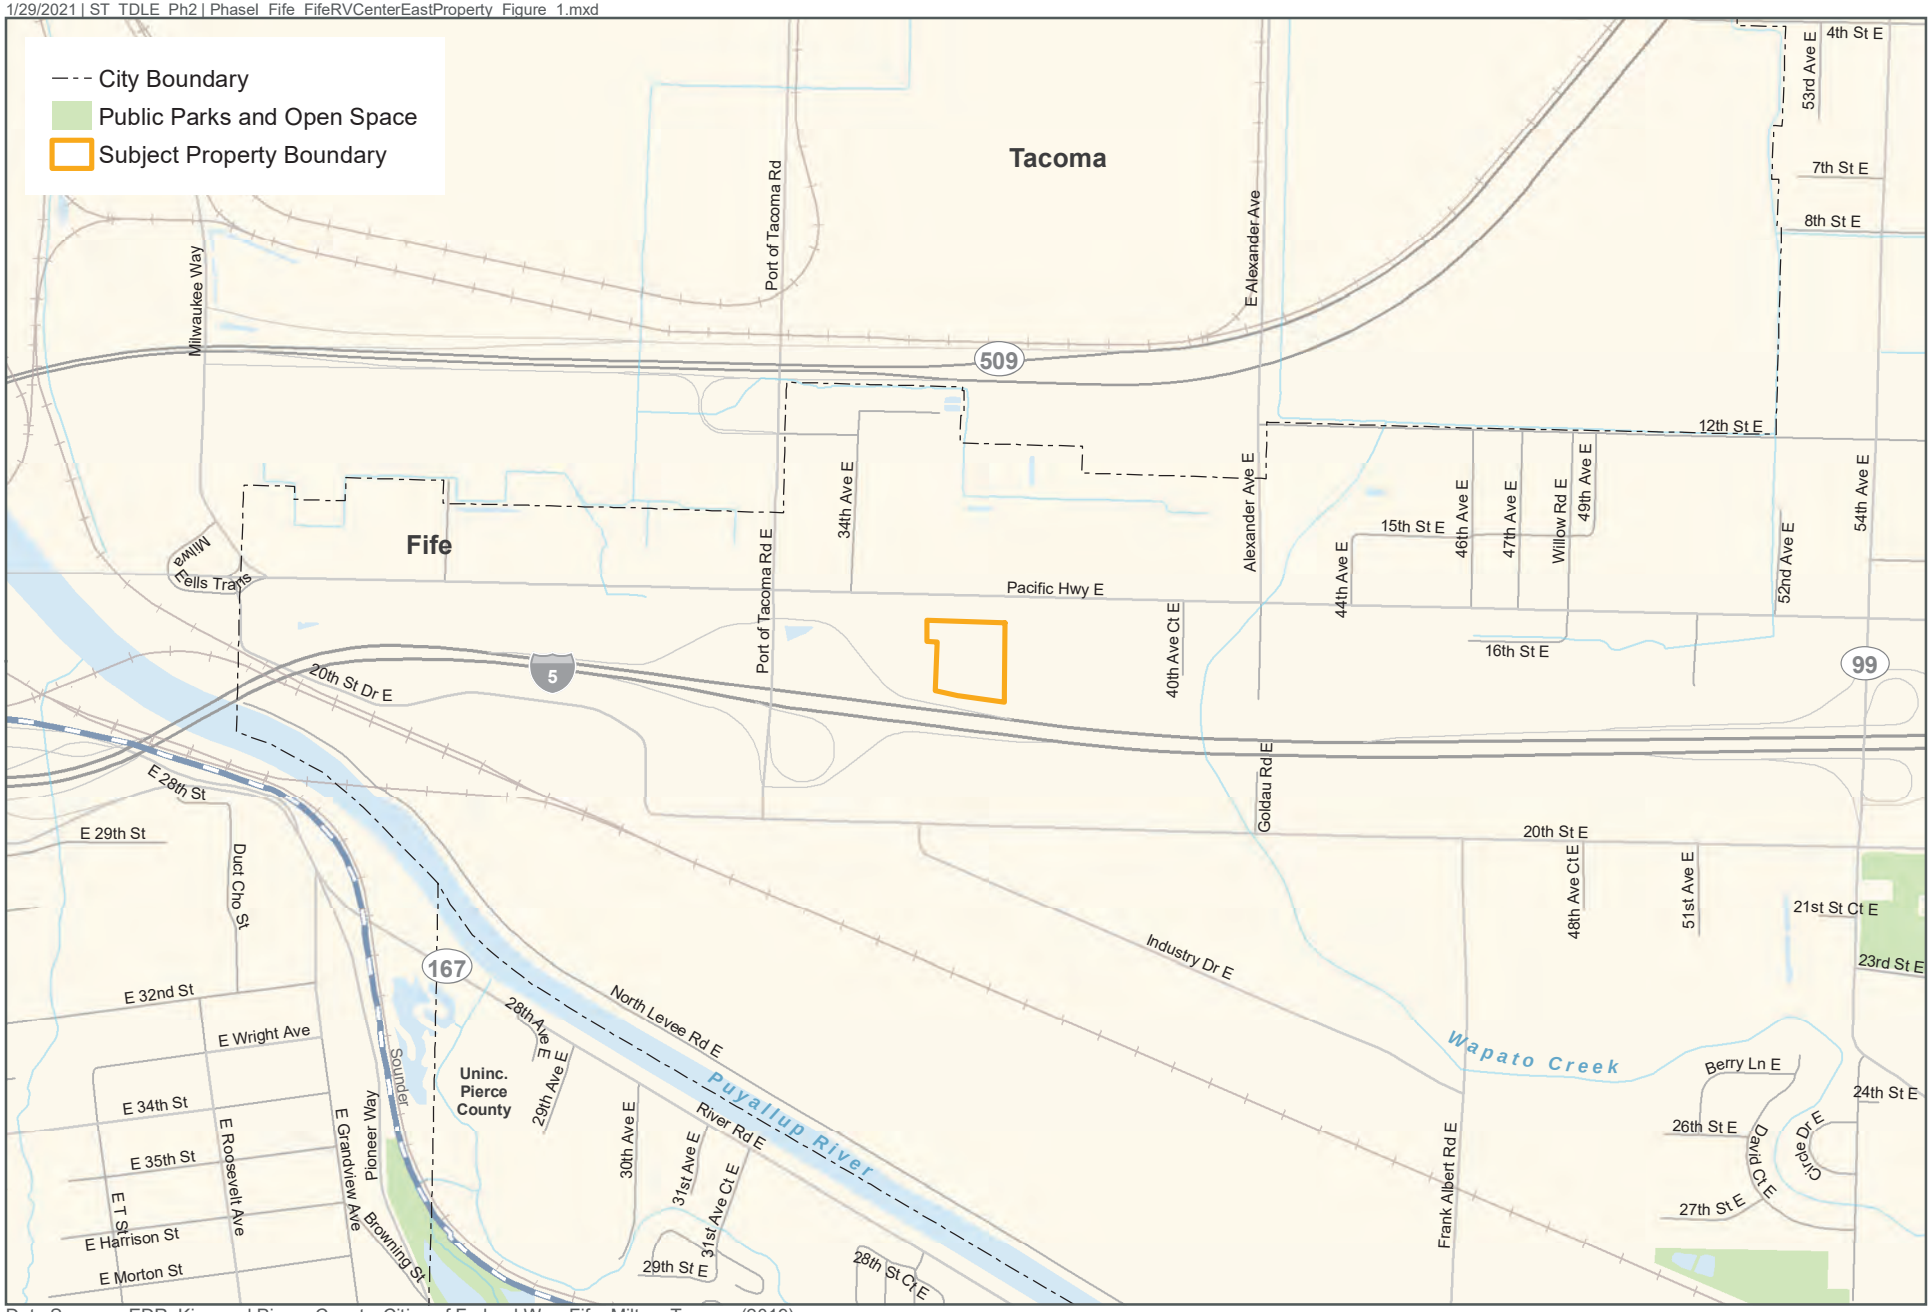
The subject property is currently owned by KS Family LLC and operated as a recreational vehicle (RV) sales lot/parts and repair facility by the Fife RV Center. The subject property is located in a mixed-use area of commercial properties in the Pacific Highway Corridor of Fife in Pierce County, Washington (Figure 2).

