Hi Sarah,

Thank you for your response. To answer your question below, SHPO agreed with the definition of the APE without any comments. I look forward to getting any comments you may have.

Thanks,

Mark A. Assam, AICP
U.S. Department of Transportation
Federal Transit Administration, Region X
915 2nd Avenue, Suite 3142 | Seattle, WA 98174-1002
(206) 220-4465 | mark.assam@dot.gov | www.transit.dot.gov

Hello Mark,

This is confirmation that I accept the invitation to be a consulting party. I will follow up with any comments on the APE that we have by the end of this month.

In the meantime, has DAHP submitted any comments on the APE?

Thanks,

Sarah

Re: Invitation to participate as Consulting Party to Section 106 NHPA process for West Seattle and Ballard Link Extensions Project, and comments on the Area of Potential Effect

Dear Ms. Gehrke,

This letter is submitted on behalf of the Alliance for Pioneer Square, formally accepting the invitation to participate in the upcoming Section 106 consultation for the West Seattle to Ballard Link Extension Project (“WSBLE”). I, Lisa Howard, will serve as our organization’s point of contact for this process.

Alliance for Pioneer Square also wishes to comment at this time on the proposed Area of Potential Effect (APE) provided in the maps distributed along with the consultation invitation letter dated August 31, 2020. We request that the Federal Transit Administration and Sound Transit expand the APE to include the following areas:

- The entirety of the Pioneer Square-Skid Road Historic District
- The entirety of the International Special Review District of the Seattle Chinatown International District neighborhood
- Potential haul routes for the West Seattle and Ballard Link Extension project

Pioneer Square is still in the midst of more than a decade of public mega projects, the impacts of which are comparable to the impacts that can be expected from WSBLE. These include the Alaskan Way Viaduct Replacement Project, the Elliott Bay Seawall Replacement Project, the Washington State Ferries Colman Dock expansion, construction of the First Hill Streetcar, and replacement of the water main under First Avenue. Based on our recent experience, we can assure you that the actual effects of WSBLE will include the entire Pioneer Square neighborhood, and given the location of WSBLE, it will affect the entire International District as well. Pioneer Square’s ability to
withstand those mega projects has been in significant part a result of impact mitigation that those projects have provided under Section 106 of the National Historic Preservation Act, and we believe the same will be true for our ability to survive WSBLE.

During Section 106 review for many of the region’s mega-projects (those whose overall cost exceeds $1 billion, as defined by the Washington State Legislature), we have learned the importance of thoroughly investigating the area beyond the immediate construction footprint for potential impacts to historic resources, because the impact of the construction of these projects extends well beyond a construction fence.

Pioneer Square functions as an integrated neighborhood. Long-term maintenance of its historic resources depends upon its historic properties remaining economically viable. For the many properties with street level uses, that requires that customers be able to reach those uses, and that delivery trucks and customers be able to park when they get there. That depends on the transportation system. For properties with office uses in the upper floors, remaining economically viable requires that the employees of the tenants be able to get to work. That also depends on the transportation system. While Pioneer Square looks forward to the completion of WSBLE, with its transportation benefits for Pioneer Square as well as the rest of the region, if transportation to and from Pioneer Square becomes impossible or so arduous that no one chooses to come there for a decade, the risk of building foreclosures, lack of required maintenance, and destruction of the fabric of the historic neighborhood is very real.

The determination of the area of impact needs to consider the facts that:

1) On a good day, the neighborhood has serious access and traffic problems; on one of the ±100 days a year when there is an event in the stadium district during rush hour, it is worse.

2) Fourth and Fifth Avenues currently provide one of the major access routes to and from Pioneer Square, as well as through downtown Seattle for regional traffic; the WSBLE project will necessarily prevent full use of those streets for years.

3) There are limited ways that people and commercial vehicles (think trucks delivering art to galleries, food to restaurants, etc.) can get to and through the neighborhood at this time. Impairment of the major routes to and through the neighborhood, including Fourth and Fifth Avenues, will make that access much more challenging.

4) Many of the streets in Pioneer Square have historic areaways within the street right of way, which are part of the historic assets. The Seattle Department of Transportation has recently placed weight restrictions on most of the streets in Pioneer Square, including First Avenue and Jackson Street between Alaskan Way and Second Avenue. The City currently does not have a plan or a budget to repair the areaways, and as a result, those streets are unavailable for additional traffic to be diverted or detoured onto them.
The combination of these factors is the “existing environment” which WSBLE will be impacting. While no one expects construction of a major infrastructure project to be easy, and we recognize the need to accept considerable pain in order to get to the desired end, it is important to also recognize that if appropriate mitigation is not provided, such projects can do lasting damage to the fabric of the neighborhood. The impact of the construction of the existing transit tunnel under Third Avenue through downtown Seattle in the 1980s illustrates that point. A once-thriving Third Avenue business community was destroyed in the course of construction of the Third Avenue transit tunnel, and to this day Third Avenue struggles with high crime, a lack of long-term businesses at street level, streets that empty out at the close of the business day, and areas that most people are warned to avoid. As we said in the beginning, Alliance for Pioneer Square worked hard in the Section 106 process for the Alaskan Way Viaduct Replacement, in particular, to avoid that consequence, and the mitigation provided through that Section 106 process has thus far prevented a similar fate for Pioneer Square. We hope to work with you to achieve a similar outcome with respect to WSBLE.

Several of the mega projects of the last decade have been located between Pioneer Square and Elliott Bay. WSBLE, by contrast, will be directly between two historic neighborhoods, and the impact of WSBLE on the Chinatown International District will be at least as substantial as the impact on Pioneer Square. Pioneer Square and the International District have also increasingly worked together to enhance pedestrian movement between the two historic districts, so that the parking, festivals, employment and street life of each benefit the other. Construction of WSBLE will potentially sever that connection for years, to the detriment of both. Maintenance of the historic resources within the Chinatown International District is also dependent upon maintaining the economic viability of the properties, so the threat to historic resources in the entire Chinatown International District from the construction impacts of WSBLE is also very real and the Sec. 106 process should be used to mitigate that threat.

Finally, the construction of a tunnel under more than 6,000 lineal feet of downtown Seattle will necessarily require hauling away an enormous amount of dirt, as well as bringing in an enormous amount of steel and concrete. In the very constrained transportation environment of downtown Seattle, it is critical that haul routes be included in the APE. That has precedent. For example, FHWA, WSDOT, and the DAHP concluded early in the process that it was necessary to include in the APE, potential haul routes identified for the SR 520 Bridge Replacement and HOV project. The long-term effects of heavy construction equipment and materials regularly traveling by historic properties warranted a closer look at the possible impacts generated by the project. Both Pioneer Square and Chinatown Historic Districts include historic areaways within their borders, resources that are at great risk of being lost to long term neglect and chronic underinvestment in maintenance and repair. Since many of these resources are located in the right of way, and sensitive to use and traffic, the increase in local traffic diversions and construction haul traffic may have substantial and long-term impacts.

Seattle is located in what many consider a transportation bottle neck in the region. The narrow strip of land between Elliott Bay and Lake Washington, dramatically divided by Interstate 5, has few entry and exit points to the Port of Seattle, and to downtown itself.
Pioneer Square and the Chinatown International District neighborhoods are located in one of the most important transportation confluence routes—with exits from I-5 to Dearborn and Yesler Avenues, and gateway-like entry to and exit from downtown Seattle via 4th Avenue South. These roadways are important transportation corridors for regional freight coming from Port of Seattle, and transit and traffic. When the WSBLE project is constructed, it will impact these transportation corridors, and potentially divert traffic through Pioneer Square and Chinatown International District. Years of noise, vibration, and dust could erode the overall cultural environments, and impact nearby historic properties. The two historic neighborhoods have been working to preserve the existing connectivity between them, and where practicable, to improve it while retaining their respective historic character. The anticipated decade-long construction of this project could have serious impacts to these neighborhood efforts, and warrant a more comprehensive look at the effects of construction on the neighborhoods as a whole.

We have the benefit of applied experience from our most recent regional megaprojects to support our requests. The SR 520 program in its tenth year of construction, with as many as eight to go, is continuing work on and alongside important resources like Lake Washington Boulevard, Foster Island, and the Roanoke Park Historic District. These resources were considered in the APE, only after consultation began. As stewards of the historic character and fabric of our neighborhood, we believe the precedent set by other regional projects to consider adjacent districts as a whole, and historic resources in close proximity to a project constrained by geography, is a prudent approach to historic preservation.

Thank you for your time and consideration. We look forward to discussing further, and to participating in this process with you.

Lisa Howard

Lisa Howard
Executive Director
Alliance for Pioneer Square
Dear Ms. Gehrke:

Seattle Chinatown International District Preservation and Development Authority (SCIDpda) formally accepts the invitation to participate in the upcoming Section 106 consultation for the West Seattle to Ballard Link Extension Project. I will serve as our organization’s point of contact for this process. This is a brand new process for myself, and I do not believe we have been asked to participate in Section 106 consultation for other projects in at least the last 10 years.

The SCIDpda was established 45 years ago by the City of Seattle as stewards of the Chinatown International District (CID) neighborhood – its people, its businesses, its public realm and those defining elements that make the neighborhood unique. We are not historic preservationists, but were established because investment in its preservation preserves its culture. It is from this perspective that we reviewed the Area of Potential Effect (APE) provided in the maps distributed along with the consultation invitation letter dated August 31, 2020, and request that FTA and Sound Transit expand the APE to include the following areas:

- The entirety of the Chinatown International District neighborhood, as defined by the City of Seattle under the International Special Review District (ISRD), which includes the National Register-listed Seattle Chinatown Historic District
- The entirety of the Pioneer Square-Skid Road Historic District
- Potential haul routes for the West Seattle and Ballard Link Extension project

We submit the following comments based on our review of the Area of Potential Effect (APE), provided in the maps distributed along with the consultation invitation letter dated August 31, 2020, and request that FTA and Sound Transit expand the APE to include the following areas:
• The entirety of the Seattle Chinatown International District neighborhood, as defined by the City of Seattle under the International Special Review District (ISRD), which includes the National Register-listed Seattle Chinatown Historic District
• The entirety of the Pioneer Square-Skid Road Historic District
• Potential haul routes for the West Seattle and Ballard Link Extension project

The CID has been dealing with changes to the use in the transit tunnel throughout the past 3 years, along with changes to traffic on 4th, 5th, and South Jackson Street, which followed close along on the construction of the City of Seattle’s First Hill Streetcar and Charles Street Maintenance Center. Through our recent experience, we have learned that traffic impacts like diversion through our Chinatown International District neighborhood are more substantial on our economy and cultural fabric than disclosed or credited in environmental reviews to date. This neighborhood is made up of many generations of families and people that define the cultural context. We have a higher concentration of elderly (25% are 65+ in age) and people living in poverty (34% poverty rate) - as well as those that do not speak English as a first language (over 50%) - than the rest of Seattle. That context is visible on our sidewalks and in our parks where people congregate to play games, talk, and participate in daily life. Culturally, our community does not entertain at home, but instead tends to gather in public places. When traffic diversion pushes more cars through our streets, it creates tension between the calm pedestrian environment, and erodes our ability to congregate publicly. The conflict between people cutting through the neighborhood to get to somewhere – often quickly, often feeling annoyed – and people who live in the neighborhood – often elderly with a walker who moves slower than most – happens frequently. When projects take away parking and access to our streets, it prevents family from visiting their elders. Projects and traffic diversion make it more difficult for small businesses to receive deliveries, and for customers to access those businesses. As we’ve learned from neighboring Pioneer Square during the decades of megaproject construction in and around that neighborhood—when travel to and from our community becomes so difficult or near impossible that people choose to avoid us, we lose businesses that contribute to our culture and economy, we risk the health of our seniors, and risk further deterioration of our buildings through lack of revenue to fund needed maintenance.

