# CITATION

Sound Transit. 2021. Phase I Environmental Site Assessment  
TD 4461, TD 4476, TD 4506 Freighthouse Square  
2501 East D Street and 602 E 25th Street Tacoma, WA.  
Prepared by Parametrix, Seattle, Washington.  
March 2021.

## CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

Parametrix conducted a Phase I Environmental Site Assessment (ESA) for the Tacoma Dome Link Extension (TDLE) project in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as Tacoma Dome (TD) properties TD 4461, TD 4476, and TD 4505. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located on Pierce County Tax Lots 2075240013, 2075240011, and 2075220021 and is currently occupied by a number of commercial businesses and a passenger rail station. The subject property encompasses an area of approximately 1.6 acres and is zoned for mixed use. The subject property consists of a 54,916-square-foot building.

The first known development on the subject property was in the 1880s with isolated residences. By 1912, the freight house that still stands on the property was constructed. The subject property remained the same until a structure was added to on the east end by 1957. No significant changes were made to the subject property between 1957 and the present. However, a fire in 1992 destroyed the eastern portion of the building and was reconstructed. Surrounding land use has remained commercial and industrial. The rail station construction on the west end occurred in 2016.

No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property during site reconnaissance. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property except for the following:

### **Recognized Environmental Conditions**

The subject property is listed in both the Confirmed and Suspected Cleanup Site List (CSCSL) and CSCSL No Further Action (NFA) database. Contamination, likely originating from the former Olympic Ice and Machine Company, resulted in soil and groundwater impacts at the subject property. Diesel and oil-range hydrocarbons, polycyclic aromatic hydrocarbons (PAHs), and metals have been detected in soil and groundwater. Cleanup levels were exceeded for carcinogenic PAHs (cPAHs) and oil-range hydrocarbons in soil. Diesel and arsenic exceeded cleanup levels in groundwater. The site received a conditional NFA in 2003 with the implementation of a restrictive covenant that dictates groundwater and land use at the site. The presence of residual soil and groundwater contamination at the subject property represents a controlled REC (CREC).

### **Data Gaps**

An on-site reconnaissance and interview were not able to be conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

# 1. INTRODUCTION

Parametrix was retained by Sound Transit to conduct a Phase I Environmental Site Assessment (ESA) on the site located at 2501 East D Street and 602 E 25th Street in Tacoma, Washington (herein referred to as the subject property; see Figure 1), as part of the Tacoma Dome Light Rail Extension (TDLE) project. The subject property includes Pierce County parcels 2075240013, 2075240011, and 2075220021 (TDLE parcel IDs TD 4461, TD 4476, and TD 4506, respectively). The subject property, known as Freighthouse Square, is a former train station currently housing commercial properties. The Phase I ESA was conducted to support environmental due diligence related to potential acquisition of the property associated with the TDLE project.

The subject property encompasses approximately 1.6 acres and includes a single structure (a former railway station) that houses a number of commercial businesses as well as the Tacoma Dome Station for the Amtrak Sounder rail line. The structure was constructed in 1909 and is 54,916 square feet in size. The boundaries of the subject property are shown in Figure 2.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available) and (2) a site examination. Conclusions and recommendations in this report are based solely on observed evidence and data collected during the performance of this assessment.