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The ESA consists of two distinct tasks: (1) a review of documents and of oral information, and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study. The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (known as CERCLA), and as such constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601 (35)(B).

The purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) on or near the subject property. The term Recognized Environmental Condition is defined in ASTM Standard E1527-13 as:



> "…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*."

In accordance with ASTM Standard E1527-13, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls." (ASTM 2013)

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property. No visual reconnaissance was possible inside the building on the subject property.

Unless otherwise stated, no other exceptions to the guidelines presented in ASTM E1527-13 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions not detected at the time of the investigation may exist at the site.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff
- Contacts and discussions with regulatory agencies and others
- Review of available hazardous substance or solid waste lists
- Opinions and judgments of Parametrix based on the information available

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

2.1 Location

The subject property is located at 3520 Pacific Highway E in Fife, Washington, on Pierce County parcel identification number 0320111049. The subject property is located within the northwest quarter of the northeast quarter of Section 11, Township 20 North, Range 3 East in Pierce County, Washington (Figure 2).

2.2 Site and Vicinity Characteristics

The subject property is currently owned by KS Family, LLC, and operated as the Fife RV Center parts and repair department. The subject property is located in a mixed-use area of commercial properties in the Pacific Highway Corridor of Fife (Figure 2).

Neighboring properties consist of a Travelodge motel (north), office building (east), Fife RV Center sales (west), Tahoma Express gasoline station (northwest), and Interstate 5 (south).

2.3 Physical Setting

The subject property is at an elevation of approximately 15 feet above mean sea level. The topography of the site is relatively flat (USGS 2020). Soils in the area of the subject property are mapped as Puyallup loam and Puyallup fine sandy loam by the U.S. Department of Agriculture (USDA 1955). These are described as well drained soils occurring on floodplains and low stream terraces.

The surface geology of the subject property is mapped as Quaternary alluvium (Qal) deposits (Troost, in press). The Qal deposits primarily consist of sand, gravel, silt, and clay deposits from migration and flooding of the Puyallup River.

A review of well and borehole logs completed on the subject property and the neighboring site to the west indicates the subsurface is primarily composed of silty sand and silt layers down to approximately 25 feet below ground surface. Depth to groundwater has been observed below the subject property and neighboring property less than 5 feet below ground surface. The groundwater gradient below the subject property is reportedly southwesterly based on water-level monitoring from the adjacent property and approximate depth to water below the subject property (Figure 2).

The nearest surface water body is Wapato Creek located 1,250 feet east of the subject property. The Puyallup River is located 2,900 feet southwest of the subject property. An ephemeral stormwater drainage ditch is adjacent south of the subject property along Interstate 5. The drainage ditch flows easterly towards Wapato Creek.

2.4 Current Use of the Property

The subject property is developed with a former hotel building that is currently operated as the parts department for Fife RV. The lot surrounding the building is used for storing RVs.

2.5 Descriptions of Improvements on the Subject Property

The subject property is developed with a 13,072-square-foot building that encompasses 8,392 square feet of offices and 4,680 square feet of storage garage space completed in 1963 (Pierce County Assessor 2020). The building is surrounded by 93,100 square feet of asphalt and there are two canopies that are approximately 1,200 square feet in size.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products (ASTM 2013). Parametrix reviewed the Pierce County Recorder's database for liens against the current owner. No environmental liens were identified within the recorded documents filed for the current owner of the subject property. Parametrix also reviewed the Washington State Department of Ecology's environmental covenant database. No environmental (restrictive) covenants were filed for the subject property.

A Property History Guarantee title report was supplied by Sound Transit for the subject property (attached in Appendix A). There are no records in the title summary report indicating activity or use limitations or environmental liens affecting the property. No evidence of activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of various lists and files published by federal and State of Washington agencies, and (2) a compilation of historic uses of the site and site vicinity to determine whether past operations pose an environmental risk to the subject property. Information for agency file review is based, in part, on a report provided by Environmental Data Resources (EDR). The EDR Radius Map Report (EDR report) is included in Appendix B.

The EDR report is a summary of state and federal database searches for sites of possible environmental concern. The information review enabled Parametrix personnel to characterize the types of activities performed at the site, identify data gaps prior to the site examination, and facilitate recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing Tacoma-Pierce County Health Department personnel, by making observations during the site examination, or by additional detailed investigation of available records.

It should be noted that this information is reported as Parametrix received it from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR report (Appendix B). EDR reported a total of 131 properties with 217 listed conditions within a mile of the subject property. EDR also reported six unmappable (orphan) sites in the area of the subject property. Parametrix reviewed the information in the EDR report to screen properties in the vicinity of the subject property for sites with potential to impact the subject property. The screening process involved reviewing the types of listings, types of contaminants, proximity, and position relative to the subject property, the topography, and groundwater gradient. Listings for sites found in the standard environmental records sources that could not be screened to verify potential impacts to the subject property were further evaluated by file reviews (Section 4, below).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases. Additional information regarding these sites was reviewed online on the Ecology website to supplement data gaps in the EDR report. A complete listing of the databases reviewed is included in the EDR report. Relevant database listings from Ecology include:

- Ecology Hazardous Site List (HSL)
- Ecology Confirmed and Suspected Contaminated Site List (CSCSL)

- Ecology CSCSL No Further Action (CSCSL NFA) List
- Ecology Solid Waste Facility/Landfill (SWF/LF) List
- Ecology Leaking Underground Storage Tank (LUST) List
- Ecology Underground Storage Tank (UST) List
- Ecology Aboveground Storage Tank (AST) List
- Ecology Voluntary Cleanup Program (VCP) List
- Ecology Independent Cleanup Report (ICR) List
- Ecology and Pollution Liability Insurance Agency Petroleum Technical Assistance Program (PTAP) List
- Ecology Brownfields List
- Ecology Facility/Site Information System (ALLSITES) List
- Ecology Clandestine Drug Lab Contaminated Site (CDL) List and Historical CDL (HIST CDL) List
- Ecology Firefighting Foam Incidents (AQUEOUS FOAM) List and Perfluorinated Contamination Site Location (PFAS) List
- Ecology Reported Spills (SPILLS) List
- Ecology Drycleaners List

3.1.1.1 Ecology HSL, CSCSL, and CSCSL NFA Databases

The Ecology CSCSL database contains sites in Washington State that have been confirmed or have been suspected of contaminant releases and is the state equivalent to the federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS). The HSL is a subset of the CSCSL database for sites that have been formally ranked using the Washington Ranking Method. The CSCSL NFA database is former CSCSL sites that have achieved an NFA determination from Ecology.