The SCIDpda also requests that the Bush Hotel and New Central Hotel buildings be included in the Section 106 review for the project.

Pioneer Square’s ability to withstand more than a decade of public mega projects, including the Alaskan Way Viaduct Replacement Project, the Elliott Bay Seawall Replacement Project, the Washington State Ferries Colman Dock expansion, the First Hill Streetcar construction project, and First Avenue water main replacement, is in significant part a result of impact mitigation that those projects have provided under Section 106 of the National Historic Preservation Act.

During Section 106 review for many of the region’s mega-projects (those whose overall cost exceeds $1 billion, as defined by the Washington State Legislature), we have learned the importance of thoroughly investigating the area around the construction footprint for potential impacts to historic resources. Long term infrastructure projects in the Seattle area, with construction timelines beyond five years’ time, come with extended long-term impacts to resources that live outside a construction fence.

For example, FHWA, WSDOT, and the DAHP concluded early in the process that it was necessary to include in the APE, potential haul routes identified for the SR 520 Bridge Replacement and HOV project. The long-term effects of heavy construction equipment and materials regularly traveling by historic properties warranted a closer look at the possible impacts generated by the project. Both Chinatown Historic District and Pioneer Square include historic areaways within their borders in the right-of-way, resources that are at great risk of being lost to long term neglect and chronic underinvestment in maintenance and repair. The increase in local traffic diversions and construction haul traffic may have substantial and long-term impacts on the areaways and foundations of historic buildings.

Seattle is located in what many consider a transportation bottle neck in the region. The narrow strip of land between Elliot Bay and Lake Washington, dramatically divided by Interstate 5, has few entry and exit points to the Port of Seattle, and to downtown itself. Pioneer Square and the Chinatown International District neighborhoods are located in one of the most important transportation confluence routes—with exits from I-5 to Dearborn and Yesler Avenues, and
gateway-like entry to and exit from downtown Seattle via 4th Avenue South. The CID, in addition, is surrounded by prior large transportation projects, with the confluence of rail and transit at the Jackson Hub on the west, I-90 to the south, and I-5 cutting through the neighborhood to the east.

These roadways are important transportation corridors for regional freight coming from Port of Seattle, and transit and traffic. When the WSBLE project is constructed, it will impact these transportation corridors, and potentially divert traffic through the Chinatown International District and Pioneer Square. Years of noise, vibration, and dust could erode the overall cultural environments, and impact nearby historic properties. The two historic neighborhoods have been working to preserve the existing connectivity between them, and where practicable, to improve it while retaining their respective historic character. The anticipated decade-long construction of this project could have serious impacts to these neighborhood efforts, and warrant a more comprehensive look at the effects of construction on the neighborhoods as a whole.

We have the benefit of applied experience from our most recent regional megaprojects to support our requests. The SR 520 program in its tenth year of construction, with as many as eight to go, is continuing work on and alongside important resources like Lake Washington Boulevard, Foster Island, and the Roanoke Park Historic District. These resources were considered in the APE, only after consultation began. As stewards of the historic character and fabric of our neighborhood, we believe the precedent set by other regional projects to consider adjacent districts as a whole, and historic resources in close proximity to a project constrained by geography, is a prudent approach to historic preservation.

Thank you for your time and consideration. We look forward to discussing further, and to participating in this process with you.

Re: Invitation to participate as Consulting Party to Section 106 NHPA process for West Seattle and Ballard Link Extensions Project, and comments on the Area of Potential Effect

Dear Ms. Gehrke and Mr. Assam,

This letter is submitted on behalf of Historic South Downtown, a Community Preservation and Development Authority formed under RCW 43.167 to assist the communities of Pioneer Square and Chinatown-International District (C-ID) in mitigating the impact of large-scale public developments. This letter represents our formal acceptance of the invitation to participate in the upcoming Section 106 consultation for the West Seattle to Ballard Link Extension Project ("WSBLE").

Please note, send all future correspondence to Kathleen Johnson via email at kathleen@historicsouthdowntown.org.
We reviewed the Area of Potential Effect (APE) provided in the maps distributed along with the consultation invitation letter received in the evening hours of September 1, 2020, and request that FTA and Sound Transit expand the APE to include the following areas:

- The entirety of the Pioneer Square-Skid Road Historic District
- The entirety of the International Special Review District of the Seattle Chinatown International District neighborhood
- Potential haul routes for the West Seattle and Ballard Link Extension project

Historic resources located throughout the South Downtown area of Seattle have been subject more than a decade of public mega projects, including the Alaskan Way Viaduct Replacement Project, the Elliott Bay Seawall Replacement Project, the Washington State Ferries Colman Dock expansion, construction of the First Hill Streetcar, the ongoing construction of East Link Light rail. The ability of many historic resources to withstand those mega projects is in significant part a result of impact mitigation that those projects have provided under Section 106 of the National Historic Preservation Act.

During Section 106 review for many of the region’s mega-projects (those whose overall cost exceeds $1 billion, as defined by the Washington State Legislature), we have learned the importance of thoroughly investigating the area beyond the immediate construction footprint for potential impacts to historic resources. Long-term infrastructure projects in the Seattle area, with construction timelines beyond five years time, come with extended long-term impacts to resources that live well beyond a construction fence.

In the case of WSBLE, no matter what alignment is selected (4th or 5th), Sound Transit will be building a tunnel through downtown Seattle, and those spoils will have to go somewhere. The tunnel portal and subsequent work area will likely be located in SODO or Chinatown ID. That’s a lot of dirt, and a lot of trucks carrying dirt and materials to and from a tunnel portal that will have to find their way through either Chinatown ID or Pioneer Square for the duration of construction. There are limited options to get to and from these neighborhoods—and Sound Transit will likely have to use 4th Avenue, 5th Avenue, Yesler Avenue, and/or Alaskan Way.

Both Alaskan Way and 4th Avenues have major transportation function, have intersections that are expected to be at LOS E and F during the construction period, and have gridlock on many occasions, particularly during the days when events in the Stadium District coincide with rush hour. When that happens, accessibility in the entire Pioneer Square and Chinatown ID becomes extremely difficult. So all of those areas are likely to be adversely affected and warrant a full review of the area, not just the project footprint.

In addition to traffic impacts caused by both diversion, and by hauling tens of thousands of truckloads of dirt and materials to and from the portal, we anticipate that
years of noise, vibration, and dust could erode the overall cultural environments, and impact nearby historic properties. The two historic neighborhoods have been working to preserve the existing connectivity between them, and where practicable, to improve it while retaining their respective historic character. The anticipated decade-long construction of this project could have serious impacts to these neighborhood efforts, and warrant a more comprehensive look at the effects of construction on the neighborhoods as a whole.

Historic South Downtown appreciates the opportunity to work with you as a consulting party on the upcoming Section 106 process.

Best wishes,

Kathleen Barry Johnson
Executive Director
Historic South Downtown

Re: Consulting Party Invitation to Section 106 NHPA for West Seattle and Ballard Link Extensions Project

Dear Ms. Gehrke:

Martin Smith Inc formally accepts the invitation to participate in the upcoming Section 106 consultation for the West Seattle to Ballard Link Extension Project. I will serve as our organization’s point of contact for this process.

Martin Smith Inc and its affiliates own several historic buildings in Pioneer Square and we ask that you expand the Area of Potential Effect (APE) to include the entire Pioneer Square Historic District. The entire Pioneer Square neighborhood will suffer significant impacts from this Project and these impacts need to be considered and mitigated to the extent possible. In addition, I ask that you specifically include the following MSI related properties that will be impacted by this project:

Maynard Building (119 1st Ave. S.)
Union Trust Building (119 S. Main St.)
Occidental Mall (308-316 Occidental Ave. S.)
First & King Building (101 S. King St.)
Provident Building (568 1st Ave. S.)

I also ask that you include the entire Chinatown International District (CID) neighborhood in the APE as well, given the cultural and economic importance of these rare historic districts.

Thank you for your time and consideration. We look forward to working with you in this important process.
Respectfully,

Ryan Smith

Subject: Sound Transit
West Seattle and Ballard Link Extensions Project
National Historic Preservation Act, Section 106
Consulting Party Invitation

Dear Dr. King:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is proposing the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle's Alaska Junction area, and to Ballard's Market Street area, in Seattle, King County, Washington. Sound Transit intends to apply for federal funds administered by FTA for the Project, making it an undertaking subject to the provisions of Section 106 of the National Historic Preservation Act and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800. This letter invites your organization to participate in the Section 106 consultation process for the Project as a consulting party.

Project Description
The Project would extend Link light rail service 11.8 miles from downtown Seattle to both West Seattle and Ballard (see enclosed Project Vicinity Maps). The Project includes light rail guideway with elevated, at-grade, and tunnel profiles. It also includes 14 stations that would either be elevated, at-grade, or in a tunnel. The stations would serve the following areas in Seattle: Alaska Junction, Avalon, Delridge, SODO, the sports stadiums, Chinatown/International District, Midtown, Westlake, Denny, South Lake Union, Seattle Center, Smith Cove, Interbay, and Ballard.
Area of Potential Effects
The Area of Potential Effects (APE) for the Project is illustrated in the enclosed APE Map Set. The APE includes all areas where ground disturbance may occur, including excavation, grading, curb removal, utilities, etc. The APE includes areas where stations, transit centers, and other improvements are planned. It also includes possible construction staging areas.

The APE also includes areas where the potential exists for historic properties to be indirectly affected by the Project. Where station construction, signal upgrades, and other highly visible improvements are planned, the APE extends on either side of the right-of-way to the nearest tax parcel, or to a maximum of 200 feet where large tax parcels are adjacent to Project elements. The APE is larger in the following areas, to account for potential visual effects:

- Salmon Bay, where some Project alternatives include a high-level fixed bridge, the APE extends 0.25 mile from the center of the proposed high-level bridges at 14th Avenue NW and 15th Avenue NW. It also extends to parcels on the southwest side of the Ballard Bridge (between 21st Avenue West and the shoreline, north of West Nickerson Street) and includes all of Fishermen's Terminal.
- SW Genesee Street between 26th Avenue SW and 30th Avenue SW, where one Project alternative includes high guideway height, the APE extends to two parcels to the north of SW Genesee Street.
- SODO, where some of the Project alternatives would reconstruct South Holgate Street and South Lander Street to cross over the existing and proposed light rail alignments, the APE extends one additional parcel from the guideway.