## 1.1 Purpose

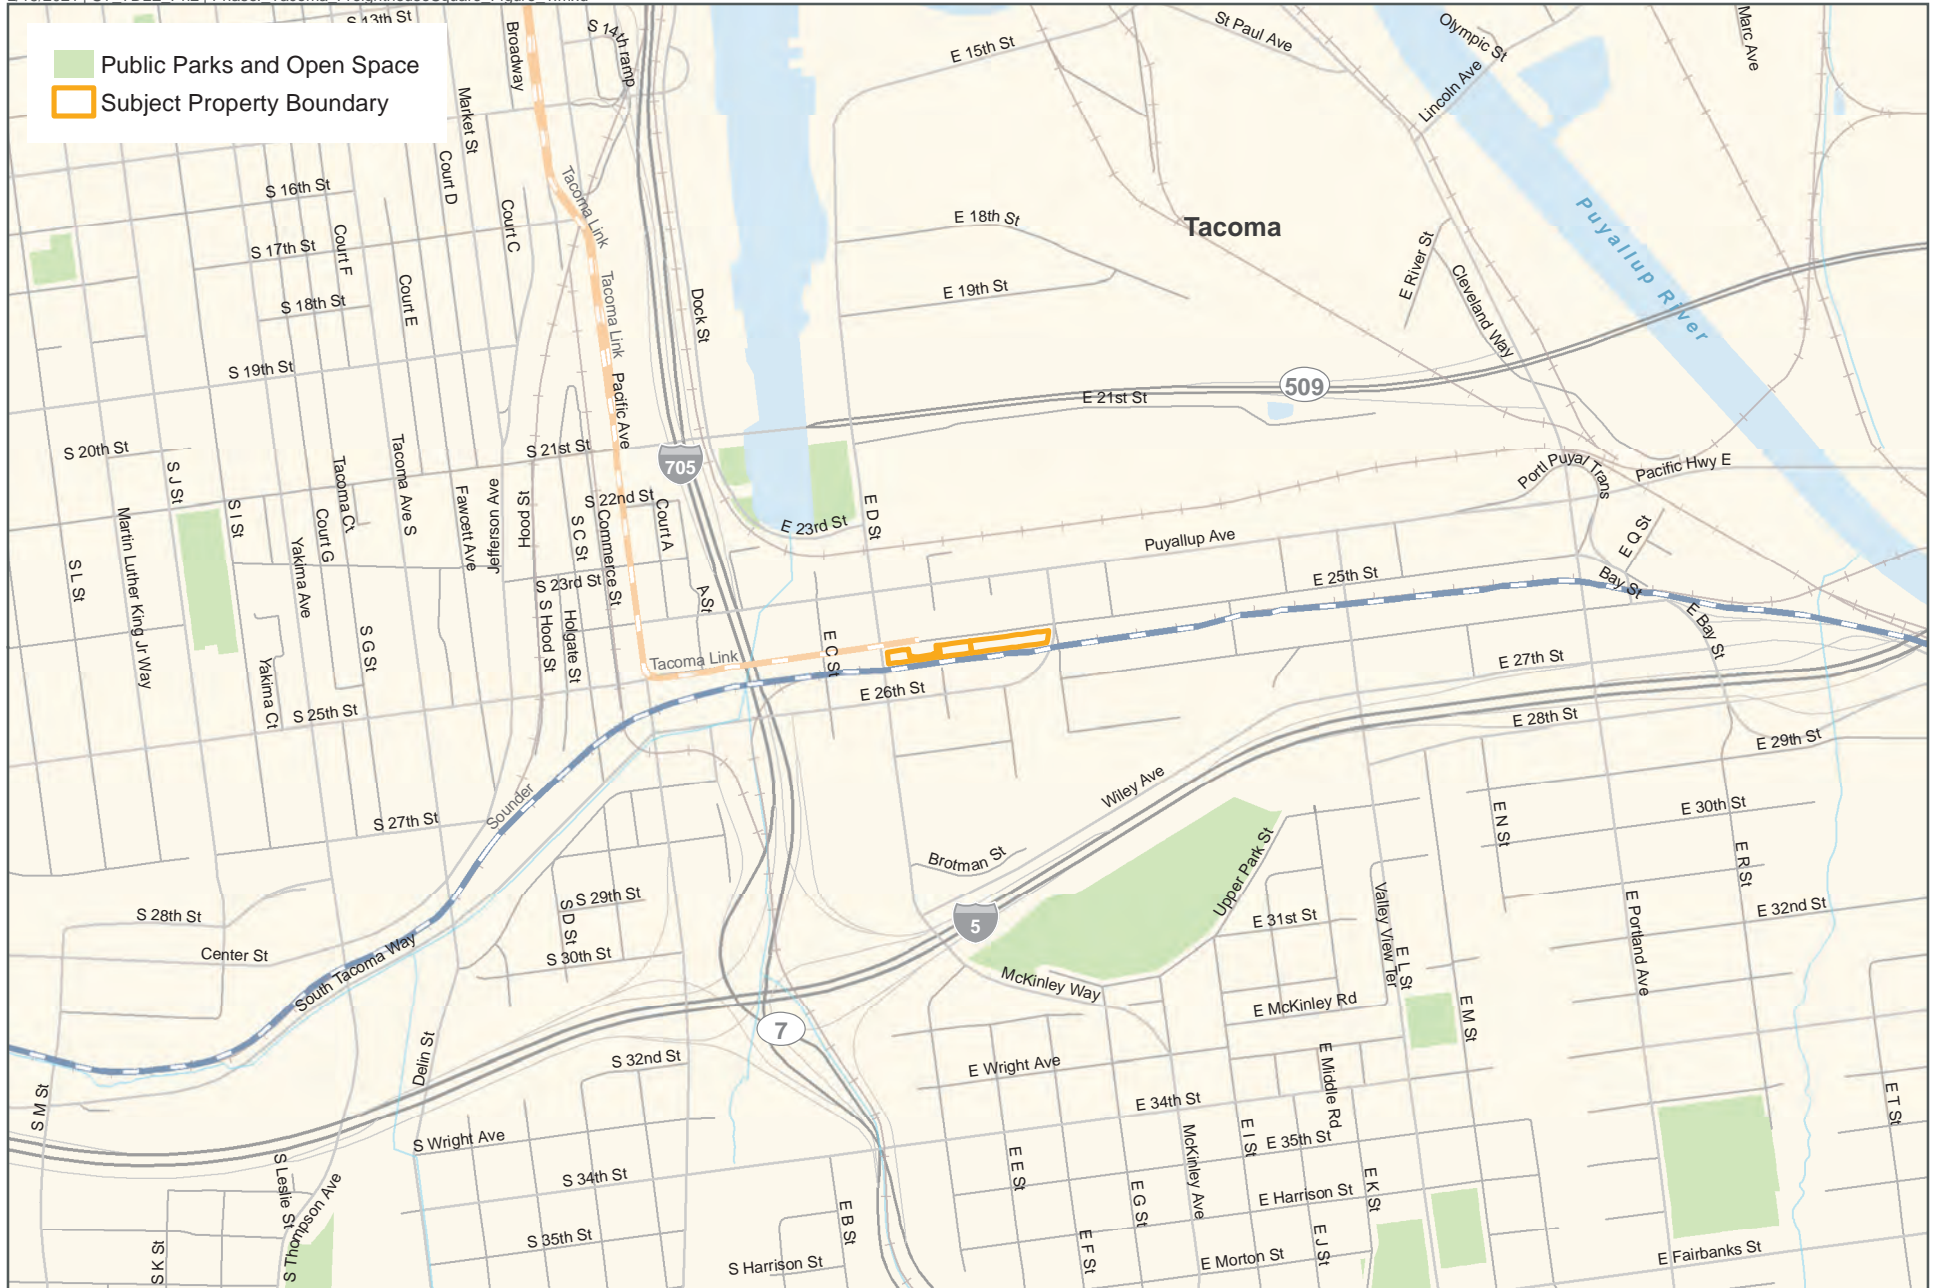

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study. The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and, as such, constitutes “all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice” as defined by 42 United States Code (USC) §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term Recognized Environmental Conditions is defined in ASTM Standard E1527-13 as:

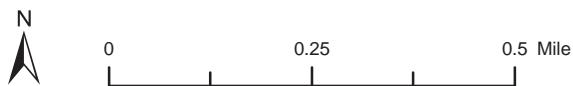

“...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a threat of a future *release* to the environment. *De minimis conditions* are not *recognized environmental conditions*.”

In accordance with ASTM Standard E1527-13, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