The subject property was found on the CSCSL database:

- The Hometel Inn addressed at 3520 Pacific Highway E is listed on the CSCSL database related to arsenic in groundwater above MTCA Method A CULs. This represents a REC to the subject property. Further information is provided in Section 4.

Twenty-nine sites within one mile of the subject property were reported on the CSCSL database, five sites within one mile were reported on the HSL database, and eleven sites within 0.5 mile were reported on the CSCSL NFA database. One CSCSL and three CSCSL NFA sites were reported within 0.125 of a mile from the subject property and are discussed below:

- The La Casa Real Drum at 3410 Pacific Highway E (adjacent west) is listed on the CSCSL database. This site had a release of petroleum hydrocarbons and metals above MTCA Method A CULs in soil and groundwater. Based on the EDR listings indicating a potential REC impacting the subject property, a file review was conducted and is further discussed in Section 4.
- Cummins NW Inc at 3701 Pacific Highway E (adjacent north across Pacific Highway) is listed on the CSCSL database. The listings indicate a release of petroleum hydrocarbons from a UST was reported

in 2002, and the site achieved an NFA status from Ecology in 2003. Based on the NFA status, this site is not considered a REC to the subject property.

- Unocal Service Station 7343 at 3408 Pacific Highway E (adjacent northwest of the subject property) is listed on the CSCSL NFA database. The listings indicate a release of petroleum hydrocarbons was reported in 1990 from USTs, and the site achieved an NFA status from Ecology in 1993. Based on the NFA status, this site is not considered a REC to the subject property.
- Jet Auto Wrecking at 3901 Pacific Highway E (approximately 650 feet northeast of the subject property) is listed on the CSCSL NFA database. The listings indicate petroleum hydrocarbons and metals in soils were remediated below MTCA Method A CULs, and the site achieved an NFA status from Ecology in 1997. Based on the NFA status, this site is not considered a REC to the subject property.

3.1.1.2 Ecology LUST, UST, and AST Databases

The Ecology LUST Database List contains an inventory of reported leaking underground storage tank sites from commercial tanks.

The Ecology UST database contains registered commercial USTs. Residential heating oil USTs are not included in the Ecology UST database. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). Unless otherwise noted, the presence of USTs near the site does not, in itself, constitute a REC.

The Ecology AST database is a listing of aboveground storage tank locations regulated by the Department of Ecology's Spill Prevention, Preparedness and Response Program. Unless otherwise noted, the presence of ASTs near the site does not, in itself, constitute a REC.

The subject property is not listed on the UST, LUST, or AST databases.

Ten sites were reported on the LUST database within 0.5mile of the subject property, seven sites were reported on the UST database within 0.25 mile of the subject property, and no AST sites were reported within 0.25 mile of the subject property. Three of these sites were reported within 0.125 mile from the subject property:

- Cummins NW Inc at 3701 Pacific Highway E (adjacent north across Pacific Highway) is listed on the LUST and UST databases. As noted above, the listings indicate a release of petroleum hydrocarbons from a UST was reported in 2002, and the site achieved an NFA status from Ecology in 2003. Based on the NFA status, this site is not considered a REC to the subject property.
- Tahoma Express 4 at 3408 Pacific Highway E (adjacent northwest of the subject property) is listed on the UST database. The listings indicate the site operates three USTs that were installed in the 1990s and two USTs were previously removed. Based on the listings and active operational status of the gasoline station, this site is not considered a REC to the subject property.
- Unocal Service Station 7343 at 3408 Pacific Highway E (adjacent northwest of the subject property) is listed on the LUST database. As noted above, the listings indicate a release of petroleum hydrocarbons was reported in 1990 from USTs, and the site achieved an NFA status from Ecology in 1993. Based on the NFA status, this site is not considered a REC to the subject property.

The remaining listed sites on the UST and LUST databases identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.1.3 Ecology VCP, PTAP, and ICR Databases

The VCP database is a list of sites that have been entered into the Ecology voluntary cleanup program and are undergoing cleanup. The PTAP database is a list of petroleum release sites that have been entered into the Pollution Liability Insurance Agency PTAP program and are undergoing cleanup. The ICR database is a list of sites that have reported independent cleanup actions to Ecology without agency oversight or approval, and the sites are not under an order or decree.

The subject property was reported on the VCP database.

- The Hometel Inn addressed at the subject property is listed on the VCP database dating from 2004 through 2011. As noted above, based on the listings for the subject property, a file review was conducted and summarized in Section 4.

Fifteen sites within 0.5 mile of the subject property were reported on the VCP database. Two of these sites were reported within 0.125 mile from the subject property:

- Cummins NW Inc at 3701 Pacific Highway E (adjacent north across Pacific Highway) is listed on the VCP databases. As noted above, the listings indicate a release of petroleum hydrocarbons from a UST was reported in 2002, and the site achieved an NFA status from Ecology in 2003. Based on the NFA status, this site is not considered a REC to the subject property.
- The Fife RV Center at 3410 Pacific Highway E (adjacent west) is listed on the VCP database. As noted above, this site is listed as La Casa Real Drum on the CSCSL database. This site had a release of petroleum hydrocarbons and metals above MTCA Method A CULs in soil and groundwater. Based on the EDR listings indicating a potential REC impacting the subject property, a file review was conducted and is further discussed in Section 4.

The remaining listed sites on the VCP database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

Three sites within 0.5 mile of the subject property was reported on the PTAP database. These sites are 1,400 to 2,000 feet from the subject property with no potential to impact the subject property.

Five sites within 0.5 mile of the subject property were reported on the ICR database. One site is reported within 0.125 of a mile from the subject property:

- Unocal Service Station 7343 at 3408 Pacific Highway E (adjacent northwest of the subject property) is listed on the ICR database. As noted above, the listings indicate a release of petroleum hydrocarbons was reported in 1990 from USTs, and the site achieved an NFA status from Ecology in 1993. Based on the NFA status, this site is not considered a REC to the subject property

The remaining listed sites on the ICR database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.1.4 Ecology ALLSITES Database

The Ecology ALLSITES database summarizes sites that likely handle or store hazardous waste in association with the facility/site information system and can include other types of interactions with Ecology including compliance inspections.