A survey for historic resources is currently underway to identify buildings, structures, sites, objects, and districts constructed in 1980 or earlier that are within the APE or on parcels crossed by the APE, and to assess their potential to be affected by the Project. Historic resources identified during the survey will be documented in the Washington Information System for Architectural and Archaeological Records Data (WISAARD) database, and evaluated for eligibility for listing on the National Register of Historic Places (NRHP).

An archaeological survey will also be conducted within the APE that includes a pedestrian survey and shovel testing to identify and assess the potential for intact archaeological deposits. Shovel testing will be focused where ground disturbance is planned in areas that have not been previously disturbed. Where archaeological high-probability areas identified within the APE cannot be tested prior to Project construction, archaeological monitoring during construction will be recommended.

Consulting Party Role
FTA invites your organization to participate as a consulting party because you may have a demonstrated interest in the Project and in its potential effects on historic and cultural properties. As you may know, Section 106 is a process that may not result in preservation in all instances but seeks to balance a full range of public values and perspectives to avoid, minimize, or mitigate adverse effects on historic properties. Consulting party status entitles you to comment on aspects of the Project that would potentially affect historic properties. As a consulting party, you would receive information about historic properties within the APE, and potential effects to those
properties in which you may have an interest. Properties of interest include those buildings, structures, objects, sites, and districts that are either listed, or eligible for listing, on the NRHP.

If you elect to participate as a consulting party, please inform FTA of your decision and provide any comments on the APE within 30 days of receipt of this letter. Should you require additional information or have questions, please contact Mark Assam at 206-220-4465 or mark.assam@dot.gov.

Thank you for your interest in the Project.

Sincerely,

Linda M. Gehrke
Regional Administrator

Subject: Sound Transit  
West Seattle and Ballard Link Extensions Project  
National Historic Preservation Act, Section 106  
Consulting Party Invitation

Dear Mr. Lum:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is proposing the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area, in Seattle, King County, Washington. Sound Transit intends to apply for federal funds administered by FTA for the Project, making it an undertaking subject to the provisions of Section 106 of the National Historic Preservation Act and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800. This letter invites your organization to participate in the Section 106 consultation process for the Project as a consulting party.

Project Description
The Project would extend Link light rail service 11.8 miles from downtown Seattle to both West Seattle and Ballard (see enclosed Project Vicinity Maps). The Project includes light rail guideway with elevated, at-grade, and tunnel profiles. It also includes 14 stations that would either be elevated, at-grade, or in a tunnel. The stations would serve the following areas in Seattle: Alaska Junction, Avalon, Delridge, SODO, the sports stadiums, Chinatown/International District, Midtown, Westlake, Denny, South Lake Union, Seattle Center, Smith Cove, Interbay, and Ballard.
Area of Potential Effects
The Area of Potential Effects (APE) for the Project is illustrated in the enclosed APE Map Set. The APE includes all areas where ground disturbance may occur, including excavation, grading, curb removal, utilities, etc. The APE includes areas where stations, transit centers, and other improvements are planned. It also includes possible construction staging areas.

The APE also includes areas where the potential exists for historic properties to be indirectly affected by the Project. Where station construction, signal upgrades, and other highly visible improvements are planned, the APE extends on either side of the right-of-way to the nearest tax parcel, or to a maximum of 200 feet where large tax parcels are adjacent to Project elements. The APE is larger in the following areas, to account for potential visual effects:

- Salmon Bay, where some Project alternatives include a high-level fixed bridge, the APE extends 0.25 mile from the center of the proposed high-level bridges at 14th Avenue NW and 15th Avenue NW. It also extends to parcels on the southwest side of the Ballard Bridge (between 21st Avenue West and the shoreline, north of West Nickerson Street) and includes all of Fishermen's Terminal.
- SW Genesee Street between 26th Avenue SW and 30th Avenue SW, where one Project alternative includes high guideway height, the APE extends to two parcels to the north of SW Genesee Street.
- SODO, where some of the Project alternatives would reconstruct South Holgate Street and South Lander Street to cross over the existing and proposed light rail alignments, the APE extends one additional parcel from the guideway.

A survey for historic resources is currently underway to identify buildings, structures, sites, objects, and districts constructed in 1980 or earlier that are within the APE or on parcels crossed by the APE, and to assess their potential to be affected by the Project. Historic resources identified during the survey will be documented in the Washington Information System for Architectural and Archaeological Records Data (WISAARD) database, and evaluated for eligibility for listing on the National Register of Historic Places (NRHP).

An archaeological survey will also be conducted within the APE that includes a pedestrian survey and shovel testing to identify and assess the potential for intact archaeological deposits. Shovel testing will be focused where ground disturbance is planned in areas that have not been previously disturbed. Where archaeological high-probability areas identified within the APE cannot be tested prior to Project construction, archaeological monitoring during construction will be recommended.

Consulting Party Role
FTA invites your organization to participate as a consulting party because you may have a demonstrated interest in the Project and in its potential effects on historic and cultural properties. As you may know, Section 106 is a process that may not result in preservation in all instances but seeks to balance a full range of public values and perspectives to avoid, minimize, or mitigate adverse effects on historic properties. Consulting party status entitles you to comment on aspects of the Project that would potentially affect historic properties. As a consulting party, you would receive information about historic properties within the APE, and potential effects to those
properties in which you may have an interest. Properties of interest include those buildings, structures, objects, sites, and districts that are either listed, or eligible for listing, on the NRHP.

If you elect to participate as a consulting party, please inform FTA of your decision and provide any comments on the APE within 30 days of receipt of this letter. Should you require additional information or have questions, please contact Mark Assam at 206-220-4465 or mark.assam@dot.gov.

Thank you for your interest in the Project.

Sincerely,

Linda M. Gehrke

Request to be Consulting Party to Section 106 NHPA process for West Seattle and Ballard Link Extensions Project, and comments on the Area of Potential Effect

Dear Ms. Gehrke and Mr. Assam,

This letter is submitted on behalf of InterIm Community Development Association (ICDA). We would like to participate in the upcoming Section 106 consultation for the West Seattle to Ballard Link Extension Project (“WSBLE”).

We reviewed the Area of Potential Effect (APE) provided in the maps distributed along with the consultation invitation letter dated August 31, 2020, and request that FTA and Sound Transit expand the APE to include the following areas:

- The entirety of the Pioneer Square-Skid Road Historic District (PSSRHD)
- The entirety of the International Special Review District of the Seattle Chinatown International District neighborhood (ISRD district)
- Potential haul routes for the West Seattle and Ballard Link Extension project

We would like to emphasize that we own two National Landmark Historic buildings which do not fall within the current boundaries.

- The Eastern Hotel, 506 Maynard Ave South, Seattle WA 98104
- The Northern Pacific Hotel, 306 6th Ave South, Seattle WA 98104

Additionally, we have provided consultation services to various other buildings and organizations in the Chinatown-International District over our more than fifty years serving the community. We also provide services to a wide array of residents who live in a wide array of buildings, a vast majority of which are in the Historic District and which are Historic buildings.

There are many public works projects which the historic properties in our district have been subjected to recently. This includes the Colman Dock, SR 520, Alaskan Way Viaduct Replacement, First Hill Streetcar, East Link, and more. These historic resources ability to withstand these public projects is because of provided mitigation through Section 106.
Projects of this scale cause much wider effects than the immediate zone of the construction outlined in your maps. Long term infrastructure projects in the Seattle area, with construction timelines beyond five years’ time, come with extended long-term impacts to resources that live well beyond a construction fence.

Regardless of if 4th or 5th ave is chosen for alignment, Sound Transit will likely need to use 4th ave, 5th ave, Yesler Way, or Alaskan Way to haul away dirt and other materials. This construction traffic could coincide with rush hour, stadium traffic, holiday traffic, or some combination of all of them. Any combination would make getting in and out of the area difficult if not impossible, and so would certainly harm the historic assets that exist beyond the project footprint, including upon organizations like ourselves. Additionally, the dust, noise, and pollution from construction activity would further impact the historic assets in the wider community. These harms would decrease the sustainability of the historic properties that are beyond your current impacted area.

In closing, we are asking to be included as a Section 106 Consulting Party, and furthermore we are asking that the impacted zone for this project be expanded to include the PSSRHD and ISRD areas. We would like to truly mitigate the harm that will come to historic properties in these historic neighborhoods.

Thank you and I hope to hear back soon,

Derek Lum, MSW

Hi Mark,
I’m just writing to confirm that the Southwest Seattle Historical Society would like to accept the invitation to serve as a consulting party for the West Seattle and Ballard Link Extension Project. We will follow up with comments very soon.

Thanks again for your help with this.

With best wishes,

Michael

Dear Ms. Sodt:

Thank you for accepting the invitation to be a Section 106 Consulting Party for the Sound Transit - West Seattle and Ballard Link Extensions Project. The Federal Transit Administration (FTA) and Sound Transit plan to hold a virtual kickoff meeting on March 30, 2021 from 1:00 PM to 2:30 PM. The purpose of this meeting is to:

- Kickoff the Section 106 consultation process with the additional Consulting Parties
- Outline the Section 106 consultation process and roles
- Review Consulting Party feedback already received on the Area of Potential Effects (APE)
- Provide Consulting Parties the opportunity to provide additional input or identify concerns regarding the APE

Please look for an e-mailed meeting invitation from Sound Transit inviting you to attend using a Microsoft Teams link.

In preparation for the meeting and our upcoming consultation process, we have prepared a “Section 106 Additional Consulting Parties Coordination Plan” for your review prior to the meeting. A copy of this plan is attached to this e-mail.

We understand that not everyone will be able to attend the kickoff meeting. FTA and Sound Transit will be happy to follow up individually with those who cannot make the meeting. A meeting summary will also be provided to all Consulting Parties after the meeting.

Please let me know if you have questions.

Thanks,

Dear Ms. Murphy:

As described in the distribution e-mail below, FTA and Sound Transit will be hosting a virtual kickoff meeting for organizations that FTA has invited to be Section 106 additional Consulting Parties for the Sound Transit - West Seattle and Ballard Link Extensions Project. The meeting will focus on providing an overview of the Section 106 process, additional Consulting Party roles, and the Area of Potential Effects. I wanted to make sure that you were aware of this meeting, and invite you to attend if you are interested. If you are interested in attending, please reply to me and I will see that you are sent the invitation e-mail by Sound Transit with the meeting link.

FTA will of course continue to conduct individual government-to-government consultation with your Tribe on the project.

Please let me know if you have questions.