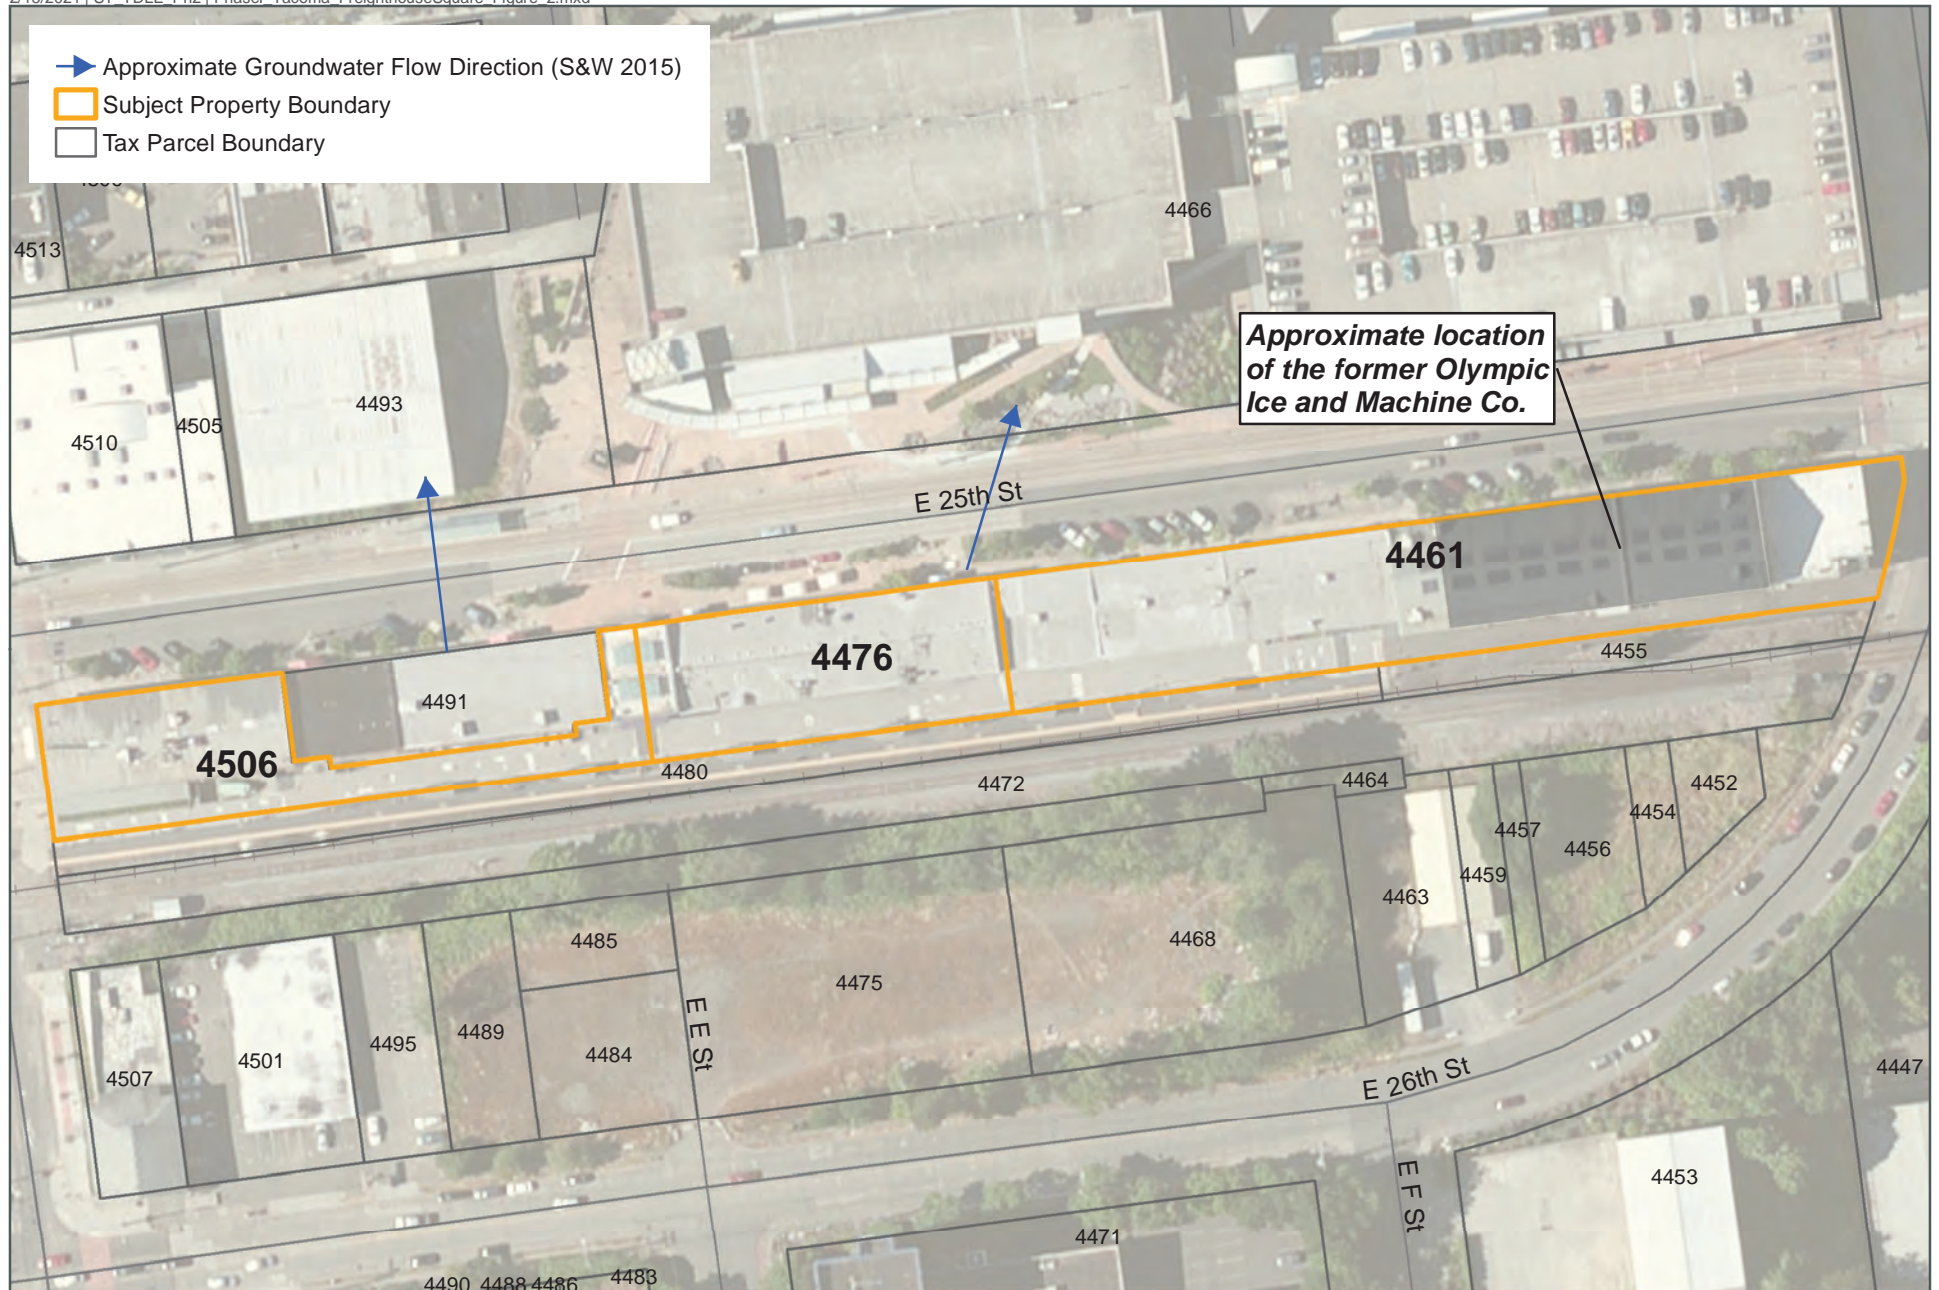

Data Sources: EDR, King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2019).

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

**FIGURE 2**

Site Map

Freighthouse Square

2501 East D Street and 602 E 25th Street, Tacoma, WA

Tacoma Dome Link Extension

An HREC is defined as:

*“...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.”*

A CREC is defined as:

*“...a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.”*

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

## 1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property on foot. No visual reconnaissance was possible inside the buildings on the subject property. Unless otherwise stated, no exceptions to the guidelines presented in ASTM E1527-13 were made during completion of this Phase I ESA.

## 1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site but were not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff
- Contacts and discussions with regulatory agencies and others
- Review of available hazardous substance or solid waste lists
- Opinions and judgments of Parametrix based on the information available

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

## 2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

### 2.1 Location

The subject property is located at 2501 East D Street and 602 E 25th Street in Tacoma, Washington. It is a 1.6 acre property bounded by East 25th Street and the Burlington Northern Santa Fe (BNSF) railroad tracks to the north and south, respectively, and by East D Street and East G Street to the west and east, respectively. According to the Pierce County Assessment Office, Time in Space LLC is the current owner of the subject property. The subject property includes Pierce County parcels 2075240013, 2075240011, and 2075220021 (TDLE parcel IDs TD 4461, TD 4476, and TD 4506, respectively). The site location is shown on Figure 1. The boundaries of the subject property and project construction footprint are shown on Figure 2.

### 2.2 Site and Vicinity Characteristics

The subject property includes a former railroad warehouse and office (54,916 square feet, built in 1909). The building currently houses a number of commercial businesses, including shops and restaurants as well as a station for the Amtrak Sounder rail line.

The vicinity of the subject property is developed for industrial and commercial uses. Properties in the direct vicinity include Tacoma Dome Station parking garages to the north, BNSF tracks to the south, Sluggo Brewing and HJB Marine to the south across the railroad tracks, and a parking lot to the west (Figure 2).

### 2.3 Physical Setting

The subject property is at an elevation of approximately 55 feet above mean sea level. The topography of the site gently slopes northeasterly towards the Puyallup River and Puyallup basin (USGS 2020). Soils in the area of the subject property are mapped as Alderwood gravelly sandy loam by the U.S. Department of Agriculture (USDA 1955). These are described as moderately well drained. Made land is mapped just north of the Puyallup Avenue, near the subject property. The made land is dredged material that was deposited artificially over marshy tideflats for grading.

The surface geology of the subject property is mapped as Quaternary Vashon recessional outwash ice contact deposits and Quaternary pre-Fraser age coarse-grained deposits. These are described as sand and gravel to silty sand and gravel with some clay portions. These deposits generally have a high porosity and permeability.

The site is underlain by artificial fill. Groundwater at the site is found at a depth of approximately 15 to 20 feet below ground surface. The groundwater flow direction below the subject property is primarily to the north (Shannon & Wilson 2015).

The nearest surface water body is the Thea Foss Waterway located 1,700 feet northwest of the subject property. The Puyallup River is located 3,800 feet northeast of the subject property.

## **2.4 Current Use of the Property**

The subject property currently houses a number of commercial businesses, including shops and restaurants, as well as the Tacoma Dome station for the Amtrak Sounder rail line. Access to commercial businesses and the rail station is from the north side of the building, and the rail tracks lie along the south side of the building. Zoning for all three parcels of the subject property is listed as Downtown Mixed Use (DMU).

## **2.5 Descriptions of Improvements on the Subject Property**

Based on Pierce County property assessment records, the subject property includes 1.6 acres with a single structure originally constructed in 1909, and it is 54,916 square feet in size. An addition was constructed on the east side of the structure in 1956. The passenger rail station was constructed in the east end of the structure in 2016. The interior of the building is currently divided into a number of commercial spaces. The exterior of the building is finished with sidewalks and other hardscaping. Local records indicate that electricity, gas, water, and sanitary sewer are provided by local utilities.