The subject property is listed on the ALLSITES database:

- The Hometel Inn addressed at the subject property is listed on the ALLSITES database. As noted above, based on the listings for the subject property, a file review was conducted and summarized in Section 4.

3.1.1.5 Ecology CDL and HIST CDL Database

The subject property is listed twice on the WA HIST CDL database. Rooms 115 and 133 of the former motel were reported as historical clandestine drug labs. Further discussion regarding the listings for the subject property are presented in Section 4. No other sites were listed on the WA CDL of WA HIST CDL database within 0.125 of a mile from the subject property.

3.1.1.6 Ecology SPILLS Databases

The Ecology SPILLS databases report potential small releases to the subsurface that have the potential to cause contamination.

The adjacent property north, Travelodge Port of Tacoma, was listed on the SPILLS database dating to a small release occurring on asphalt in 2016. Based on the information in the SPILLS database, this site is not considered a REC to the subject property.

No other SPILLS sites were reported within 0.125 mile of the subject property.

3.1.1.7 Ecology Drycleaner Database

The drycleaner database is a listing of former or current drycleaners in Washington. No drycleaners were reported within 0.25 mile of the subject property. No inactive drycleaners were reported within 0.25 mile of the subject property.

3.1.2 EPA Database Review

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within ASTM 1527-13 search radii from the following databases. A complete listing of the databases reviewed is included in the EDR report.

- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS) List
- Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Information System (RCRIS) List
- Emergency Response Notification System (ERNS) List

- US Brownfields List
- Manufactured Gas Plant Sites

3.1.2.1 National Priorities List (NPL)

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. The EDR report indicates that the subject property is not listed as an NPL site. EDR reports no NPL sites were identified within 1 mile of the subject property; however, there is one NPL potentially impacting the subject property:

- The Asarco Tacoma Smelter Plume is a part of the Commencement Bay Nearshore Tideflats NPL site and includes large portions of Pierce, King, Kitsap, and Thurston Counties related to windblown contamination of arsenic and lead deposited from operation of the Asarco Smelter in Ruston, Washington, for a period of nearly 100 years (Ecology 2020). The area of the subject property is mapped within an area of impact from arsenic of less than 20 parts per million. Based on the mapped concentrations, this represents *de minimis* conditions at concentrations less than MTCA Method A CULs and is not considered a REC to the subject property.

3.1.2.2 SEMS List

The EPA publishes a list of sites that may potentially pose a threat to the environment or the health of the general public. This list is known as the SEMS list (formerly the CERCLIS list). Information contained in the EDR report indicates the subject property is not listed as a SEMS site. One SEMS site was identified within one mile of the subject property:

- The Dauphin site at 2911 Pacific Highway E (1,945 feet east of the subject property) is listed on the SEMS database. The listing indicates this site is part of the Commencement Bay Nearshore Tideflats NPL site dating to 1979. However, additional Ecology records indicate this property is currently within the VCP program undergoing remedial investigations. Based on the proximity and status, this site is not considered a REC to the subject property.

The EPA also publishes the SEMS-ARCHIVE list, which are SEMS sites that have been designated no further interest under the Federal Superfund Program. One SEMS-ARCHIVE site was reported within 0.5 mile of the subject property:

- Brekke Enterprises at 1320 Tidehaven Road (1,075 feet northwest of the subject property) is listed on the SEMS-ARCHIVE database. The listing indicates the site was determined to not be part of the Commencement Bay Nearshore Tideflats NPL site dating to 1985. Ecology records indicate Corrosive Wastes were suspected in soil and groundwater, and Ecology granted an NFA status to this site in 1989. Based on the NFA status and proximity, this site is not considered a REC to the subject property.

3.1.2.3 CORRACTS Review

The CORRACTS report identifies hazardous waste handlers with corrective action activity. Information contained in the EDR report indicates the subject property is not listed as a CORRACTS site.

No CORRACTS sites are listed within one mile of the subject property.

3.1.2.4 Resource Conservation and Recovery Information System (RCRIS) List

The RCRIS list includes selective information on sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Information contained in the EDR report indicates the subject property is not listed as a RCRIS site:

Three RCRA generator sites are listed within 0.25 mile of the subject property:

- PM Testing Lab Inc Pacific Highway at 3921 Pacific Highway E (1,000 feet northeast of the subject property) is listed on the RCRA large quantity generator database. The listings indicate this facility generates a variety of hazardous wastes related to materials testing and analysis as well as primer applications, painting, and abrasive finishing. Some violations were reported for the facility during compliance evaluations. However, based on the proximity, this site is not considered a REC to the subject property.
- Union Pacific Railroad Fife at 3330 20th Street E (approximately 1,060 feet south of the subject property) is listed on the RCRA very small quantity generator database. The listings indicate this site generates a small quantity of hazardous waste related to railroad maintenance. No violations were reported for the site. Based on the proximity, this site is not considered a REC to the subject property.
- Wescraft RV & Truck Fife at 3402 12th Street E (approximately 1,240 feet north of the subject property) is listed on the RCRA very small quantity generator database. The listings indicate this site generates a small quantity of hazardous waste related to RV repairs. Some violations were reported for this site during compliance evaluations. Based on the proximity, this site is not considered a REC to the subject property.

Seventeen RCRA Non-Generator sites are listed within 0.25 mile of the subject property. Four were reported within 500 feet of the subject property:

- The Tacoma Port Motor Inn at 3518 Pacific Highway E (adjacent north of the subject property) is listed on the RCRA Non-Generator/No Longer Required (NonGen/NLR) database. This listing is related to hazardous waste generated in the 1990s, and the site is not an active generator. Based on the listings, this site is not considered a REC to the subject property.
- Cummins NW Inc at 3701 Pacific Highway E (235 feet north of the subject property) is listed on the RCRA NonGen/NLR database. As noted above, this property previously had a release, and the site achieved a NFA status from Ecology in 2003. Based on the NFA status, this site is not considered a REC to the subject property.
- La Casa Real Drum at 3410 Pacific Highway E (adjacent west of the subject property) is listed on the RCRA NonGen/NLR database. A discussion regarding the neighboring property west is presented in Section 4.
- Glacier Motel Drug Bust at 3401 Pacific Highway E (450 feet northwest of the subject property) is listed on the RCRA NonGen/NLR database. The listing appears related to a historical drug bust of a CDL site in 1989. Based on the position and proximity, this site is not considered a REC to the subject property.

The EPA also regulates the management of hazardous waste at Transportation, Storage, and Disposal (TSD) facilities. Information contained in the EDR report indicates the subject property is not listed as a RCRA-TSD site. No RCRIS-TSD sites were identified within a half-mile of the subject property.