Thanks,

Mark A. Assam, AICP

From: Assam, Mark (FTA)
Sent: Monday, March 22, 2021 8:00 AM
To: CONSULTING PARTIES
Subject: Sound Transit - West Seattle and Ballard Link Extensions Project - NHPA Section 106 Consulting Party Kickoff Meeting Notice and Coordination Plan

Dear RECIPIENT:

Thank you for accepting the invitation to be a Section 106 Consulting Party for the Sound Transit -
West Seattle and Ballard Link Extensions Project. The Federal Transit Administration (FTA) and Sound Transit plan to hold a virtual kickoff meeting on **March 30, 2021 from 1:00 PM to 2:30 PM**. The purpose of this meeting is to:

- Kickoff the Section 106 consultation process with the additional Consulting Parties
- Outline the Section 106 consultation process and roles
- Review Consulting Party feedback already received on the Area of Potential Effects (APE)
- Provide Consulting Parties the opportunity to provide additional input or identify concerns regarding the APE

Please look for an e-mailed meeting invitation from Sound Transit inviting you to attend using a Microsoft Teams link.

In preparation for the meeting and our upcoming consultation process, we have prepared a “**Section 106 Additional Consulting Parties Coordination Plan**” for your review prior to the meeting. A copy of this plan is attached to this e-mail.

We understand that not everyone will be able to attend the kickoff meeting. FTA and Sound Transit will be happy to follow up individually with those who cannot make the meeting. A meeting summary will also be provided to all Consulting Parties after the meeting.

Please let me know if you have questions.

Thanks,

Mark A. Assam, AICP

March 25, 2021

Eugenia Woo  
Director of Preservation Services  
Historic Seattle  
1117 Minor Avenue  
Seattle, WA 98101

Subject:  Sound Transit  
West Seattle and Ballard Link Extensions Project  
National Historic Preservation Act, Section 106  
Area of Potential Effects Amendment  
SHPO Project Tracking Code: 2019-02-01457

Dear Ms. Woo:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. FTA invited your organization to participate in the Section 106 consultation process for the Project as a Consulting Party, and requested comments on the proposed Area of Potential Effects (APE) in correspondence dated August 31, 2020. Since that time, the Project design has advanced, and Sound Transit has better defined the proposed station locations, station areas, and other Project elements, which require an amendment to the Project APE. This letter requests comments on the amended APE.

The enclosed APE Map Set (which includes Project vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision. As mentioned above, the APE boundary has been revised to address updated proposed station locations, station areas, and other Project elements. In most areas of the Project corridor, this revision resulted in an enlargement of the APE.
FTA acknowledges that Consulting Party feedback already provided on the APE boundary has not yet been addressed, and is not reflected in the current APE amendment. FTA wants Consulting Parties to be aware of the current proposed revisions to the APE, which primarily address updated design information, in advance of the Consulting Parties kick-off meeting, which is scheduled for March 30, 2021. One of the key topics for the kick-off meeting is the previously received Consulting Party feedback on the APE boundary. In particular, FTA wants to learn more about Consulting Party concerns regarding the extent of the APE in designated historic districts, as well as consideration of construction haul routes.

FTA looks forward to meeting with you to discuss the Project and the Section 106 process. Pursuant to 36 CFR Part 800, if you have any additional comments on the amended APE, please provide them within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

LINDA M. GEHRKE

Subject: Sound Transit  
West Seattle and Ballard Link Extensions Project  
National Historic Preservation Act, Section 106  
Area of Potential Effects Amendment  
SHPO Project Tracking Code: 2019-02-01457

Dear Ms. Meisner:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. FTA invited your organization to participate in the Section 106 consultation process for the Project as a Consulting Party, and requested comments on the proposed Area of Potential Effects (APE) in correspondence dated August 31, 2020. Since that time, the Project design has advanced, and Sound Transit has better defined the proposed station locations, station areas, and other Project elements, which require an amendment to the Project APE. This letter requests comments on the amended APE.

The enclosed APE Map Set (which includes Project vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision. As mentioned above, the APE boundary has been revised to address updated proposed station locations, station areas, and other Project elements. In most areas of the Project corridor, this revision resulted in an enlargement of the APE.
FTA acknowledges that Consulting Party feedback already provided on the APE boundary has not yet been addressed, and is not reflected in the current APE amendment. FTA wants Consulting Parties to be aware of the current proposed revisions to the APE, which primarily address updated design information, in advance of the Consulting Parties kick-off meeting, which is scheduled for March 30, 2021. One of the key topics for the kick-off meeting is the previously received Consulting Party feedback on the APE boundary. In particular, FTA wants to learn more about Consulting Party concerns regarding the extent of the APE in designated historic districts, as well as consideration of construction haul routes.

FTA looks forward to meeting with you to discuss the Project and the Section 106 process. Pursuant to 36 CFR Part 800, if you have any additional comments on the amended APE, please provide them within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

Linda M. Gehrke
Regional Administrator

Dear Mr. Smith:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. FTA invited your organization to participate in the Section 106 consultation process for the Project as a Consulting Party, and requested comments on the proposed Area of Potential Effects (APE) in correspondence dated August 31, 2020. Since that time, the Project design has advanced, and Sound Transit has better defined the proposed station locations, station areas, and other Project elements, which require an amendment to the Project APE. This letter requests comments on the amended APE.

The enclosed APE Map Set (which includes Project vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision. As mentioned above, the APE boundary has been revised to address updated proposed station locations, station areas, and other Project elements. In most areas of the Project corridor, this revision resulted in an enlargement of the APE.
FTA acknowledges that Consulting Party feedback already provided on the APE boundary has not yet been addressed, and is not reflected in the current APE amendment. FTA wants Consulting Parties to be aware of the current proposed revisions to the APE, which primarily address updated design information, in advance of the Consulting Parties kick-off meeting, which is scheduled for March 30, 2021. One of the key topics for the kick-off meeting is the previously received Consulting Party feedback on the APE boundary. In particular, FTA wants to learn more about Consulting Party concerns regarding the extent of the APE in designated historic districts, as well as consideration of construction haul routes.

FTA looks forward to meeting with you to discuss the Project and the Section 106 process. Pursuant to 36 CFR Part 800, if you have any additional comments on the amended APE, please provide them within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, and the National Environmental Policy Act (NEPA), and its implementing regulations at 23 CFR Part 771, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses elements of both the Section 106 consultation process, and the NEPA Environmental Impact Statement (EIS) review process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online documents provided in the enclosed Summary of Sound Transit - West Seattle and Ballard Link Extensions Project Documents.

Section 106 Consultation

- **Area of Potential Effects (APE) Definition and Proposed Amendment:** FTA invites you to review the summary of the Project APE, and to provide feedback on the proposed APE boundary revision.
• **Cultural Resources Survey and Inventory Plan (Plan):** This Plan was previously transmitted to your Tribe in correspondence dated February 12, 2020. FTA is providing the Plan to you again for review alongside the amended APE, and notes that it has not changed since the February 12, 2020 version.

**NEPA EIS Review and Related Updates**

• **Administrative Draft EIS:** FTA invites you to participate in an early review of the Administrative Draft EIS and associated technical appendices prior to publication of the documents for widespread agency and public comment.

• **Updated EIS Methodologies:** An updated, comprehensive set of EIS methodologies is being shared with you that reflects comments from Cooperating and Participating Agencies.

• **Updated Agency and Tribal Coordination Plan:** An updated coordination plan is being shared with you that reflects the updated Project schedule.

Pursuant to the Section 106 regulations at 36 CFR Part 800, FTA invites your comments on the APE amendment and Cultural Resources Survey and Inventory Plan within 30 days of receipt of this letter. Pursuant to the NEPA regulations at 23 CFR Part 771, FTA invites your comments on the Administrative Draft EIS within 45 days of receipt of this letter.

If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

SHPO Project Tracking Code: 2019-02-01457

Dear Chairwoman Gobin:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, and the National Environmental Policy Act (NEPA), and its implementing regulations at 23 CFR Part 771, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses elements of both the Section 106 consultation process, and the NEPA Environmental Impact Statement (EIS) review process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online documents provided in the enclosed Summary of Sound Transit - West Seattle and Ballard Link Extensions Project Documents.

Section 106 Consultation

- **Area of Potential Effects (APE) Definition and Proposed Amendment:** FTA invites you to review the summary of the Project APE, and to provide feedback on the proposed APE boundary revision.
• **Cultural Resources Survey and Inventory Plan (Plan):** This Plan was previously transmitted to your Tribe in correspondence dated February 12, 2020. FTA is providing the Plan to you again for review alongside the amended APE, and notes that it has not changed since the February 12, 2020 version.

**NEPA EIS Review and Related Updates**

- **Administrative Draft EIS:** FTA invites you to participate in an early review of the Administrative Draft EIS and associated technical appendices prior to publication of the documents for widespread agency and public comment.
- **Updated EIS Methodologies:** An updated, comprehensive set of EIS methodologies is being shared with you that reflects comments from Cooperating and Participating Agencies.
- **Updated Agency and Tribal Coordination Plan:** An updated coordination plan is being shared with you that reflects the updated Project schedule.

Pursuant to the Section 106 regulations at 36 CFR Part 800, FTA invites your comments on the APE amendment and Cultural Resources Survey and Inventory Plan within 30 days of receipt of this letter. Pursuant to the NEPA regulations at 23 CFR Part 771, FTA invites your comments on the Administrative Draft EIS within 45 days of receipt of this letter.

If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

LINDA M GEHRKE
Regional Administrator

Re: Revised APE Concur

Dear Ms. Gehrke:

Thank you for contacting the State Historic Preservation Officer (SHPO) and Department of Archaeology and Historic Preservation (DAHP) regarding the above referenced project. In response, we have reviewed your description and map of the revised area of potential effect (APE).

We concur with your definition of the revised APE. These comments are based on the information available at the time of this review and on behalf of the SHPO in conformance with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR 800. Should additional information about the project become available, our assessment may be revised.

Thank you for the opportunity to review and comment. If you have any questions, please feel free to contact me.

Sincerely,

Dennis Wardlaw

Honorable Cecile Hansen
Tribal Chair
Duwamish Tribe
4708 W Marginal Way SW
Seattle, WA 98106

Subject: Sound Transit West Seattle and Ballard Link Extensions Project, National Historic Preservation Act, Section 106 Area of Potential Effect, Cultural Resources Technical Report, Agency and Tribal Coordination plan, and, NEPA EIS Methodologies

Dear Chairwoman Hansen:

I am writing this letter to the Duwamish Tribe on behalf of Sound Transit’s Tribal Relations Program and the West Seattle and Ballard Link Extensions Project (Project). As you are aware, in February of 2018 Sound Transit invited the Duwamish Tribe to be a participating party in the environmental review and Section 106 process for the Project (please see the attached Project engagement information). This letter is a continuation of the engagement on the project initiated in 2018.

This letter is to follow up in order to provide you with updated project specific information and includes:

1) **A definition of the Area of Potential Effects (APE)** – Sound Transit invites you to review the APE and provide feedback on the proposed APE revisions.

2) **Historic and Archaeological Resources Technical Report** – This technical report includes information on early phases of cultural resources work which will inform the Environmental Impact Statement (EIS) for the Project.

3) **Updated Agency and Tribal Coordination Plan** – This plan identifies key coordination points to solicit continued feedback on the Project during environmental review. It has been updated to provide consistency with the Draft EIS content as well as reflect updated schedule, completed activities and coordination with Tribes and agencies.