## **2.6 Environmental Liens**

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. Based on information from King County records and the interview with the site manager, environmental liens do not appear to exist against the subject property. No evidence of environmental liens was identified during the Phase I ESA process.

### 3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: 1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and 2) a compilation of historical uses of the subject property and site vicinity properties to determine whether past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by Environmental Data Resources (EDR). The EDR Radius Map Report (EDR report) is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix B. Historical information is based on review of historical Sanborn Fire Insurance Maps (Appendix C) and aerial photographs (Appendix D).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing Tacoma-Pierce County Health Department personnel, by making observations during the site examination or by additional detailed investigation of available records.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

#### 3.1 Standard Environmental Record Sources

The following section summarizes information collected from database records maintained by the U.S. Environmental Protection Agency (EPA) and Ecology. The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR report (Appendix B). Only standard and key additional databases are listed below. Parametrix reviewed the information in the EDR report to screen properties in the vicinity of the subject property for sites with potential to impact the subject property. The screening process involved reviewing the types of listings, types of contaminants, proximity and position relative to the subject property, topography, and groundwater gradient. Listings for sites found in the standard environmental records sources that could not be screened to verify potential impacts to the subject property were further evaluated by file reviews (see Section 4).

##### 3.1.1 Review of Washington State Department of Ecology Databases

The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List

- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)
- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists
- Brownfields

### 3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database.

Information contained in the EDR report indicates that the subject property is not listed as a UST site. Nineteen additional UST sites were identified within 0.25 mile of the subject property. Of those nineteen, twelve are in close proximity (0.125 mile) to the subject property:

- F&E Investments site (401 E 25th Street) is located approximately 100 feet north of the subject property. The site is reported to have had one tank that was removed in February 2020.
- Gary W Johnson site (323 E 26th Street) is located approximately 200 feet south of the subject property. The site is reported to have had one tank that was removed in February 2020.
- Spring Air NW site (725 E 25th Street) is located approximately 250 feet east of the subject property. The site is reported to have had one tank that was removed. This site is discussed in more detail in Sections 3.1.1.2 and 3.1.1.3.
- Don Engle Distributing site (2601 East F Street) is located approximately 340 feet south of the subject property. This site is reported to have had two tanks that were removed.
- Western Beer Distributors Inc site (712 E 26th Street) is approximately 360 feet southeast of the subject property. This site is reported to have one tank that was removed. This site is discussed in more detail in Section 3.1.1.3.
- Manna Pro Corp site (518 Puyallup Ave) is located approximately 370 feet north of the subject property. This site is reported to have three tanks that are in the process of closure. This site is discussed in more detail in Section 3.1.1.3.
- Discovery site (502 Puyallup Ave) is located approximate 370 feet north of the subject property. This site is reported to have one tank that is in the process of being closed.
- Salvation Army ARC site (409 Puyallup Ave) is located approximately 450 feet north of the subject property. The site is reported to have had one tank that was removed and closed in 2015.
- Clevinger Truck Service site (423 Puyallup Ave) is located approximately 500 feet north of the subject property. This site is reported to have eight tanks that were removed and closed. This site is discussed in more detail in Section 3.1.1.3.

- Frontier Transportation site (217 E 25th Ave) is located approximately 560 feet west of the subject property. The site is reported to have had two tanks that were removed.
- Gonzales Motors site (301 Puyallup Ave) is located approximately 570 feet northwest of the subject property. This site is reported to have three tanks that were removed. This site is discussed in more detail in Section 3.1.1.3.
- Pacific Charter School site (2300 East E Street) is located approximately 580 feet north of the subject property. This site is reported have had one tank that was removed and closed. This site is discussed in more detail in Section 3.1.1.3.

Unless otherwise noted, the mere presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST, including the age of the facility, proximity to the subject property, and known releases or spills. UST sites that have had known releases are discussed in Sections 3.1.1.2 and 3.1.1.3.

### 3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Thirty-two LUST sites were identified within 0.5 mile of the subject property. Eight of these sites are located within 0.25 mile of the subject property:

- Spring Air NW site (725 E 25th Street) is located approximately 250 feet east of the subject property. The site is reported to have petroleum and polychlorinated biphenyls (PCBs) in soil below cleanup levels and petroleum in groundwater above cleanup levels. Cleanup has been initiated at this site. This site is discussed in more detail in Section 3.1.1.3.
- Western Beer Distributors Inc site (712 E 26th Street) is approximately 360 feet southeast of the subject property. This site is reported to have pesticides (remediated) and petroleum (above cleanup levels) in soil. The site was given an NFA determination for the LUST in 1996. Based on the location, regulatory status, and lack of groundwater impact, this site does not represent a REC for the subject property.
- Manna Pro Corp site (518 Puyallup Ave) is located approximately 370 feet north of the subject property. This site is reported to have petroleum in soil which was remediated. This site was given an NFA determination for the LUST in 2001. Based on the location, regulatory status, and lack of groundwater impact, this site does not represent a REC for the subject property.
- Clevinger Truck Service site (423 Puyallup Ave) is located approximately 500 feet north of the subject property. This site is reported to have confirmed metals, solvents, and gasoline in soil and suspected in groundwater. Cleanup has been initiated at this site. This site is discussed in more detail in Section 3.1.1.3.
- Gonzales Motors site (301 Puyallup Ave) is located approximately 570 feet northwest of the subject property. This site is reported to have had benzene, lead, and gasoline in soil. Soil at the site was remediated and the site received an NFA for the LUST in 2012. Based on the location, regulatory status, and lack of groundwater impact, this site does not represent a REC for the subject property.

- Pacific Charter School site (2300 East E Street) is located approximately 580 feet north of the subject property. This site is reported to have had benzene and gasoline in soil. Soil at the site was remediated and the site received an NFA for the LUST in 2019. Based on the location, regulatory status, and lack of groundwater impact, this site does not represent a REC for the subject property.
- Mendez Property site (910 Puyallup Ave) is located approximately 960 feet northeast of the subject property. The site is reported to have gasoline in soil and groundwater and cleanup has been started. This site is discussed in more detail in Section 3.1.1.3.
- Holland Quality Cleaners site (102 S 24th Street) is located approximately 1,300 feet west of the subject property. The site is reported to have benzene, gasoline, and lead in soil. Cleanup has been initiated at the site. Based on the distance from the site and lack of groundwater contamination, this site does not represent a REC for the subject property.

### 3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (the state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

The subject property is identified as a CSCSL site. The Freighthouse Square, Amtrak Relocation site (Cleanup Site ID 14416) is reported to have petroleum and polycyclic aromatic hydrocarbons (PAHs) in soil and arsenic in groundwater confirmed above cleanup levels. Cleanup has been initiated at the site. The site is further discussed in Section 4.1.

Ninety CSCSL sites were identified within one mile of the subject property. Of the 90 sites, 46 are located within 0.5 mile of the subject property and five are located within 0.125 mile of the subject property:

- Spring Air NW site (725 E 25th Street) is located approximately 250 feet east of the subject property. The site is reported to have petroleum and PCBs in soil below cleanup levels and petroleum in groundwater above cleanup levels. Cleanup has been initiated at this site. Based on the location and understood direction of groundwater flow (to the north), this site does not represent a REC for the subject property.
- Former Texaco Service Station site (704 Puyallup Ave) is located approximately 350 northeast of the subject property. The site is reported to have petroleum and metals in soil and groundwater. Cleanup has been initiated at this site. Based on the location and understood direction of groundwater flow (to the north), this site does not represent a REC for the subject property.
- Stone Property Transit site (E 25th and East C Street) is located approximately 410 feet west of the subject property. This site is reported to have arsenic and other metals, petroleum, and PAHs in soil and is suspected to have metals, petroleum, PAHs in groundwater. The site is reported to have started cleanup. Based on understood local groundwater flow direction, the downgradient location, and distance from the subject property, this site does not represent a REC for the subject property.
- Clevinger Truck Service site (423 Puyallup Ave) is located approximately 500 feet north of the subject property. This site is reported to have confirmed metals, solvents, and gasoline in soil

and suspected in groundwater. Cleanup has been initiated at this site. Based on understood local groundwater flow direction, the downgradient location, and distance from the subject property, this site does not represent a REC for the subject property.