The remaining listed sites on the RCRIS list identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.2.5 ERNS List

The ERNS is a national database containing information from spill reports made to Federal authorities. Information contained in the EDR report indicates the subject property is not listed as an ERNS site.

3.1.2.6 US Brownfields List

The EPA's US Brownfields list identifies brownfields properties addressed by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a US Brownfields site. No US Brownfields sites were identified within 0.5 mile of the subject property.

3.1.3 EDR Databases

3.1.3.1 Manufactured Gas List

Former manufactured gas plant (coal gas) sites are identified on the Manufactured Gas database. Information contained in the EDR report indicates the subject property is not listed as a manufactured gas plant site. No manufactured gas plant sites are listed within one mile of the subject property.

3.1.3.2 Historical Auto Stations

Historical auto stations are identified on a proprietary database maintained by EDR. Information contained in the EDR report indicates the subject property is not listed as a historical auto station.

Two historical auto stations are listed within 0.125 mile of the subject property. Both appear to reference the same property:

- Gasamat Inc at 3402 Pacific Highway E and Sacs Mart Inc at 3408 Pacific Highway E (adjacent northwest of the subject property) are listed on the EDR Hist Auto database. The listing indicates the adjacent property was a gas station dating from at least 1977 through approximately 2010. Further discussion regarding the neighboring gasoline station is presented in Section 4.

3.1.3.3 Historical Cleaners

Historical cleaners are identified on a proprietary database maintained by EDR. Information contained in the EDR report indicates that there are no historical cleaner sites within 0.125 mile of the subject property.

3.1.4 Orphan Site List

Orphan sites are sites for which mapping information is not detailed adequately to plot the location of the site. There are six orphan sites listed in the EDR database. The orphan site list and available mapping information were reviewed by Parametrix. None of the orphan sites were found within 0.125 mile from the subject property and none represent RECs to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-13 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine whether vapor migration has, or has the potential to have, occurred at the site from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. Further details are presented in Section 4.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area that helps to identify the likelihood of past uses having led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include Sanborn Fire Insurance Maps, aerial photographs, topographic maps, city directories, and local agency records.

3.2.1 Sanborn Map Fire Insurance Map Review

A copy of the Certified Sanborn Map Report for the TDLE project area is included in Appendix C (EDR 2019). Maps were not available for the Fife RV Center (East Property) site.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs (aerials) of the subject property area were obtained from EDR. Additional aerials were reviewed available from the Pierce County GIS mapping program (2020) and the City of Tacoma GIS mapping program (2020). Aerial photographs for the years 1931, 1940, 1945, 1950, 1957, 1968, 1970, 1972-73, 1980, 1985, 1990, 1995, 2002, 2005, 2009, 2013, 2015, and 2018 were examined. Copies of the aerial photographs from EDR are included in Appendix D. Observations are listed below.

1931–1945	The subject property appears developed as farmland associated with a residential structure along 20th Street East (800 feet south of the subject property). Neighboring properties to the east and west are similarly developed as farmland. Neighboring properties north of Pacific Highway E appear developed with residences and small agricultural lots.

1950–1957	The subject property appears developed in a similar configuration. The neighboring property west appears to have a residence and garage/shop building and farmland.
1968	The subject property appears developed with a hotel and swimming pool. The neighboring property west appears undergoing redevelopment into a gasoline station. Interstate 5 appears complete adjacent south of the subject property.
1970–1980	The subject property remains developed with a hotel. The gas station remains adjacent west. The neighboring property north of Pacific Highway appears developed as a warehouse and storage lot.
1985	The subject property remains developed with a hotel. The gas station remains adjacent west. The neighboring property east is developed into an office building. The neighboring property adjacent north is developed into a motel.
1990–2012	The subject property remains developed with the hotel building. A new gasoline station and restaurant is developed adjacent northwest, and an RV sales building is developed adjacent west.
2013–present	The subject property appears developed in its current configuration. The southern portion of the motel building is demolished, and the site is used for RV sales/service. Minimal changes are apparent to adjacent properties.

3.2.3 Historical Topographic Maps

Historical topographic maps of the subject property area were reviewed from the U.S. Geological Survey. The subject property is located on the Tacoma south 7.5-minute Quadrangle. Maps were available for years 1941, 1961, 1997, 2011, 2014, 2017, and 2020. Observations are listed below.

1941–1961	The subject property appears as rural land with some nearby buildings. Interstate 5 appears in 1961 south of the subject property.
1997	The subject property appears developed with a motel building.
2011–2020	No details of the subject property are presented on the topographic maps.

3.2.4 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.4.1 City of Fife Records

City of Fife records indicate the subject property was incorporated into the city in 1957. Parametrix reviewed online permit records available from the City of Fife (City of Fife 2020). Copies of available

records are included in Appendix F. Below is a summary of the available online permits with potential environmental significance or historical use:

- **1997**: Occupied by Hometel Inn
- **1997:** A methamphetamine lab is reported in room 133
- **2006:** Operated as a Korum outdoor sales lot
- **2010:** Construction of RV sales lot
- **2012:** Demolition of the southern portion of the motel building
- **2012:** Construction of a canopy over an oil-water separator to create an RV wash

3.2.4.2 City of Tacoma Records

The City of Tacoma provides water and sewer services to the subject property through the City of Fife. As noted above, an oil-water separator is operated on the subject property. Parametrix reviewed City of Tacoma records for participation of the subject property within the industrial wastewater pretreatment program (City of Tacoma 2020). The subject property was not listed as participating in the program. This may indicate the site is operating the oil-water separator and wash pad without the proper permitting or compliance with local discharge regulations. However, this could not be confirmed. The presence and operation of a wash pad on the subject property and potential permitting issues is of some environmental concern.

3.2.4.3 Tacoma Public Library

The Tacoma Public Library Northwest Room has online databases for historical photographs and a historical building index. Copies of the records are attached in Appendix F. These databases include:

- The historical building index indicates the subject property was developed with a Holiday Inn hotel-motel complex in 1964.
- Historical images from 1964 and 1969 show the subject property developed with the Holiday Inn complex.

3.2.5 Prior Assessment Information

As discussed in Section 4 below, a prior Phase I ESA was completed on the subject property. City of Fife directory information for the subject property was reviewed in the prior assessment and summarized below:

- 1975 – Subject property occupied by the Holiday Inn Motel, residence at 3508 Pacific Highway E, Gasamat Inc service station at 3402 Pacific Highway E, Justus Custom Cedar Homes at 3718 Pacific Highway E.
- 1980 – Subject property occupied by the Holiday Inn Motel, vacant at 3508 Pacific Highway E, Gasamat Inc service station at 3402 Pacific Highway E, Justus Custom Cedar Homes at 3718 Pacific Highway E.
- 1990 – Subject property not listed, Serra Tile Co. Inc at 3508 Pacific Highway E, Port of Tacoma Motor Inn at 3518 Pacific Highway E, La Casa Real Restaurant at 3410 Pacific Highway E, SAC's Deli

and Grocery Gas Station at 3408 Pacific Highway E, Jack in the Box at 3402 Pacific Highway E, Trans-Pacific Trade Center office building at 3700 Pacific Highway E.