4) **Updated Environmental Impact Statement (EIS) Methodologies** - This technical memorandum provides a comprehensive set of methodologies for the EIS which have been updated to reflect comments Sound Transit has received.

These materials may be accessed via Sound Transit’s OneDrive site created specifically for this coordination. This site may be accessed via [https://soundtransit](https://soundtransit)
If there are any questions about this transmittal, or if you would like information on the project schedule, please contact me: Dezerae Hayes – Sound Transit’s Director of Tribal Relations by phone at: 253-509-3806 or via email at: Dezerae.hayes@soundtransit.org.

Thank you in advance for your collaboration.

Sincerely,

Dezerae Hayes
Director of Tribal Relations

InterIm CDA Section 106 Consultation Comments

Dear Mr Assam,

We are writing to you as a part of our consultancy in the Section 106 process of the West Seattle to Ballard Link Extension Project (WSBLE). In a recent meeting you invited consultants to provide feedback on the adequacy of the WSBLE Area of Project Effect (APE). I am writing you to educate you on the historical nature of the buildings outside of the already chosen APE.

This project poses both direct and indirect threats to our historic properties throughout the area. Some of these direct impacts include noise and dust. Some of the indirect effects is customers being driven away from the stores that support these buildings’ mortgages. The indirect effects can also include resident’s being driven away because of the direct effects mentioned. This could lead to the building losing rents and so further harming the historic properties and their owner’s ability to sustain them. Finally, this transportation project will further increase property values in the area and drive further development. These properties could face increased neglect as owners see the property value rise and make plans to neglect long needed repairs in the hopes of selling.

For instance, there are 32 historic buildings that have 116 business tenants in them. Many of the business tenants’ customers rely on being able to get to and park in the general area of the shops they would like to patronize. Not being able to do so due to bad traffic or a lack of parking due to WSBLE construction would lose these businesses customers, which would certainly jeopardize the sustainability of the historic properties the businesses are located in. It is important to remember that these customers do have other options, as Chinatown-ID no longer has a monopoly as a source of Asian food.

Amongst the same 32 buildings, there are about 1,261 low to moderate income people living in them. The noise, dust, further lack of parking space for their cars, and additional air pollution both directly and indirectly from construction activity will make the Chinatown-International District a less desirable place for these folks to live during this construction. Some of them will be displaced by this activity, further adding to a log arc of government activities and private
forces displacing community members.

Finally, the addition of more transit connections will spur development in a district that is already going through gentrification, which has caused property values to skyrocket. If one looks at property value trends for various properties in the area, the price of land has doubled since 2016. This gentrification and displacement can be seen through the clearing of the Eclipse and Republic hotels. It could also be seen through the significant remodel and clearing of the Publix, and the significant re-modeling and rent increases at the former International Apartments. There are 383 lower income residents living in historic buildings which are at risk of re-development or are otherwise unregulated and could have their rents raised.

We expect the FTA to include the attached list of buildings as a part of the APE. They are all historic in nature and damage to them will need to be mitigated as property owners experience sustainability issues from both residents leaving and businesses losing income. Additionally, the risk of increased development would work to further harm some of these historic assets, as property owners potentially neglect long needed repair with the plans of selling soon, or potentially developers redevelop these properties in insensitive ways compared to their historic nature.

Please let me know if you have any questions. My phone number is 206-962-1574 and email is dlum@interimcdca.org.

Allyson Brooks, Ph.D.
State Historic Preservation Officer
Washington Department of Archaeology and Historic Preservation
P.O. Box 48343
Olympia, WA 98504-8343

Subject: Sound Transit
West Seattle and Ballard Link Extensions Project
National Historic Preservation Act, Section 106
Area of Potential Effects Amendment, and Eligibility Determination
SHPO Project Tracking Code: 2019-02-01457

Dear Dr. Brooks:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation with the Washington State Historic Preservation Officer (SHPO) under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses two elements of the Section 106 consultation process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online enclosure documents provided in the enclosed Summary of Documents for the West Seattle and Ballard Link Extensions Project, August 2021.

- **Area of Potential Effects (APE) Amendment:** On March 25, 2021, in correspondence to SHPO, FTA defined a revised APE boundary. SHPO agreed with the amended APE in correspondence to FTA dated March 26, 2021. Since that time, the Project design has continued to advance, and Sound Transit has recently identified two new construction elements that have been incorporated into the Project, i.e., the temporary relocation of a King County Metro trolley line, and the relocation of a 230-kilovolt power line. Incorporation of these new construction elements into the Project requires a new
amendment to the Project APE. The enclosed APE Map Set (which includes Project vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision.

- **National Register of Historic Places (NRHP) Eligibility Determination:** FTA recognizes the extensive coordination that has occurred with SHPO and Sound Transit on the informal review of Project Historic Property Inventory (HPI) forms and property eligibility recommendations, including the accompanying historic context statements for each segment of the Project. With this letter, FTA is requesting formal SHPO review of the NRHP eligibility determinations for the built environment resources that have been evaluated to date.

Based on the documentation provided through the electronic links described above and identified as enclosures below, FTA has made the following determinations:

- **APE Amendment:** The APE boundary for the Project is amended to include the limits of the recently identified construction elements that have been incorporated into the Project, as depicted on the enclosed APE Map Set.
- **Eligibility Determination:** There are 290 resources listed on, or eligible for, the NRHP within the Project APE, as identified on the enclosed NRHP Eligibility Determination and Concurrence Tracking Sheet and the NRHP Eligibility Map Set. (Please note, this eligibility determination refers to the March 25, 2021 version of the APE. The areas within the APE amendment addressed in this letter will be surveyed for historic properties after SHPO, Tribes, and additional consulting parties have an opportunity to comment on the APE amendment.)

Pursuant to 36 CFR Part 800, FTA invites your comments on the amended APE, and requests SHPO concurrence with the eligibility determination, within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

Linda M. Gehrke

Re: Revised APE Comments

Dear Ms. Gehrke:

Thank you for contacting the State Historic Preservation Officer (SHPO) and Department of Archaeology and Historic Preservation (DAHP) regarding the above referenced project. In response, we have reviewed your description and map of the revised area of potential effect (APE).

Based upon the documentation provided and conversations with consulting parties, we conditionally concur with your definition of the Revised APE with the understanding that important additional information will be forthcoming. Specifically, the SHPO is requesting information on the extent of vibration impacts to Historic Properties; the proposed haul routes through historic districts; the location of construction activities such as staging areas; traffic diversions, easements, etc.; the involvement and/or delegation of any Section 106 responsibilities to other Federal Agencies such as the U.S Coast Guard, and; all information on responses from Interested Tribes to the initial and subsequent APE submittals.

These comments are based on the information available at the time of this review and on behalf of the SHPO in conformance with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR 800. Should additional information about the project become available, our assessment may be revised.

Thank you for the opportunity to review and comment. Please ensure that the DAHP Project Number (a.k.a. Project Tracking Code) is shared with any hired cultural resource consultants and is attached to any communications or submitted reports. If you have any questions, please feel free to contact me.

Sincerely,

Dennis Wardlaw

Subject: Sound Transit
West Seattle and Ballard Link Extensions Project
National Historic Preservation Act, Section 106
Area of Potential Effects Amendment, and Eligibility Determination
SHPO Project Tracking Code: 2019-02-01457

Dear Ms. Woo:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses two elements of the Section 106 consultation process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online enclosure documents provided in the enclosed Summary of Documents for the West Seattle and Ballard Link Extensions Project, August 2021.

- **Area of Potential Effects (APE) Amendment:** On March 25, 2021, in correspondence to your organization, FTA defined a revised APE boundary. Since that time, the Project design has continued to advance, and Sound Transit has recently identified two new construction elements that have been incorporated into the Project, i.e., the temporary relocation of a King County Metro trolley line, and the relocation of a 230-kilovolt power line. Incorporation of these new construction elements into the Project requires a new amendment to the Project APE. The enclosed APE Map Set (which includes Project
vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision.

- **National Register of Historic Places (NRHP) Eligibility Determination:** FTA has worked with Sound Transit and the Washington State Historic Preservation Officer (SHPO) to develop Historic Property Inventory (HPI) forms for built environment resources within the APE. For each of these resources, FTA has also made determinations of eligibility for the NRHP. This documentation is enclosed with this letter for your review.

Based on the documentation provided through the electronic links described above and identified as enclosures below, FTA has made the following determinations:

- **APE Amendment:** The APE boundary for the Project is amended to include the limits of the recently identified construction elements that have been incorporated into the Project, as depicted on the enclosed APE Map Set.

- **Eligibility Determination:** There are 290 resources listed on, or eligible for, the NRHP within the Project APE, as identified on the enclosed NRHP Eligibility Determination Comment Sheet and the NRHP Eligibility Map Set. (Please note, this eligibility determination refers to the March 25, 2021 version of the APE. The areas within the APE amendment addressed in this letter will be surveyed for historic properties after SHPO, Tribes, and additional consulting parties have an opportunity to comment on the APE amendment.)

Pursuant to 36 CFR Part 800, FTA invites your comments on the amended APE and eligibility determination, within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sarah Sodt
City Historic Preservation Officer
City of Seattle Historic Preservation Office
P.O. Box 94649
Seattle, WA 98124-4649

Subject: Sound Transit
West Seattle and Ballard Link Extensions Project
National Historic Preservation Act, Section 106
Area of Potential Effects Amendment, and Eligibility Determination
SHPO Project Tracking Code: 2019-02-01457

Dear Ms. Sodt:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses two elements of the Section 106 consultation process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online enclosure documents provided in the enclosed Summary of Documents for the West Seattle and Ballard Link Extensions Project, August 2021.

- **Area of Potential Effects (APE) Amendment**: On March 25, 2021, in correspondence to your organization, FTA defined a revised APE boundary. Since that time, the Project design has continued to advance, and Sound Transit has recently identified two new construction elements that have been incorporated into the Project, i.e., the temporary relocation of a King County Metro trolley line, and the relocation of a 230-kilovolt power line. Incorporation of these new construction elements into the Project requires a new amendment to the Project APE. The enclosed APE Map Set (which includes Project...
vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision.

- **National Register of Historic Places (NRHP) Eligibility Determination:** FTA has worked with Sound Transit and the Washington State Historic Preservation Officer (SHPO) to develop Historic Property Inventory (HPI) forms for built environment resources within the APE. For each of these resources, FTA has also made determinations of eligibility for the NRHP. This documentation is enclosed with this letter for your review.

Based on the documentation provided through the electronic links described above and identified as enclosures below, FTA has made the following determinations:

- **APE Amendment:** The APE boundary for the Project is amended to include the limits of the recently identified construction elements that have been incorporated into the Project, as depicted on the enclosed APE Map Set.