- South Sound Radiator site (509 Puyallup Ave) is located approximately 510 feet north of the subject property. The site is reported to have confirmed petroleum and non-halogenated organics in soil and the same contaminants suspected in groundwater. The site is currently awaiting cleanup. Based on understood local groundwater flow direction, the downgradient location, and distance from the subject property, this site does not represent a REC for the subject property.

A subset of the CSCSL is the CSCSL NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when clean-up activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

The subject property (Freighthouse Square, Cleanup Site ID 719) is listed as a CSCSL NFA site and was granted an NFA in 2003. This is discussed further in the File Review in Section 4.1. Eight other CSCSL NFA sites are reported within approximately 0.125 mile of the subject property. Based on distance from the subject property, continued cleanup efforts, and NFA listing, none of the identified sites appear to represent RECs for the subject property, unless specifically noted otherwise in another section.

#### **3.1.1.4 SPILLS Database**

This database provides a comprehensive list of reported spills. The subject property is listed as the location of two incidents in the SPILLS database. Based on information provided, neither incident represents a REC for the subject property.

#### **3.1.1.5 Voluntary Cleanup Program**

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program. The subject property is not listed as a VCP site.

Twenty-four VCP sites are reported within approximately 0.5 mile of the subject property. Six of these sites are located within 0.125 mile of the subject property. All six sites are discussed in previous sections.

#### **3.1.1.6 Independent Cleanup Report**

These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. Eighteen ICR sites are reported within approximately 0.5 mile of the subject property. Of the eighteen sites, two are located within 0.125 mile of the subject property. Both sites are discussed in previous sections.

### **3.1.1.7 Solid Waste Facilities/Landfill**

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. Five Solid Waste Facilities/Landfill sites were reported within 0.5 mile of the subject property. Two of the five sites are located within 0.125 mile of the subject property:

- The Caraustar Tacoma Paperboard site (808 E 26th Street) is located approximately 700 feet southeast of the subject property. The site is reported to be a non-regulated recycler. Based on the facilities function as a recycler, the site is not considered a REC for the subject property.
- The City of Tacoma – Dock Street Eductor Decant Facility site (201 Puyallup Ave) is located approximately 760 feet northwest of the subject property. This is a permitted facility for the storage and processing of waste from city storm drains and catch basins. Based on the in-place controls and lack of a documented release, this site does not represent a REC for the subject property.

### **3.1.1.8 Brownfields List**

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination." The subject property is not listed as a State Brownfields site. Two State Brownfields site were reported within 0.5 mile of the subject property:

- American Plating (2220 East D Street) is located approximately 1,050 feet north of the subject property. The listing indicates this site is on several additional databases and has an NFA status from Ecology dating to 2015. Based on the distance relative to the subject property and the reported status, this site is not considered a REC for the subject property.
- Tacoma Redevelopment Property (1933 Dock Street) is located approximately 1,980 feet northwest of the subject property. This property was partially remediated by excavation, redeveloped, and institutional controls were placed on the property in 2007 related to the contamination remaining in place. Based on the proximity to the subject property and listings, this site is not considered a REC to the subject property.

## **3.1.2 EPA Database Review**

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases:

- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS) database
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)

- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

### 3.1.2.1 NPL List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within one mile of the subject property; however, there is one NPL site which impacts the vicinity of the subject property:

- The Asarco Tacoma Smelter Plume is a part of the Commencement Bay Nearshore Tidelands NPL site and includes large portions of Pierce, King, Kitsap, and Thurston Counties related to windblown contamination of arsenic and lead deposited from operation of the Asarco Smelter in Ruston, Washington, for a period of nearly 100 years (Ecology 2020). The area of the subject property is mapped within an area of impact from arsenic of less than 20 parts per million. Based on the mapped concentrations, this represents *de minimis* conditions at concentrations less than Model Toxics Control Act Method A cleanup levels and is not considered a REC for the subject property.

### 3.1.2.2 SEMS List

The EPA's Superfund Enterprise Management System (SEMS) database identifies sites that may potentially pose a threat to the environment or the health of the public.

Information contained in the EDR report indicates that the subject property is not listed as a SEMS site. Four SEMS sites were identified within 0.5 mile of the subject property:

- The Tacoma Spur site (S 24th Street and A Street) is located approximately 950 feet northwest of the subject property. This listing is related to PAH contamination in groundwater discovered during construction of Interstate 705 in 1984. This site is part of the Commencement Bay Nearshore Tidelands NPL site. It is not considered a REC based on the distance from the subject property (located over 950 feet northwest).
- The Union Pacific Railroad Tunnel site (Jefferson Avenue and 25th Street) is located approximately 2,100 feet west of the subject property. This site was an abandoned railroad tunnel containing abandoned waste. No significant levels of contaminants were found in groundwater at this site. Based on available information and distance from the subject property, this site does not represent a REC for the subject property.
- The BNSF Railroad site is located approximately 1,100 feet northeast of the subject property. This listing is related to historical tar pits associated with a former coal gasification plant that operated from the 1920s through 1956. This site is Operable Unit 3 of the Commencement Bay Nearshore Tidelands NPL site and is not considered a REC for the subject property due to ongoing remediation and monitoring and no known impacts to the subject property.
- Supervalu Ammonia Response (590 E 19th Street) is located approximately 2,300 feet north of the subject property. This listing related to a response that occurred to an ammonia release in

2017 as is not an active threat. Based on the information, this listing is not considered a REC for the subject property.

The EPA also publishes the SEMS-ARCHIVE list, which identifies SEMS sites that have been designated “no further remedial action planned” and that have been removed from the SEMS List. Information contained in the EDR report indicates that the subject property is not listed as a SEMS-ARCHIVE site. One SEMS-ARCHIVE site is identified within 0.5 mile of the subject property:

- American Plating (2220 East D Street) is located approximately 1,050 feet north of the subject property. This site is discussed in Section 3.1.1.8 above.

### 3.1.2.3 CORRACTS Review

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicated that the subject property is not listed as a CORRACTS site. Two CORRACTS sites are listed within one mile of the subject property:

- American Plating (2220 East D Street) is located approximately 1,050 feet north of the subject property. This site is discussed in Section 3.1.1.8 above.
- The University of Washington Tacoma Branch Campus (1930 C Street) is located approximately 2,700 feet northeast of the subject property. The listing is related to petroleum hydrocarbons, PAHs, and volatile organic compounds (VOCs) in soil and groundwater below the campus. The site entered an Agreed Order with Ecology in 1997 and is undergoing remediation and monitoring. Based on the distance from the subject property (located approximately 2,700 feet northwest), this site is not considered a REC for the subject property.

### 3.1.2.4 RCRA Generators List

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Very small quantity generators generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators do not currently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA generator database.

Fourteen RCRA Non-generators are listed within 0.125 mile of the subject property. Based on lack of violations or the nature of violations, these sites do not represent RECs for the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal (TSD) facilities. Information contained in the EDR report indicates the subject property is not listed as a TSD site. No TSD sites are identified within 0.5 mile of the subject property.

### 3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed near the subject property.

### 3.1.2.6 US Brownfields List

The EPA's US Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a US Brownfields site. Two US Brownfields site is listed within 0.5 mile of the subject property:

- American Plating (2220 East D Street) is located approximately 1,050 feet north of the subject property. This site is discussed in Section 3.1.1.8 above.
- Shaub-Ellison Parcel (1902 Pacific Ave) is located approximately 2,600 feet northwest of the subject property. During development, 3,700 cubic yards of petroleum were removed from the property. Residual petroleum-contaminated soil and groundwater remain at the site, and the site is currently undergoing remediation. Based on the distance from the subject property (approximately 2,600 feet northwest) and downgradient location, this site does not represent a REC for the subject property.