- 1994 – Subject property occupied by Hometel Inn Motel and Jewel of India Restaurant, Serra Tile Co. Inc at 3508 Pacific Highway E, Econo Lodge motel at 3518 Pacific Highway E, La Casa Real Restaurant at 3410 Pacific Highway E, SAC's Deli and Grocery Gas Station at 3408 Pacific Highway E, Jack in the Box at 3402 Pacific Highway E, Trans-Pacific Trade Center office building at 3700 Pacific Highway E.

3.2.6 Summary of Historical Information

Based on the historical review, the subject property was primarily used as farmland until development of a Holiday Inn motel in 1964. The site was operated as a Holiday Inn through the 1980s, then as the Hometel Inn through at least 2002. The site was used as a Korum outdoor sales lot in 2006 and as a Fife RV sales lot from 2010 through the present.

The surrounding area was predominantly farmland through the 1950s. The neighboring property west appeared as an agricultural garage/shop in the 1950s. In the 1960s, Interstate 5 was developed adjacent south of the subject property. Following completion of the interstate, neighboring properties began redeveloping into commercial developments, including shipping warehouses, office buildings, restaurants, gasoline stations, and motels.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the building (constructed in 1964), there is potential for asbestos-containing materials to have been used in the construction of the building.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the building (constructed in 1964), there is potential for LBP to have been used in the construction of the building.

3.3.3 Polychlorinated Biphenyls (PCBs)

Transformers can potentially contain polychlorinated biphenyls (PCBs). Based on the age of the building, there is some potential for PCBs to have been used in the construction of the building (PCBs are primarily used in lighting and electrical equipment). However, Parametrix did not inspect the building interior for this assessment.

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors, such as the concentration of the gas, and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

The subject property is located in the Federal EPA Radon Zone 3. The Zone 3 indoor average radon level, predicted to be less than 2 pCi/L (picocuries per liter), is reported as a low risk of radon elevation. The EPA Action Level for radon is 4 pCi/L. Based on this limited information, radon likely does not represent an environmental concern at the property.

4. FILE REVIEW

In accordance with ASTM Standard E1527-13, inquiries and review of previous investigations for the subject property, and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties, and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below. Copies of Ecology records are attached in Appendix F.

4.1 Subject Property

Based on regulatory information from Ecology, past records were reviewed for the subject property listed as the Hometel Inn as Ecology Cleanup Site Identification number 4697. Records within the Ecology file related to the site listings include:

- A 2002 Phase I ESA of the subject property (NVL Labs 2002)
- A 2004 Phase II ESA of the subject property and adjacent property west (Robinson, Noble & Saltbush, Inc. 2004)
- A 2004 Phase II ESA of the subject property (EHC 2004a)
- A 2004 Groundwater Well Installation and Monitoring Report (EHC 2004b)
- Ecology Toxics Cleanup Program (TCP) and VCP correspondence from 2004 to 2011

In 2002, NVL Labs conducted a Phase I ESA of the subject property and identified no historical impacts to the subject property from on-site sources; however, a Phase II ESA was recommended due to potential off-site sources. At the time of the Phase I ESA, the subject property was operated as the Hometel Inn. The Phase I ESA indicated the clandestine drug labs on the subject property were previously remediated at the Hometel Inn. This indicates the CDL listings represent an HREC for the site.

In 2004, Robinson, Noble & Saltbush conducted a Phase II ESA of the subject property and adjacent property west for the Puyallup Tribe of Indians for a potential property acquisition. Four of the boreholes for the Phase II ESA were placed on the subject property (B6, B7, B8, and B9). No gasoline, diesel, oil, benzene, toluene, ethylbenzene, or xylenes were detected in any of the samples from the subject property. Low levels of lead and chromium were reported in the soil samples below the subject property at levels below the MTCA Method A CULs. Groundwater from Borehole B9 was found above MTCA Method A CULs for lead, chromium, and arsenic. Groundwater from Boreholes B7 and B8 were similarly found above MTCA Method A CULs for chromium and arsenic. Due to the exceedances, the report recommended installation of groundwater monitoring wells.

To confirm the results of the initial Phase II ESA, Environmental Hazard Control (EHC) completed a series of six boreholes on the subject property to collect soil and groundwater samples. Five groundwater samples were collected, and all five samples were reported above the MTCA Method A CUL for arsenic of 5 µg/L (micrograms per liter). No other metals were found above MTCA Method A CULs. The report concluded that the concentrations of metals in groundwater below the site are likely related to area-wide contamination associated with two potential sources including the Asarco Smelter Plume and historical farming activities.

EHC supervised the installation of four monitoring wells on the subject property and performed a round of quarterly groundwater sampling for total and dissolved arsenic. All four wells were found above MTCA Method A CULs for arsenic in the total metals analysis. However, all four samples that were analyzed for dissolved arsenic were found below detection levels.

The site was subsequently entered into Ecology's VCP. In 2005, Ecology completed an opinion indicating further remedial actions or investigations were necessary to achieve an NFA determination from Ecology with respect to the metals in groundwater below the subject property (Ecology 2005). The letter cites the potential for off-site sources and area-wide contamination that would need to be evaluated to achieve property cleanup. In 2011, due to inactivity related to the characterization of the subject property, the site was removed from Ecology's VCP (Ecology 2011).

Another nearby listed property (H&H Properties vacant lot at 3309 Pacific Highway E, 670 feet northeast of the subject property) is listed on the CSCSL database solely related to elevated metals in groundwater discovered in 2017. The H&H properties report (Environmental Associates 2017) also cites area-wide groundwater contamination related to the metals results as the source for that site. Metals in groundwater were similarly reported above MTCA CULs on the adjacent property west in the 2004 Phase II ESA.

The total metals in groundwater below the subject property represent a REC impacting the subject property; however, there are no drinking water wells on or near the subject property, and water is supplied by the City of Fife. Additionally, dissolved arsenic results were reported below Method A CULs during the EHC monitoring-well investigation. The metals in groundwater appear to be the result of area-wide contamination and not related to historical use of the subject property.

4.2 Adjacent Properties File Review

Several nearby properties were listed on environmental databases, as described in Section 3. In general, sufficient site-specific information was available through review of the EDR report as well as online Ecology files to develop an opinion on the potential for these properties to have affected the subject property. However, further information was obtained for one property immediately adjacent to the west (La Casa Real Drum/Fife RV).