- **Eligibility Determination:** There are 290 resources listed on, or eligible for, the NRHP within the Project APE, as identified on the enclosed NRHP Eligibility Determination Comment Sheet and the NRHP Eligibility Map Set. (Please note, this eligibility determination refers to the March 25, 2021 version of the APE. The areas within the APE amendment addressed in this letter will be surveyed for historic properties after SHPO, Tribes, and additional consulting parties have an opportunity to comment on the APE amendment.)

Pursuant to 36 CFR Part 800, FTA invites your comments on the amended APE and eligibility determination, within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

LINDA M. GEHRKE
Regional Administrator

Area of Potential Effects Amendment and Map Set
On March 25, 2021, FTA defined a revised Area of Potential Effects (APE) for the West Seattle and Ballard Link Extensions Project (Project). The Washington State Historic Preservation Officer (SHPO) agreed with the revised APE on March 26, 2021. Since then, the Project design has continued to advance, and Sound Transit has identified two new construction elements that required additional revisions to the APE:

- Temporary relocation of the King County Metro trolley line in the area of South Jackson Street to South Royal Brougham Way, approximately between Maynard Avenue South and Interstate 5/9th Avenue South, within the Chinatown-International District segment
- Relocation of a 230-kilovolt power line along 6th Avenue South and Diagonal Avenue, south of South Spokane Street, leading to the Seattle City Light Substation within the Duwamish segment

Cultural resources within the areas of the revised APE will be inventoried after the APE amendment has been reviewed by SHPO, Tribes, and additional consulting parties.

FTA also received comments on the APE from additional consulting parties. Many of these comments requested that the Seattle Chinatown Historic District, the Pioneer Square-Skid Road Historic District, and the Seattle Center Campus in their entirety be included within the APE. FTA has decided not to expand the APE to incorporate the entirety of these historic districts or the Seattle Center Campus, as such an expansion would be inconsistent with the methodology used to define the original APE, as disclosed in the Section 106 initiation letters to SHPO and Tribes, and the consulting party invitation letters. This methodology was developed to closely align with the APE definition in 36 Code of Federal Regulations (CFR) Part 800.16(d), and FTA’s Environmental Standard Operating Procedure Number 21 on the Section 106 Process. FTA acknowledges the concerns raised by the consulting parties regarding Project effects on historic buildings in these areas. FTA would like to emphasize that no adverse effects are
anticipated on individual historic properties outside the currently defined APE. It should also be noted that under Section 106, adverse effects to resources within the APE that are contributing resources to a historic district, are treated as adverse effects on that entire historic district. Consequently, mitigation measures for these adverse effects on contributing resources will address effects on the entire district as well, not just the contributing resources identified within the APE.

Other comments from additional consulting parties requested the inclusion of haul routes within the APE and expressed concern over potential economic and traffic impacts resulting from use of haul routes for the Project. Potential haul routes used temporarily during construction would be existing, heavily used public rights-of-way. Detours and haul routes used temporarily during construction were not included in the APE because of the existing Project environment. These routes would use existing, heavily used public rights-of-way, and therefore are not anticipated to have effects on historic properties. However, it should be noted that economic and traffic impacts resulting from the Project are being analyzed separately in the Draft Environmental Impact Statement (EIS), which FTA and Sound Transit anticipate publishing later this fall.

After considering new Project construction elements and additional consulting party comments, FTA revised the APE. The APE Map Set (which includes Project vicinity maps and detailed APE maps) shows both the March 25, 2021 APE and the proposed APE revision.

**Historic Property Inventory Forms and National Register of Historic Places Eligibility**

FTA and Sound Transit appreciate the extensive coordination with the SHPO built environment staff on the Project Historic Property Inventory (HPI) forms and National Register of Historic Places (NRHP) eligibility evaluations. As shown in Table 1, FTA and Sound Transit provided draft HPI forms for informal SHPO review. SHPO, FTA, and Sound Transit discussed SHPO comments in a series of six workshops, held on May 4, 10, 27, June 1, 10, and 24, 2021. These workshops were conducted primarily with Sound Transit and its consultants, and included FTA. During these meetings Sound Transit documented SHPO comments and how these comments were addressed.

In addition to the informal review of HPI forms, on March 29, 2021, FTA transmitted the *West Seattle and Ballard Link Extensions Historic Context and National Register of Historic Places Criterion A Eligibility Requirements* document, as discussed with SHPO staff in previous meetings. This document was developed to establish a basis for NRHP eligibility evaluations for all NRHP criteria, and specifically focused on Criterion A.

The website (accessed by the links above) includes 1,291 HPI forms, which have also been uploaded to the Washington Information System for Architectural and Archaeological Records Database (WISAARD). As discussed with SHPO built environment staff, the HPI forms have been reorganized from the previous “Batch” structure into “Segments” that correspond to geographic Project segments used for discussion in the Project EIS.

**NRHP Eligibility Map Set**

The NRHP Eligibility Map Set is a series of maps that include a unique property identification number (WSBLE ID # [see below]) and FTA’s formal NRHP eligibility determinations for built environment resources within the March 25, 2021 APE. The Map Set also includes NRHP eligibility information for resources where NRHP status has been established and is not modified by the Project.

**NRHP Eligibility SHPO Informal Review Tracking Sheet**

This Excel-based tracking sheet includes the history of SHPO review comments on HPI forms provided during the informal review process, including the workshops outlined in Table 1. This tracking sheet is provided as a record of continued consultation and outcomes of that process.

**NRHP Eligibility Determination and Concurrence Tracking Sheet**

This Excel-based tracking sheet facilitates formal review and continued consultation on NRHP eligibility and includes the following headings:

- **WSBLE ID #** – Individual numerical identification for each resource within the WSBLE dataset
- **Sub ID** – If a property includes multiple resources each was given a unique alphabetical ID beyond its WSBLE ID
- **WSBLE Batch No.** – Indicates the batch the HPI form was previously grouped within during informal SHPO review.
- **Segment** – Indicates the Project segment in which each resource is located
- **WISAARD Property #** – Unique property ID as indicated in the WISAARD database
- **Parcel #** – County parcel number
- **Build Date** – Date a resource was constructed and any dates the resource was modified
- **Property Name** – Name of resource as indicated on the HPI form
- **Property Address** – Street address for resource
Eligibility Determination – Identifies FTA’s NRHP eligibility determination based on research conducted by Sound Transit and their consultant team

Eligibility Concurrence – SHPO entry column to indicate concurrence decision: please note here whether you agree with the eligibility determination (i.e., “concur” or “do not concur”)

The tracking sheet includes an individual tab for each Project segment, as well as an “All” tab that includes all resources and a tab labelled “Linear (multiple segments)” that contains information for resources that span multiple Project segments.
September 3, 2021

The Honorable Jaison Elkins
Chairman
Muckleshoot Indian Tribe
39015 - 172nd Avenue SE
Auburn, WA 98092

Subject:  Sound Transit
          West Seattle and Ballard Link Extensions Project
          National Historic Preservation Act, Section 106
          Area of Potential Effects Amendment, and Eligibility Determination
          SHPO Project Tracking Code: 2019-02-01457

Dear Chairman Elkins:

The Federal Transit Administration (FTA), in cooperation with Sound Transit, is continuing consultation under Section 106 of the National Historic Preservation Act (Section 106), and its implementing regulations at 36 Code of Federal Regulations (CFR) Part 800, for the West Seattle and Ballard Link Extensions Project (Project). The Project would extend Link light rail service from downtown Seattle to West Seattle’s Alaska Junction area, and to Ballard’s Market Street area in Seattle, King County, Washington. This letter addresses two elements of the Section 106 consultation process, and provides documentation for your review and feedback. These elements are summarized in the bulleted list below, with additional details and electronic links for accessing online enclosure documents provided in the enclosed Summary of Documents for the West Seattle and Ballard Link Extensions Project, August 2021.

- **Area of Potential Effects (APE) Amendment:** On March 25, 2021, in correspondence to your Tribe, FTA defined a revised APE boundary. Since that time, the Project design has continued to advance, and Sound Transit has recently identified two new construction elements that have been incorporated into the Project, i.e., the temporary relocation of a King County Metro trolley line, and the relocation of a 230-kilovolt power line. Incorporation of these new construction elements into the Project requires a new amendment to the Project APE. The enclosed APE Map Set (which includes Project...
vicinity maps and detailed APE maps) shows both the existing APE and the proposed APE revision.

- **National Register of Historic Places (NRHP) Eligibility Determination**: FTA has worked with Sound Transit and the Washington State Historic Preservation Officer (SHPO) to develop Historic Property Inventory (HPI) forms for built environment resources within the APE. For each of these resources, FTA has also made determinations of eligibility for the NRHP. This documentation is enclosed with this letter for your review.

Based on the documentation provided through the electronic links described above and identified as enclosures below, FTA has made the following determinations:

- **APE Amendment**: The APE boundary for the Project is amended to include the limits of the recently identified construction elements that have been incorporated into the Project, as depicted on the enclosed APE Map Set.

- **Eligibility Determination**: There are 290 resources listed on, or eligible for, the NRHP within the Project APE, as identified on the enclosed NRHP Eligibility Determination Comment Sheet and the NRHP Eligibility Map Set. (Please note, this eligibility determination refers to the March 25, 2021 version of the APE. The areas within the APE amendment addressed in this letter will be surveyed for historic properties after SHPO, Tribes, and additional consulting parties have an opportunity to comment on the APE amendment.)

Pursuant to 36 CFR Part 800, FTA invites your comments on the amended APE and eligibility determination, within 30 days of receipt of this letter. If FTA can provide any assistance or additional information which would aid in your prompt reply, please feel free to contact Mark Assam at (206) 220-4465 or mark.assam@dot.gov.

Thank you for your consultation on the Project.

Sincerely,

Linda M. Gehrke
Regional Administrator

Honorable Cecile Hansen
Tribal Chair
Duwamish Tribe
4708 W Marginal Way SW
Seattle, WA 98106

Subject: Sound Transit West Seattle and Ballard Link Extensions Project, National Historic Preservation Act, Section 106 Area of Potential Effect, Historic Property Inventory Forms and NRHP Eligibility Determinations

Dear Chairwoman Hansen:

I am writing this letter to the Duwamish Tribe on behalf of Sound Transit’s Tribal Relations Program and the West Seattle and Ballard Link Extensions Project (Project). Sound Transit is working with the Federal Transit Administration (FTA) on this Project. As you are aware, in February of 2018 Sound Transit invited the Duwamish Tribe to be a participating party in the environmental review and Section 106 process for the Project (please see the attached Project engagement information). This letter is a continuation of the engagement on the project initiated in 2018.

This letter is intended to provide you with updated project specific information and includes:

1) **Amendment of the Area of Potential Effects (APE)** – Sound Transit invites you to review the APE and provide feedback on the amended APE defined by the FTA.

2) **National Register of Historic Places (NRHP) Eligibility Determinations** – Sound Transit has worked with the Washington State Historic Preservation Officer (SHPO) to develop historic property inventory (HPI) forms for built environment resources within the APE. FTA has made determinations of eligibility for the NRHP on these resources and these determinations are enclosed for your review and comment. There are a total of 290 resources listing on, or eligible for the NRHP within the APE as identified on the enclosed NRHP Eligibility Determination Comment Sheet and NRHP Eligibility Map Set. The areas within the APE amendment addressed in this letter will be subject to survey and NRHP eligibility determinations after the SHPO, Tribes, and additional consulting parties have had an opportunity to comment on the APE amendment.