## 3.1.3 Other Databases

### 3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may pose a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Because of the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

#### EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR. The listings reviewed include, but were not limited to, gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are thirteen EDR Historical Auto Stations sites within 0.125 mile of the subject property. Only one of the thirteen sites is located upgradient (indicating that an on-site release impacting groundwater could have potential to impact the subject property) of the subject property:

- The Industrial Parts site (405-409 26th St E) is located 130 feet south of the subject property. The site was identified as an automotive repair shop between 1965 and 2013. No tanks or reported releases are associated with this site.

Unless otherwise noted, the mere presence of historical auto stations near a site does not, in itself, constitute a REC. The identified site does not appear to represent a REC for the subject property based on the lack of reported releases.

## EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The byproducts from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

One manufactured gas site is listed within one mile of the subject property:

- The Tacoma Coal Gasification site (E 22nd Street and A Street) is located approximately 1,500 feet northwest of the subject property. There is no additional information on this site. Based on the distance from the subject property and the downgradient location, this site does not represent a REC for the subject property.

## EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there are two EDR Historical Dry Cleaner sites within 0.125 mile of the subject property:

- Right Way Laundry (2330 South E Street) is located approximately 400 feet north and downgradient of the subject property. This site was identified as being a laundry in 1921. No other information is known. However, it does not appear to represent a REC for the subject property.
- Amanozio Laundry (423 Puyallup Avenue) is located approximately 500 feet north and downgradient of the subject property. This site was identified as being a laundry in 1921. No other information is known. However, it does not appear to represent a REC for the subject property.

Unless otherwise noted, the mere presence of a historical dry cleaner near a site does not, in itself, constitute a REC. The identified sites do not appear to represent a REC for the subject property based on the lack of reported releases and the distance and gradient from the subject property.

### 3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for the orphan sites, none appears to represent a potential REC for the subject property.

### 3.1.5 Vapor Encroachment

ASTM Standard E1527-13 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface,

and vapor in the subsurface.” The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The target property and adjacent sites were reviewed in an effort to determine whether vapor migration has, or has the potential to have, occurred at the site from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. Groundwater and soil contamination on site is limited primarily to diesel and oil-range hydrocarbons, metals, and PAHs, which do not typically cause vapor intrusion issues. Limited detected concentrations of VOCs in groundwater and naphthalene in soil are at levels that do not appear to warrant a concern for vapor intrusion.

## 3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the Certified Sanborn Maps and the historical aerial photos.

### 3.2.1 Certified Sanborn Maps

A copy of the Certified Sanborn Map Report is included in Appendix C. Maps were available for 1886, 1912, 1950, and 1963. Observations from the Sanborn Maps are listed below.

1886	The subject property is partially developed with a lodge hall and a number of residences. Surrounding properties are developed with stores and residences. Railroad tracks have not yet been constructed through the vicinity.
1912	The subject property is developed with a freight house on the western portion of the subject property and an ice factory/machine shop/creamery on the eastern portion. Railroad tracks have been constructed along the southern edge of the freight house, extending east and west. Residences and stores surround the subject property on adjacent streets. The Tacoma Biscuit and Candy factory is adjacent to the north of the subject property across E 25th Street.
1950	The subject property appears to be developed in a similar configuration. Adjacent surrounding properties include residences, warehouses, factories, and an icehouse.
1963	The subject property appears to be developed in a similar configuration as in 1950, with the addition to the structure between East F Street and East G Street. Adjacent properties are developed similar to 1950, with the addition of a junkyard to the north across E 25th Street and a motel to the south across the railroad tracks.

### 3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area examined for the years 1941, 1957, 1968, 1980, 1990, 2006, 2013 and 2017. Copies of the aerial photographs are included in Appendix D. Observations are discussed below.

- 1941 The subject property appears developed with the current freight house and warehouses. The far eastern portion of the subject property appears undeveloped. The railway line is apparent in the aerial photo just to the south of the subject property. The vicinity of the subject property appears developed though the quality of the photo prevents distinguishing between land uses.
- 1957 The subject property appears as it did in the prior photo with an addition to the existing structure between East F Street and East G Street. The vicinity of the subject property is fully developed with apparent warehouses and industrial properties.
- 1968 The subject property and vicinity properties appear much as they did in the 1957 photo.
- 1980 The subject property and vicinity properties appear much as they did in the 1968 photo.
- 1990 The subject property appears much as it did in the 1980 photo. The property immediately to the north, between East E Street and East F Street, appears to have been cleared. The Tacoma Dome has been constructed three blocks south of the subject property.
- 2006 The subject property appears much as it did in the 1990 photo. The property to the north, which had been cleared in the 1990 photo, appears to have been developed into parking garages. Much of the rest of the vicinity of the subject property appears similar to the 1990 photo.
- 2013-2017 The subject property and vicinity appear much as they did in the 2006 photo.

Based on the historical document review, the subject property first appeared developed with the current structure in the 1912 Sanborn map. Prior to the development, the subject property was sparsely developed with residences (1886). The subject property remained relatively unchanged until the 1957 aerial photo, where an addition to the structure on the subject property becomes apparent between East F Street and East G Street. There are no significant changes to the subject property between 1957 and present. No evidence of RECs was identified on the subject property or in the vicinity during the historical document review.

### 3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

#### 3.2.3.1 City of Tacoma

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks [ASTs]) was completed. No permits of environmental significance were identified on the City of Tacoma's Permit Search Tool (City of Tacoma 2020a).

#### 3.2.3.2 Pierce County

Based on information from the Pierce County Property Assessor-Treasurer Information Portal, the subject property is located on Tax Lots 2075220021, 2075240011, and 2075240013, and is approximately 1.6 acres. The subject property is currently owned by Time In Space LLC.

Pierce County records indicate that one structure constructed in 1956 is located on the subject property. This likely refers to the eastern addition to the original 1909 structure.

### **3.2.4 Additional Environmental Information**

The following subsections provide a summary of additional environmental information obtained for the site.

#### **3.2.4.1 Asbestos**

The manufacture of most asbestos-containing materials was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the structure (1956), there is potential for asbestos-containing materials to have been used in the construction of the buildings. An HBMS has not been conducted on the subject property.

#### **3.2.4.2 Lead-Based Paint**

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the structure (constructed in 1956), there is a potential for LBP to have been used in the construction of the building. An HBMS has not been conducted on the subject property.

#### **3.2.4.3 Polychlorinated Biphenyls**

Transformers can potentially contain PCBs. There are no transformers located on the subject property. Based on the age of the structure (constructed in 1956), there is potential for PCBs to have been used in the construction of the building (primarily used in lighting and electrical equipment). However, Parametrix did not inspect the building interior for this assessment and an HBMS has not been conducted on the subject property.

#### **3.2.4.4 Radon**

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors, such as the concentration of the gas, and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Pierce County ZIP code 98421 is located in Federal EPA Radon Zone 3. The Zone 3 indoor average radon level is less than 2 pCi/L (pico Curies per Liter). Based on this limited information, radon likely does not represent an environmental concern at the property. In addition, based on lack of a basement and the occupational nature of the site (limited working hours), radon is not expected to be a potential REC for the subject property.

## 4. FILE REVIEW

In accordance with ASTM Standard E1527-13, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

### 4.1 Previous Investigations

Based on the subject property's listing in Ecology's CSCSL and CSCSL NFA databases, Parametrix requested available site records from the agency. The subject property is listed in Ecology's records under two different cleanup site names: Freighthouse Square (CS 719) and Freighthouse Square Amtrak Relocation (CS144160). Contamination at this site likely originated from storage of diesel and oil at the Olympic Ice and Machine Company in the early 20th century. The Freighthouse Square Amtrak Relocation site (CS 144160) was designated as a cleanup site in 2017 as a result of contamination found during an investigation for the construction of a new Tacoma Amtrak Cascades Station (TACS) by the Washington Department of Transportation.