Ecology files for the La Casa Real Drum/Fife RV site at 3410 Pacific Highway E were reviewed which include:

- A 2004 Phase II ESA of the subject property and La Casa Real Drum/Fife RV site (Robinson, Noble & Saltbush, Inc. 2004)
- 2016 Remedial Excavation Report for the Fife RV Center (Aerotech Environmental 2016)
- 2017 Ecology VCP Acceptance and Further Action Letter for the Fife RV Center (Ecology 2017)
- 2018 Downgradient Groundwater Monitoring Well Installation Report for the Fife RV Center (Aerotech Environmental Consulting 2018)
- 2018 Remedial Investigation Report for the Fife RV Center (Aerotech Environmental 2018)
- 2016–2019 Quarterly Groundwater Monitoring Reports for Fife RV Center (Aerotech Environmental Consulting)

The information in the available files indicate in 2004, Robinson Noble & Saltbush Inc. completed five boreholes on the adjacent property (and four on the subject property, described above). Gasoline and benzene were found above MTCA Method A CULs in soil from one location, B1, located on the northwest side of the Fife RV Center property. Additionally, gasoline, benzene, and ethylbenzene were found above MTCA Method A CULs in groundwater in the same borehole.

In 2013, Associated Earth Sciences, Inc. conducted a Phase II ESA of the adjacent Fife RV Center and identified gasoline and benzene, toluene, ethylbenzene, and xylene above MTCA Method A CULs in soil and groundwater. In 2016, Aerotech Environmental Consulting (Aerotech) supervised the excavation and removal of approximately 1,685 tons of petroleum contaminated soil from the northwest side of the La Casa/Fife RV Center site in a series of five excavations. Petroleum hydrocarbons remained above MTCA Method A CULs on the sidewalls of the excavation and below site utilities that were not excavated. Oxygen Release Compound -Advanced was mixed into the backfill for treatment of remaining contaminants.

From 2016 through 2018, Aerotech completed quarterly monitoring and a remedial investigation of the neighboring site. Monitoring wells closest to the subject property showed no impact from petroleum hydrocarbons with the groundwater gradient trending away from the subject property.

Based on the information within available Ecology files, the neighboring property west, La Casa Real Drum/Fife RV Center, has unresolved RECs related to the historical release of petroleum hydrocarbons related to a former gasoline station. The groundwater gradient observed for the neighboring site is southwesterly and away from the subject property. Monitoring wells near the subject property are non-detect for petroleum hydrocarbons. Vapor migration is anticipated to mirror the soil and groundwater plumes. Therefore, the release on the adjacent property does not appear to represent a REC to the subject property.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on November 20, 2020. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site examination are included in Appendix E.

5.1 Subject Property

The subject property is developed with a former motel building being used as an RV parts and repair facility. The building is situated on the northern central portion of the subject property and is surrounded by an asphalt parking lot. RVs awaiting repair and those for sale are parked across the lot.

No RECs were specifically observed from the right-of-way. The rear of the property was viewed from Interstate 5 and was primarily RV storage and canopies. As noted above, one of the canopies is constructed over an oil-water separator and used for vehicle washing. Aerial photographs suggest the oil-water separator is located on the eastern side of the building. Based on the use of the property, small quantities of petroleum products and other hazardous substances are likely used and stored on the subject property.

5.2 Adjacent Properties

The neighboring property north is developed with a Travelodge motel. The neighboring property east is developed with a three-story office building for the Puyallup Tribe of Indians. Interstate 5 borders the subject property to the south. The Fife RV Center borders the subject property to the west. A Tahoma Express gasoline station and Jack in the Box Restaurant are northwest of the Fife RV Center.

No RECs were specifically observed on neighboring properties with potential to impact the subject property.

6. INTERVIEWS

An interview was not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-13.

A user questionnaire was submitted to Sound Transit to assist in identifying potential RECs affecting the site and identification of background information on the subject property. A copy of the user questionnaire completed by Sound Transit is attached in Appendix A.

Parametrix conducted an interview with Rob Olsen, Environmental Health Specialist of the Tacoma-Pierce County Health Department Environmental Health – Contaminated Properties division, on February 4, 2021 (TPCHD 2021). Mr. Olsen indicated the TPCHD does not have files related to the metals found in groundwater below the subject property. Mr. Olsen indicated the TPCHD's files related to the neighboring property west (La Casa Real Drum) were closed in 2017.

7. CONCLUSIONS

Parametrix conducted a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E 1527-13. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located at 3520 Pacific Highway E in Fife, Washington, on Pierce County Parcel Identification number 0320111049 (Figure 1). The subject property is currently owned by KS Family, LLC, and operated as the Fife RV Center East Property, which encompasses the parts and repair department.

The subject property was primarily used as farmland until development of a Holiday Inn motel in 1964. The site was operated as a Holiday Inn through the 1980s and then as the Hometel Inn through at least 2002. The site was used as a Korum outdoor sales lot in 2006 and as a Fife RV sales lot from 2010 through the present. Records indicate an oil-water separator and RV wash pad have been operated on the subject property from at least 2012 through the present. The presence and operation of a wash pad and oil/water separator on the subject property is of some environmental concern but likely represents *de minimis* conditions assuming proper operation and maintenance.

A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases, including the adjacent property to the west (La Casa Real Drum/Fife RV Center), which has an unresolved petroleum release related to a historical gasoline station. Based on the groundwater gradient away from the subject property, soil, groundwater, and vapor contamination from the neighboring release is not expected to have impacted the subject property (Figure 2). No other listed sites are suspected to have impacted the subject property.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property, except for the following:

Recognized Environmental Conditions

The subject property is listed on the Ecology CSCSL database, Ecology VCP database, ALLSITES database, and WA HIST CDL database. The listings are primarily related to metals discovered in groundwater during previous Phase II ESAs. Total arsenic, chromium, and lead are suspected to continue to remain above Model Toxics Control Act (MTCA) Method A cleanup levels (CULs) below the subject property, appearing to be related to area-wide contamination from the Asarco Smelter plume, historical farming activities, or naturally occurring background concentrations. However, dissolved metals concentrations below the property were reported below MTCA Method A CULs in four groundwater monitoring wells. The presence of total metals in groundwater are considered a REC to the subject property. The clandestine drug lab listings for the site were previously resolved representing an HREC for the site.

Data Gaps

An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with American Society for Testing and Materials Standard (ASTM) E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

MEMORANDUM OF LEASE

Grantor: (1) KS Family, LLC

Grantee: (1) Fife RV & Auto Center, Inc.

Abbreviated Legal: Ptn of NE 1/4 of the NE 1/4 of Sect. 11, Township 20 N, R 3 E, W.M.

Tax Parcel No.: 032011-104-9

THIS INDENTURE made and entered into this 23rd day of August, 2013, by and between KS Family, LLC, a Washington limited liability company, hereinafter called "Lessor", and Fife RV & Auto Center, Inc., a Washington corporation, hereinafter called "Lessee".

WITNESSETH

That for the term and upon the terms and conditions set forth in the Lease Agreement dated January 10, 2013 (including any amendments or addendums thereto), and which commenced on February 1, 2013 from the Lessor to Lessee, the Lessor has leased, demised and let, and does hereby lease, demise and let unto Lessee its interest in the following described real property:

SEE EXHIBIT "A" ATTACHED HERETO AND BY THIS REFERENCE INCORPORATED HEREIN.

The lease, including options to renew or extend, is for a term of twenty one (21) years commencing on February 1, 2013 and terminating on January 31, 2034.