Additional details and electronic links for accessing online enclosure documents may be accessed at Sound Transit’s OneDrive site created specifically for this coordination. This site may be accessed via [https://soundtransit-](https://soundtransit-)
my.sharepoint.com:/f/g/personal/erin_green_soundtransit_org/Evl70R1tgGZLmRhXnsX9RlUBa2JsdMg3cxs0mbFvyqOMrg?e=GYx8ku and is currently set up to provide you specifically with access. If you wish to have a staff member access the information please contact us and we can assign that individual access. This OneDrive site includes a *Summary of Documents for the West Seattle and Ballard Link Extensions Project* document that describes the enclosures and APE amendment in detail and is also attached here.

If there are any questions about this transmittal, or if you would like information on the project schedule, please contact me: Dezerae Hayes – Sound Transit’s Director of Tribal Relations by phone at: 253-509-3806 or via email at: Dezerae.hayes@soundtransit.org.

Thank you in advance for your collaboration.

Sincerely,

Dezerae Hayes
Director of Tribal Relations

Re: Revised APE Comments

Dear Ms. Gehrke:

Thank you for contacting the State Historic Preservation Officer (SHPO) and Department of Archaeology and Historic Preservation (DAHP) regarding the above referenced project. In response, we have reviewed your description and map of the revised area of potential effect (APE). Based upon the documentation provided and conversations with consulting parties, we conditionally concur with your definition of the Revised APE with the understanding that important additional information will be forthcoming. Specifically, the SHPO is requesting information on the extent of vibration impacts to Historic Properties; the proposed haul routes through historic districts; the location of construction activities such as staging areas; traffic diversions, easements, etc.; the involvement and/or delegation of any Section 106 responsibilities to other Federal Agencies such as the U.S Coast Guard, and; all information on responses from Interested Tribes to the initial and subsequent APE submittals.

These comments are based on the information available at the time of this review and on behalf of the SHPO in conformance with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR 800. Should additional information about the project become available, our assessment may be revised.

Thank you for the opportunity to review and comment. Please ensure that the DAHP Project Number (a.k.a. Project Tracking Code) is shared with any hired cultural resource consultants and is attached to any communications or submitted reports. If you have any questions, please feel free to contact me.

Sincerely,

Dennis Wardlaw  
Transportation Archaeologist  
(360) 485-5014  
dennis.wardlaw@dahp.wa.gov
Hi Mark,

I’ve reviewed all the documents that you provided. I still have concerns about resources within the haul/detour routes particularly related to the areaways that exist throughout the CID, Pioneer Square and elsewhere in Downtown. It does not appear that areaways have been evaluated inside or outside the currently proposed APE. Can you please confirm that is true, or point me to the evaluation of those resources – perhaps I have missed them?

I’ve also reviewed each of HPI forms, and one built resource that raised concern for me in terms of the eligibility determination is the Ascona/Alki Hotel at 200 5th Avenue. I would like to understand a bit more about why the consultants determined it not eligible. Thanks for the opportunity to comment, and I look forward to future convenings of the consulting parties to discuss this further.

West Seattle and Ballard Link Extension Project  
National Historic Preservation Act, Section 106  
Consulting Party Comments on Revised Area of Potential Effects and Eligibility Determination  
SHPO Project Tracking Code: 2019-02-01457

Dear Ms. Gehrke:

We have reviewed the revised Area of Potential Effect for the West Seattle and Ballard Link Extensions Project (West Seattle/Ballard Link, hereafter), and respectfully submit these comments for your consideration as we continue the Section 106 consulting process. We offer you this context so that you may understand our concerns about the effects of project haul routes and traffic diversion throughout the Pioneer Square neighborhood.

Areaways that were created under the sidewalks when the street elevation of Pioneer Square was raised one story after the Great Seattle Fire are a central reason the Pioneer Square Historic District was created. They are now imperiled, and any increase in traffic through the Pioneer Square neighborhood puts them at greater risk.

In the early 1960s, the destruction of the elegant Seattle Hotel and its subsequent replacement with a parking garage known as the ‘Sinking Ship Garage’ spawned a grassroots preservation movement to save Pioneer Square from the wrecking ball. A series of newspaper articles piqued curiosity about underground areaways in Pioneer Square, which led to the creation of a tour of the areaways. The tour was created as a means to engage the public in signing petitions for the preservation of the Square. Later the areaways tour, Seattle Underground, became a fixture in the neighborhood by drawing tourists to the area. By 1970, Pioneer Square was Seattle’s first Historic District. Eventually, individual buildings, such as the Pioneer Building, received individual historic designations.

With their unique role in the history of the rebuilding of Seattle, areaways have been a defining characteristic of the historic district since it was established. Every year, public and private entities invest hundreds of thousands of dollars repairing Pioneer Square’s areaways, replacing the characteristic
glass blocks in the sidewalk that light the underground, and seeking Pioneer Square Preservation Board approval to make improvements, changes, or decommission.

Maintaining areaways throughout our neighborhood is a shared responsibility. The City of Seattle, through Seattle Department of Transportation, is responsible for the streetwall—the wall of the areaway that holds up the street. Private property owners pay fees to the City each year for the privilege of using the space within the areaways, despite its condition, and are responsible for maintaining all other elements of the space, like the floors, and often the “ceiling,” which is the sidewalk above.

But, the areaways are now more than 130 years old. They were built when the heaviest vehicles on the streets held up by their outer walls were horse-drawn delivery wagons. And they are deteriorating, which means that Pioneer Square is at risk of losing these unique spaces.

The City of Seattle, through the Department of Transportation, has long been aware of its responsibility to maintain the streetwalls of the areaways, and from 2004 through 2018, the Capital Improvement Program appropriated money to a program called “Hazard Mitigation Program—Areaways” under the Bridge and Structures organization of the department. The annual funding for that program varied over the 16 years between $212,000 at its lowest, to $400,000 at its peak (earliest budget this author could find). It is unclear if the money invested in the program was used to fund a person or persons to maintain a database of the resource, or to perform any real capital work on maintaining or preserving the resource?

Over that 16 years, most municipal improvements to areaways have typically been associated with construction projects like the Alaskan Way Viaduct program, Waterfront redevelopment, the First Hill Streetcar, and various utility and repair projects performed by State and City agencies.

Despite funding a program identified as a “mitigation” program, SDOT and the City of Seattle have failed to maintain the areaways resource as a part of the transportation system, or as part of the historic character of Seattle’s oldest neighborhood.

In 2018, Seattle Department of Transportation (SDOT) started assessing what streets they could relocate buses to while the viaduct was being demolished and Alaskan Way rebuilt. They conducted a structural analysis of the underground areaways in Pioneer Square to determine if the 1st Ave S corridor could accept the additional bus traffic. The analysis highlighted just how bad the areaways situation had become, and SDOT initiated an intense assessment to map critical areaway structural vulnerabilities throughout the neighborhood. It turns out, most areaways in the neighborhood are very vulnerable to damage. So much so, that SDOT has imposed weight restrictions throughout all the main arterials in the neighborhood. Curb lanes all along 1st Avenue South from Cherry Street to King Street, and South Jackson Street from 1st Avenue South to 2nd Avenue South are limited to vehicles weighing 10,000 lbs or less, meaning commercial vehicles delivering goods to businesses, and trucks delivering items to residences must park blocks away from their destinations.

SDOT reports that it will complete its assessment of the structures throughout the neighborhood, determine the work necessary, and begin to create a long-range plan. Currently, SDOT does not have a long-range plan for the areaways. In late 2020, areaways program leads presented to the neighborhood, and indicated that program goals will focus on safety for vehicles and pedestrians, and mobility to reduce restricted load zones throughout the neighborhood. At this time, the neighborhood continues to
suffer from a lack of City investments to maintain its part of the historic resource. It is the extremely delicate condition of the areaways, combined with the necessary restrictions on traffic throughout the neighborhood, which makes us very concerned about the ripple effects of diverted traffic throughout the neighborhood that will necessarily follow the disruption as Sound Transit constructs the new downtown tunnel and the West Seattle line.

1st Avenue South continues to be an important corridor in Pioneer Square, and one of the few arterials that can bring people and goods into and out of downtown Seattle. But increasing traffic on 1st Avenue South will necessarily divert traffic onto other streets in Pioneer Square, where both the condition of the areaways and the existing challenges with commercial deliveries make additional traffic extremely problematic. We encourage the Sound Transit team to closely consider the current deteriorating condition of the existing transportation network, including the critical historic areaways, as they evaluate the effects of the West Seattle/Ballard Link Extensions project, and continue to plan for construction.

We appreciate the partnership with Sound Transit, the Federal Transit Administration, our State Historic Preservation Officer, Dr. Allyson Brooks and her staff at Washington State Department of Archaeologic and Historic Preservation. We look forward to collectively working together to protect our defining historic resources during the planning, construction, and operation of the West Seattle/Ballard Link Extension.

Sincerely,

Lisa Dixon Howard

Linda Gehrke  
Region X Administrator  
US DOT FTA  
915 Second Ave. Suite 3142  
Seattle, WA 98174-1002

Dear Ms. Gehrke:

We have reviewed the revised Area of Potential Effect boundaries, and the NRHP eligibility determination and offer the following comments and context for your consideration as we continue the Section 106 process. We offer you the following context so that you understand why we are requesting Sound Transit include the boundaries of the Pioneer Square and Chinatown historic districts, and the haul routes, as part of the Area of Potential effect.

CHINATOWN HISTORIC DISTRICT CONTEXT
The Seattle Chinatown Historic District is listed in the National Register of Historic places, and sits within the larger International Special Review District. The Chinatown Historic District has been the center of Seattle’s Asian community since the early 20th century, and the International Special Review District was established to preserve the area’s Asian culture and history and protect it from unwanted development. We rely on robust consideration of the elements identified for protection under various federal, state, and city laws to help protect the place of Chinatown, and the culture of the Chinatown International District neighborhood.

The neighborhood is home to one of the largest groups of intact pre-World War II buildings in Seattle, and these buildings stand to reflect the history and historic architecture of the community. Areaways were created during the regrades to rebuild the City after the Great Seattle Fire of 1889, and during the disruptive Jackson Regrade of the 1900s. These elements are defining characteristics of the historic nature of the neighborhood, and no matter what alternative being studied by Sound Transit for the West Seattle and Ballard project, the project will have a substantial construction footprint right in the middle of these important resources and the existing culture. The project itself will include construction of a new downtown tunnel, and based on our most recent experience with the 3rd Avenue Bus Tunnel, and the Alaskan Way Viaduct tunnel, we know that settlement and vibrations can have tremendous
impact on surrounding buildings, sidewalks, and streets. Other Section 106 consulting processes throughout the City of Seattle in recent decades have focused on the effects of noise, dust, and vibrations to historic buildings and districts, and have even regarded potentially historic resources only under consideration for listing on the National Register of Historic Places. The Seattle Chinatown Historic District is a designated resource, and the proposed project being constructed through the heart of the district will undoubtedly have district-wide impacts. It is for this reason that we are requesting, again, that the Seattle Chinatown Historic District be included in its entirety, in the Area of Potential Effect.