The east end of Freighthouse Square was destroyed by a fire in 1992. Investigations for contamination were initiated after excavation at the site in 1993 found petroleum contaminated soils. Approximately 12 tons of contaminated soil were excavated and disposed of during construction. Post excavation samples were collected, and diesel concentrations were below cleanup levels. Sample results for metals were also below cleanup levels. Groundwater grab samples collected from the open excavation in 1993 exceeded cleanup levels for oil-range hydrocarbons, cadmium, chromium, and lead. Due to the heavy-oil nature of the petroleum contamination, the limited metals concentrations, and no local beneficial use of groundwater, it was determined that the groundwater contamination did not pose a significant threat to human health or the environment and the site was deemed eligible for an NFA determination with the implementation of institutional controls to limit groundwater and property use. A periodic review is completed on the site every 5 years in accordance with the requirements of the Model Toxics Control Act, Chapter 173-340 WAC (Ecology 2017). The Restrictive Covenant for the property (recorded in July 2003) imposes the following limitations:

- No groundwater may be taken for any use from the property.
- Any activity that may interfere with the integrity of the remedial action and continued protection of human health and the environment is prohibited.
- Any activity that may result in the release or exposure to the environment of groundwater containing a hazardous substance that remains on the property is prohibited.
- The owner must give 30 days' advanced notice to Ecology of the owner's intent to convey any interest in the property.
- The owner must restrict leases to uses and activities consistent with the restrictive covenant.
- The owner shall allow authorized representatives of Ecology the right to enter the property for the purposes of evaluating the remedial action.
- The owner of the property reserves the right to record an instrument that provides that this restrictive covenant shall no longer limit use of the property if approved by Ecology.

*Phase I Environmental Site Assessment  
TD 4461, TD 4476, TD 4506  
Freighthouse Square  
2501 East D Street and 602 E 25th Street  
Tacoma, WA*

A Phase II ESA was conducted for the new TACS in late 2014 and early 2015 and is included in Appendix F, Supporting Materials. Eighty-eight soil samples and 11 groundwater samples were collected from 28 borings around the perimeter of the subject property. Cleanup levels were exceeded for cPAHs and oil-range hydrocarbons in soil. Diesel and arsenic exceeded cleanup levels in groundwater (Shannon & Wilson 2015).

For the portion of the site occupied by subject property parcels, remedial actions recommended by Shannon & Wilson included the preparation of a Contaminated Media Management Plan (CMMP) and targeted excavation around boring locations with concentrations of cPAHs and oil-range hydrocarbons exceeding cleanup standards (Shannon & Wilson 2015).

## **4.2 Adjacent Properties File Review**

Several nearby properties were listed on environmental databases, as described in Section 3. In general, sufficient site-specific information was available through review of the EDR report, as well as online Ecology files to develop an opinion on the potential for these properties to have affected the subject property.

## 5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on November 3, 2020. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site examination are included in Appendix E.

### 5.1 Subject Property

The subject property is developed with a large former freight house and warehouse currently in use housing a number of commercial businesses and a rail station. Businesses include gift shops and restaurants. The northern edge of the subject property is fronted by a wide sidewalk along E 25th Street and the southern edge borders the active railroad tracks. Two transformers are located along the edge of the subject property, one along East G Street and one along E 25th Street.

No evidence of ASTs or other indications of environmental significance were observed on the exterior portions of the property. In addition, no evidence of significant storage or spills of hazardous substances and/or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property.

### 5.2 Adjacent Properties

The vicinity of the subject property is developed primarily with commercial and industrial buildings. Adjacent properties were examined from public areas for the presence of environmental conditions that have the potential to impact the subject property.

The subject property is bounded by E 25th Street to the north (including a Sound Transit streetcar rail and stop) with a parking garage to the north. BNSF tracks lie to the south, with an empty lot and a restaurant on the other side. Parking lots lie across East D Street and East G Street to the west and east, respectively. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials identified on visible areas of adjacent properties.

## 6. INTERVIEWS

An interview was not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-13.

A user questionnaire was submitted to Sound Transit to assist in identifying potential RECs affecting the site and identification of background information on the subject property. No RECs were identified through the review of the user questionnaire. A copy of the user questionnaire completed by Sound Transit is attached in Appendix A.

Parametrix completed an interview with Rob Olsen, Environmental Health Specialist of the Tacoma-Pierce County Health Department Environmental Health – Contaminated Properties division, on February 4, 2021 (TPCHD 2021). TPCHD had no records that provided evidence of additional RECs for the subject property.

## 7. CONCLUSIONS

Parametrix conducted a Phase I ESA in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as TD 4461, TD 4476, and TD 4505. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located on Pierce County Tax Lots 2075240013, 2075240011, and 2075220021 and is currently occupied by a number of commercial businesses and a passenger rail station. The subject property encompasses an area of approximately 1.6 acres and is zoned for mixed use. The subject property consists of a 54,916-square-foot building.

The first known development on the subject property was in the 1880s with isolated residences. By 1912, the freight house that still stands on the property was constructed. The subject property remained the same until a structure was added to the east end in 1957. No significant changes were made to the subject property between 1957 and the present. However, a fire in 1992 destroyed the eastern portion of the building, which was reconstructed. Surrounding land use has remained commercial and industrial. The rail station construction on the west end occurred in 2016.

No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property during site reconnaissance. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance.

This assessment has revealed no evidence of RECs in connection with the subject property, except for the following:

### **Recognized Environmental Conditions**

The subject property is listed in both the Confirmed and Suspected Cleanup Site List (CSCSL) and CSCSL No Further Action (NFA) database. Contamination, likely originating from the former Olympic Ice and Machine Company, resulted in soil and groundwater impacts at the subject property. Diesel and oil-range hydrocarbons, polycyclic aromatic hydrocarbons (PAHs), and metals have been detected in soil and groundwater. Cleanup levels were exceeded for carcinogenic PAHs (cPAHs) and oil-range hydrocarbons in soil. Diesel and arsenic exceeded cleanup levels in groundwater. The site received a conditional NFA in 2003 with the implementation of a restrictive covenant that dictates groundwater and land use at the site. The presence of residual soil and groundwater contamination at the subject property represents a CREC.

### **Data Gaps**

An on-site reconnaissance and interview were not able to be conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

Grantee: Time iN Space, LLC, a Washington limited liability company

Recorded: January 28, 2013

Recording No.: [201301280837](#)

**EXHIBIT "A"**  
Legal Description

**PARCEL A:** 207522-0021 and 207524-0011:

The Northerly 77 feet of Blocks 7522 and 7524, Tacoma Land Company's First Addition to Tacoma, according to plat filed for record July 7, 1884, in the office of the County Auditor, in Pierce County, Washington.

Except the East 135 feet of said Block 7524.

Together with that portion of East "E" Street adjoining said Northerly 77 feet of Blocks 7522 and 7524, vacated by City of Tacoma Ordinance Nos. 3127 and 23949.

Except that portion appropriated by the State of Washington in Pierce County Superior Court Cause No. 16-2-05479-5.

**PARCEL B:** 207524-0013:

The Northerly 77 feet of the Easterly 135 feet of Block 7524, and the Northerly 77 feet of Block 7526, Tacoma Land Company's First Addition to Tacoma, according to plat filed for record July 7, 1884, in the office of the County Auditor, in Pierce County, Washington.

Together with that portion of East "F" Street, vacated by City of Tacoma Ordinance Nos. 3128 and 23949, adjoining the Northerly 77 feet of said Blocks 7524 and 7526.