The lease is subordinate, in all respects and without qualification whatsoever, to the Deed of Trust of even date herewith granted by Lessor to Ameritrust CDC (and subsequently assigned to the United States Small Business Administration) to secure a loan in the amount of Six Hundred Ninety Thousand and 00/100 Dollars ($690,000.00) as referenced in that certain U.S. Small Business Administration Authorization for Debenture Guarantee (SBA 504 Loan), Loan No. 53847550-05 (as amended).

In witness thereof, the parties hereto have caused their respective names to be hereto subscribed as of the day and year first above written.

I certify that I know or have satisfactory evidence that **Kevin Carl** is the person who signed this instrument and acknowledged it as the **President** of **Fife RV & Auto Center, Inc.**, a Washington corporation, to be the free and voluntary act of such entity for the uses and purposes mentioned in the instrument.

DATED this 23rd day of August, 2013.

Peter A. Deming
NOTARY PUBLIC in and for the State
of Washington, residing at Kent.
My appointment expires: May 7, 2016

EXHIBIT "A"
LEGAL DESCRIPTION

Beginning at the Northeast corner of the West 30 acres of the Northeast quarter of the Northeast quarter of Section 11, Township 20 North, Range 3 East, W.M.;
THENCE South along the East line of said West 30 acres to the North line of property condemned by United States of America for PSH #1 by U.S.D.C. Cause No. 2549;
THENCE Westerly and Northerly along said North line of said Condemned property and the North line of property conveyed to the State of Washington for PSH #1 by Deed recorded under Recording No. 1896305 to a point 322.50 feet South of the North line of said Northeast quarter of the Northeast quarter;
THENCE Easterly on a line parallel with the North line of said Northeast quarter of the Northeast quarter, a distance of approximately 237.83 feet to the Easterly line of the West 15 acres of the Northeast quarter of the Northeast quarter of said Section 11;
THENCE North along said East line of the West 15 acres a distance of approximately 322.50 feet to the North line of said Northeast quarter of the Northeast quarter of Section 11;
THENCE Easterly along said North line, a distance of approximately 495 feet to the Point of Beginning, in Pierce County, Washington;
EXCEPT the following described property:
Commencing at the Northwest corner of the Northeast quarter of the Northeast quarter of Section 11, Township 20 North, Range 3 East, W.M.;
THENCE South 88°02'46" East along the North line of said Subdivision, a division of 332.10 feet;
THENCE South 00°55'45" West, parallel to the East line of the 15 acres of said Subdivision, a distance of 137.55 feet;
THENCE South 88°02'46" East parallel to the North line of said Subdivision, a distance of 163.00 feet to the Easterly line of the West 15 acres of said Subdivision and the True Point of Beginning;
THENCE continuing South 88°02'46" East a distance of 65.00 feet;
THENCE South 03°39'20" West a distance of 329.63 feet to the Northerly line of the property condemned by the United States of America for PHS #1 by U.S.D.C. Cause No. 2549;
THENCE Westerly and Northerly along said North line of said Condemned property and the North line of property conveyed to the State of Washington for PSH #1 by Deed recorded under Recording No. 1896305, the following three courses and distances:
North 76°51'45" West, 117.35 feet;
THENCE around a curve to the right, the center of which bears North 13°08'15" East having a central angle of 39°17'30", a radius of 309.00 feet, an arc distance of 212.11;
THENCE North 37°34'15" West along the Northeasterly right of way margin a distance of 4.21 feet to an extension of a line 322.50 feet South of and parallel to the North line of said Subdivision;
THENCE South 88°02'46" East along a line 322.50 feet South of and parallel to the North line of said Subdivision, a distance of 237.83 feet to the East line of the West 15 acres of said Subdivision;
THENCE North 00°55'45" East along the East line of the West 15 acres of said Subdivision, 185.00 feet to the True Point of Beginning;
TOGETHER WITH an easement for ingress and egress as contained in reservation of easement recorded April 1, 1992 under Recording No. 9204010552, in Pierce County, Washington.
SITUATE in the County of Pierce, State of Washington

Project Number: ***AE 0030-17***

ASTM 1527-13 USER QUESTIONS

ASTM 1527-13 includes a user questionnaire that must be completed by the user in order to qualify for Landowner Liability Protections (LLPs) under CERCLA. The following questions are to be completed by the user or representatives of the user.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   ___No_____
2. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   ___No_____
3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties?
   ___No_____
4. For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ___No_____
5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ___I am not aware of the purchase price. _____
6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? __No_____

   For example, as user,

   (a) do you know the past uses of the property?
   __No_____
   (b) do you know of specific chemicals that are present or once were present at the property?
   __No_____
   (c) do you know of spills or other chemical releases that have taken place at the property?
   __No_____
   (d) do you know of any environmental cleanups that have taken place at the property?
   __No_____

7. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property?
   ____No_____

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
DAUPHIN SITE Site ID: 1000847 EPA Id: WAD980514566	2911 PACIFIC HWY E	WNW 1/4 - 1/2 (0.368 mi.)	V100	1081

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

PM TESTING LAB INC P EPA ID:: WAH000006213	***3921 PACIFIC HWY E***	***ENE 1/8 - 1/4 (0.191 mi.)***	***H41***	***309***

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 29 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there are 2 WA SWF/LF sites within approximately 0.5 miles of the target property.

WA PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the WA PTAP list, as provided by EDR, and dated 05/12/2020 has revealed that there are 3 WA PTAP sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/13/2020 has revealed that there are 11 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

WA SPILLS: Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

A review of the WA SPILLS list, as provided by EDR, and dated 06/08/2020 has revealed that there is 1 WA SPILLS site within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that

there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110070566023

Click Here:

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air

PAPE MACHINERY TACOMA (Continued) **1001969539**

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a

GERBER COLLISION & GLASS (Continued) **1001969749**

means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	D040
Waste Description:	TRICHLORETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ABRA AUTO BODY AND GLASS FIFE (Continued) **1000891883**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D010
Waste Description: SELENIUM

PM TESTING LAB INC PACIFIC HWY (Continued) **1001234205**

Waste Code: D011
Waste Description: SILVER

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Process Type: Voluntary Cleanup Program
Cleanup Unit Name: FLYING J TRAVEL PLAZA,LOVE'S TRAVEL STOP # 448,LOVES TRAVEL STOPS 448
Response Section: Southwest
Release Date: 04/06/1992
Lust Date: 09/15/1995
Region: Southwest
Lust ID: 1763
UST ID: 97690
Contaminant Name: Benzene
Ground Water: Confirmed Above Cleanup Levels
Surface Water: Not reported
Soil: Confirmed Above Cleanup Levels
Sediment: Not reported
Air: Not reported
Bedrock: Not reported
Lat/Long: 47.2451207 / -122.38489

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D018
Waste Description: BENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D018
Waste Description:	BENZENE

PROGRESS RAIL SERVICES (Continued) **1000105883**

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