The International Special Review District was created to help preserve the culture of the neighborhood, which is oftentimes reflected in the way day-to-day life unfolds in the neighborhood. Indeed, this neighborhood’s history of destruction and rebuild and relocation has been a reflection of racist based actions and policies perpetuated over time, that have failed to protect the physical structures that would otherwise visually define the culture we describe, and provide for more clear protections under Section 106 of the National Historic Preservation Act. The Chinatown International District of today reflects the varied and diverse ethnic communities who have been lashed together in this neighborhood space. The small scale and pedestrian nature of the neighborhood is emphasized by the numbers of elders who live and walk in the district every day. The ability for a resident or visiting elder to walk to the grocery, to a park, to a doctor’s appointment or other service is a critical function of the neighborhood culture. Our concern is that the disruption caused by the WSBLE project planning and construction will create pressures on the local businesses and residents that will increase displacement and discourage new residents and businesses from trying to find their place in our communities. In a community like the Chinatown International District, we are talking about discouraging Asian-Pacific-Islander immigrants from investing in the businesses that define the culture of the C-ID. Our ethnic groceries, Anime and Manga stores, restaurants, traditional herb stores, night clubs and coffee shops are living, breathing expressions of the Chinese/Filipino/Vietnamese/Japanese and other immigrant experience. Sound Transit needs to consider the full direct and indirect impacts of the project on these day-to-day activities on the cultural fabric, to preserve and protect what defines the district in the context of Section 106, and arguably, in the spirit of Section 106, as well.

PIONEER SQUARE HISTORIC DISTRICT
Here, we are re-emphasizing the points made by our partners at the Alliance for Pioneer Square, about the current vulnerability of the areaways throughout Pioneer Square and the City, and the importance of their historic contribution.

Areaways were created when the City rebuilt itself after the Great Seattle Fire. These structures are made up of streetwalls that hold up the streets throughout the neighborhood, plus the sidewalks and building faces within these underground spaces. Many of them are corridors for underground utilities, as well as storage areas, or extensions of businesses and restaurants.
Areaways, in their role of rebuilding Seattle, are now more than 130 years old, and deteriorating due to chronic underinvestment in maintenance. This means Pioneer Square and Chinatown International District are both at risk of losing these unique spaces. During the construction of the City’s latest mega-project, the construction of the Alaskan Way Tunnel, and the demolition of the Alaskan Way Viaduct, the Seattle Department of Transportation started assessing what streets they could relocate bus traffic to while the viaduct was being demolished. They conducted a structural analysis of the underground areaways in Pioneer Square to determine if the 1st Ave S corridor could accept the additional bus traffic. The analysis highlighted just how bad the areaways situation has become, and SDOT initiated an intense assessment to map critical areaway structural vulnerabilities throughout the neighborhood. It turns out, most areaways in the Pioneer Square neighborhood are very vulnerable to damage. So much so, that SDOT has imposed weight restrictions throughout all the main arterials in the neighborhood. Curb lanes all along 1st Avenue South from Cherry Street to King Street, and South Jackson Street from 1st Avenue South to 2nd Avenue South are limited to vehicles weighing 10,000 lbs or less, meaning commercial vehicles delivering goods to businesses, and trucks delivering items to residences must park blocks away from their destinations.

These streets are the very streets that Sound Transit will likely have to use to get construction vehicles to and from the construction site for the WSBLE project—anticipated to be 7-10 years of construction in this area. At this time, the Pioneer Square neighborhood continues to suffer from a lack of City investments to maintain its part of the historic resource. It is the extremely delicate condition of the areaways, combined with the necessary restrictions on traffic throughout the neighborhood, that makes us very concerned about the ripple effects of diverted traffic throughout the neighborhood, and the related construction traffic that will undoubtedly have to travel through the neighborhood, that will necessarily follow the disruption as Sound Transit constructs the new downtown tunnel and the West Seattle line.

Noise, dust, vibration, and increased traffic all will continue to erode the conditions of these areaways, and we request Sound Transit do a more explicit and thorough examination of the effects of the project on these defining historic resources throughout Pioneer Square.

Our requests to include the designated Seattle Chinatown and Pioneer Square historic districts, and project haul routes in the Area of Potential Effect are not new requests to Section 106 review in Seattle. These considerations have become standard practice with major projects in the region, including the SR 99 Alaskan Way Viaduct program projects, and the SR 520 program projects. We are requesting the same robust Section 106 review consistency that has been applied throughout the City of Seattle in the past two decades.

We appreciate the ongoing collaboration with Sound Transit, and the Federal Transit Administration, and we look forward to collectively working together to meet the needs of our community for the
successful construction and operation of this important, multigenerational, 100-year transportation project.

Sincerely,

Kathleen Barry Johnson
Executive Director

Subject: Sound Transit West Seattle and Ballard Link Extension Project
Comments on Revised Area of Potential Effects and Eligibility Determination

Dear Mr. Assam:

Martin Smith Inc has reviewed the revised Area of Potential Effect for the West Seattle and Ballard Link Extensions Project (West Seattle/Ballard Link, hereafter), and we submit these comments as we continue the Section 106 consulting process.

First, we echo the context-setting comments that our collaborators at the Alliance for Pioneer Square and Historic South Downtown offered to you in their letters, about the nature of the Pioneer Square and Chinatown Historic Districts. Both these districts are listed historic resources and the project will have a substantial footprint in each, no matter what alternative is selected for the West Seattle and Ballard Link Extension project. A new downtown tunnel will require Sound Transit to remove hundreds of thousands of cubic yards of soil from the tunnel portals. Those thousands of truckloads of soil will travel from the portals, to wherever the disposal sites are. Those haul routes will undoubtedly pass around or through the Chinatown and Pioneer Square historic districts. Noise, dust, vibration, and vehicle weight on the streets of these neighborhoods will have direct effects on the district and the contributing resources, including areaways and contributing structures. This is the reason we are requesting Sound Transit include the districts in their entirety and that the project include all potential haul routes as part of the Area of Potential Effect.

Second, in looking for our Pioneer Square historic properties of interest in the HPI forms, we were confused and frustrated by the organization and classification of the forms. Properties are listed by “segment”—which were not easy or intuitive to sort through. This made it difficult to review the volumes of information provided to search for the properties and areas we were looking for.
From our review, it’s clear that because you’ve opted not to include the full district in the APE, nor have you chosen to include the properties we’ve listed in our initial letter to you, we reiterate our request that you consider adding the following properties to the Area of Potential effect:

Maynard Building (119 1st Ave. S.)
Union Trust Building (119 S. Main St.)
Occidental Mall (308-316 Occidental Ave. S.)
First & King Building (101 S. King St.)
Provident Building (568 1st Ave. S.)

Through our recent first hand experience with the Alaska Way Viaduct program, and the SR 520 program, we understand that increased truck traffic related to construction, and traffic diversion around and through the neighborhoods from construction activities, results in a direct significant increase of noise, dust, and vibration to historic resources. Our properties will be subject to these potential effects, and we request Sound Transit explicitly evaluate them as part of the Section 106 review.

Thank you for your time and persistence in this process. We look forward to continuing to work with you to deliver this important project, while prioritizing our neighborhoods’ historic character and designations.

Respectfully,

Ryan Smith
President
Martin Smith Inc

Re:          Built Environment Determinations of Eligibility

Dear Mr. Assam:

Thank you for contacting the Washington State Department of Archaeology and Historic Preservation (DAHP). The above referenced project has been reviewed on behalf of the State Historic Preservation Officer (SHPO) under provisions of Section 106 of the National Historic Preservation Act of 1966 (as amended) and 36 CFR Part 800. Our review is based upon documentation contained in your communication.

We do not concur with several of your determinations of eligibility. It is our opinion that the following historic properties are eligible for listing in the National Register of Historic Places (NRHP):

- Property ID: 38453 Auditorium Apartments  605 5th Ave N
- Property ID: 41181 Sunset Electric Co. Warehouse  200 Terry Ave N
- Property ID: 42711 Electrol Oil Burner Corp.  601 Aurora Ave N
- Property ID: 43319 Myers Motor Co. Dealership  4417 Fauntleroy Way SW
- Property ID: 45169 Roosevelt Hotel  1531 7th Ave
- Property ID: 56067 Uwajimaya Store  519 6th Ave S
- Property ID: 337660 Symons Clamp & Manufacturing Company  2437 6th Ave S
- Property ID: 342681 Henry Disston and Sons  1555 4th Ave S
- Property ID: 343204 Wilderman Refrigeration Company  300 Dexter Ave N
- Property ID: 387772 Ranch Duplex  3039 SW Avalon Way
- Property ID: 666424 Industrial Building/Private Garage  706 Taylor Ave N
- Property ID: 719333 Brown Bear Car Wash  1505 NW 52nd St
- Property ID: 719370 Firestone Master Care Service  1145 NW Market St
- Property ID: 719585 Goodyear Tire Center - Ballard  5601 15th Ave NW
- Property ID: 720081 Larry Apple Realty  3050 15th Ave W
- Property ID: 720175 Zeeb Iron Works  3434 16th Ave W
- Property ID: 720527 Popich Sign Company  831 Airport Way S
- Property ID: 720687 Kuney Johnson Company General Contractors Office  235 9th Ave N
- Property ID: 721587 Single-Family Residence  4156 40th Ave SW
- Property ID: 722031 Commercial Building  3440 6th Ave S
- Property ID: 723714 Industrial Building  1121 NW 45th St
- Property ID: 724023 Washington Fish & Oyster Co. Manufacturing Facility  1100 W Ewing St
It is also our opinion that the following historic resources are not eligible for listing in the NRHP:

- Property ID: 338499  Dor Rik Apartments  2655 14th Ave W
- Property ID: 418305  Contemporary Ranch House  4150 32nd Ave SW
- Property ID: 720233  Residence  2246 1/2 15th Ave W
- Property ID: 723016  Madera on Queen Anne Condominiums  3608 14th Ave W

We concur with the remaining determinations of eligibility you have made, and marked the spreadsheet provided noting our concurrence or non-concurrence.

These comments are based on the information available at the time of this review and on behalf of the State Historic Preservation Officer (SHPO) in conformance with Section 106 of the National Historic Preservation Act and its implementing regulations 36 CFR 800. Also, we appreciate receiving copies of any correspondence or comments from concerned tribes and other parties that you receive as you consult under the requirements of 36 CFR 800.4(a)(4). Should additional information become available, our assessment may be revised.

Thank you for the opportunity to review and comment. Please ensure that the DAHP Project Number (a.k.a. Project Tracking Code) is shared with any hired cultural resource consultants and is attached to any communications or submitted reports. If you have any questions, please feel free to contact me.

Sincerely,