Except from said Block 7526 that portion appropriated by the City of Tacoma for the construction and maintenance of a public street, by Decree entered September 12, 1928 in Pierce County Superior Court Cause No. 61287, and being described as follows:

Beginning at the Southeast corner of said Block 7526;

Thence Northerly along the East line of said block, a distance of 119.73 feet;

Thence in a Southwesterly direction on a curve to the right having a radius of 538 feet and concentric with a curve having a radius of 573 feet, whose tangent at a point on the center line of East "G" Street, 36.80 feet South of the center line of East 25th Street making an angle of 14 degrees 22' to the Southwest with the said center line of East "G" Street, a distance of 130.04 feet to a point of compound curve;

thence continuing Southwesterly on a curve to the right having a radius of 283 feet, a distance of 1.32 feet to a point on the South line of said Block 7526, said point being 2.84 feet West of the Southeast corner of Lot 10, in said Block 7526;

thence Easterly along the South line of said Block, a distance of 52.84 feet to the place of beginning.

Except all track material, including, but not limited to rails, fastenings, angle bars, tie plates, ties and other improvements, as excepted in deed from Richard B. Ogilvie, as Trustee of the Property of Chicago, Milwaukee, St. Paul and Pacific Railroad Company and recorded under [Recording No. 8109020105](#).

Title Guarantees supporting documents are available upon request.

## USER QUESTIONNAIRE INFORMATION (ASTM)

User representative: **Sound Transit – Ross Stainsby**

Date: **February 2021**

Project Name: **Tacoma Dome Link Extension**

Property Name and TD #: **Freighthouse Square, TD 4461, 4476, 4506**

Project Number: **AE 0030-17**

## ASTM 1527-13 USER QUESTIONS

ASTM 1527-13 includes a user questionnaire that must be completed by the user in order to qualify for Landowner Liability Protections (LLPs) under CERCLA. The following questions are to be completed by the user or representatives of the user.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?  
\_No\_\_\_\_\_
2. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?  
\_No\_\_\_\_\_
3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties?  
\_No\_\_\_\_\_
4. For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?  
\_No\_\_\_\_\_
5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? \_I am not aware of the purchase price\_\_\_\_\_
6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?  
\_No\_\_\_\_\_

For example, as user,

- (a) do you know the past uses of the property?  
\_No\_\_\_\_\_
  - (b) do you know of specific chemicals that are present or once were present at the property?  
\_No\_\_\_\_\_
  - (c) do you know of spills or other chemical releases that have taken place at the property?  
\_No\_\_\_\_\_
  - (d) do you know of any environmental cleanups that have taken place at the property?  
\_No\_\_\_\_\_
7. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property?  
\_No\_\_\_\_\_

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

## EXECUTIVE SUMMARY

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there are 4 SEMS sites within approximately 0.5 miles of the target property.

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/15/2020 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 89 WA CSCSL sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **State and tribal landfill and/or solid waste disposal site lists**

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there are 5 WA SWF/LF sites within approximately 0.5 miles of the target property.

### **State and tribal leaking storage tank lists**

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the WA LUST list, as provided by EDR, has revealed that there are 32 WA LUST sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 05/12/2020 has revealed that there are 19 WA UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

Type of Report Ecology Received: F  
Date Ecology Received Report: 07/23/92  
Media Contaminated: GW,S

WA PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the WA PTAP list, as provided by EDR, and dated 05/12/2020 has revealed that there is 1 WA PTAP site within approximately 0.5 miles of the target property.

### ***State and tribal Brownfields sites***

WA BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the WA BROWNFIELDS list, as provided by EDR, and dated 07/13/2020 has revealed that there are 2 WA BROWNFIELDS sites within approximately 0.5 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/01/2020 has revealed that there

## EXECUTIVE SUMMARY

are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 07/13/2020 has revealed that there are 26 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

Contaminant Name: Benzene  
 Contaminant Name: Lead  
 Contaminant Name: Other Non-Halogenated Organics  
 Contaminant Name: Petroleum-Gasoline

WA AQUEOUS FOAM: Aqueous film-forming foam-laced water running off from fuel spills, firefighting events and routine training sessions has put those chemicals in ground water, surface water, sediments, biota, and other natural resources of the state.

A review of the WA AQUEOUS FOAM list, as provided by EDR, and dated 07/06/2020 has revealed that there is 1 WA AQUEOUS FOAM site within approximately 0.5 miles of the target property.

### **Records of Emergency Release Reports**

WA SPILLS: Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

A review of the WA SPILLS list, as provided by EDR, and dated 06/08/2020 has revealed that there are 2 WA SPILLS sites within approximately 0.001 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

**CONSENT:** Major Legal settlements that establish responsibility and standards for cleanup at NPL (superfund) sites. Released periodically by U.S. District Courts after settlement by parties to litigation matters.

A review of the CONSENT list, as provided by EDR, and dated 06/30/2020 has revealed that there is 1 CONSENT site within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### **EDR Exclusive Records**

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants

## EXECUTIVE SUMMARY

(manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TACOMA COAL GASIFICA	A STREET	WNW 1/4 - 1/2 (0.288 mi.)	AI138	646
TACOMA COAL GASIFICA	E 22ND AND A STS	WNW 1/4 - 1/2 (0.318 mi.)	AH150	755

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Waste Description: METHYL ETHYL KETONE

Waste Code: F003  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Report Title: Not reported

Date Ecology Received Report: 01/18/94  
Contaminants Found at Site: Petroleum products  
Media Contaminated: Groundwater, Soil  
Waste Management: Tank  
Region: South Western  
Type of Report Ecology Received: Interim cleanup report  
Site Register Issue: 93-17  
County Code: 27  
Contact: Not reported  
Report Title: Not reported

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Property Description: Prior to 1955, the site was used for boat building. From 1955 to 1986 it was a plating factory. They specialized in polished copper, nickel and bright chrome finishes. The facility was operation from 1976 to 1986 when operations ceased and the business filed for bankruptcy. The City of Tacoma acquired the property in the late 1980s. In 2002 the buildings on the property was demolished and removed from the site. The site sat vacant ever since.

Property Description:	Prior to 1955, the site was used for boat building. From 1955 to 1986 it was a plating factory. They specialized in polished copper, nickel and bright chrome finishes. The facility was operation from 1976 to 1986 when operations ceased and the business filed for bankruptcy. The City of Tacoma acquired the property in the late 1980s. In 2002 the buildings on the property was demolished and removed from the site. The site sat vacant ever since.

Name:	BRLF-06: AMERICAN PLATING
Address:	2130 EAST D STREET
City,State,Zip:	TACOMA, WA 98421
Recipient Name:	Washington Department of Commerce
Grant Type:	BCRLF
Property Number:	8950001761
Parcel size:	1.72
Latitude:	47.24255
Longitude:	-122.4305531
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	Approximately half an acre was turned into a linear park. The remaining portion of the property is pending development of a boat house. Thea-Foss Development Authority is currently working with a citizen's group to raise the funds to build the boathouse. Once built, it will promote canoeing and kayaking on Commencement Bay. Updated 10-22-2015: FWDA will begin public planning for the conversion of the entire site to a park late this fall. Pierce Assessor records shows the property is leased to BIL-JAX Scaffolding

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OSHA ESTABLISHMENT

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: D008  
Waste Description: LEAD

Waste Code: D035  
Waste Description: METHYL ETHYL KETONE

Waste Code: F001  
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002  
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Click Here:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110005264800

Click Here:

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: IGNITABLE WASTE

Waste Code: D002  
Waste Description: CORROSIVE WASTE

Waste Code: D007  
Waste Description: CHROMIUM

Waste Code: D008  
Waste Description: LEAD

Waste Code: D009  
Waste Description: MERCURY

Waste Code: D035  
Waste Description: METHYL ETHYL KETONE

Waste Code: F003  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005  
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

**Environmental Interest/Information System:**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

**OSHA ESTABLISHMENT**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**HAZARDOUS WASTE BIENNIAL REPORTER**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
