

Boeing Access Road Station

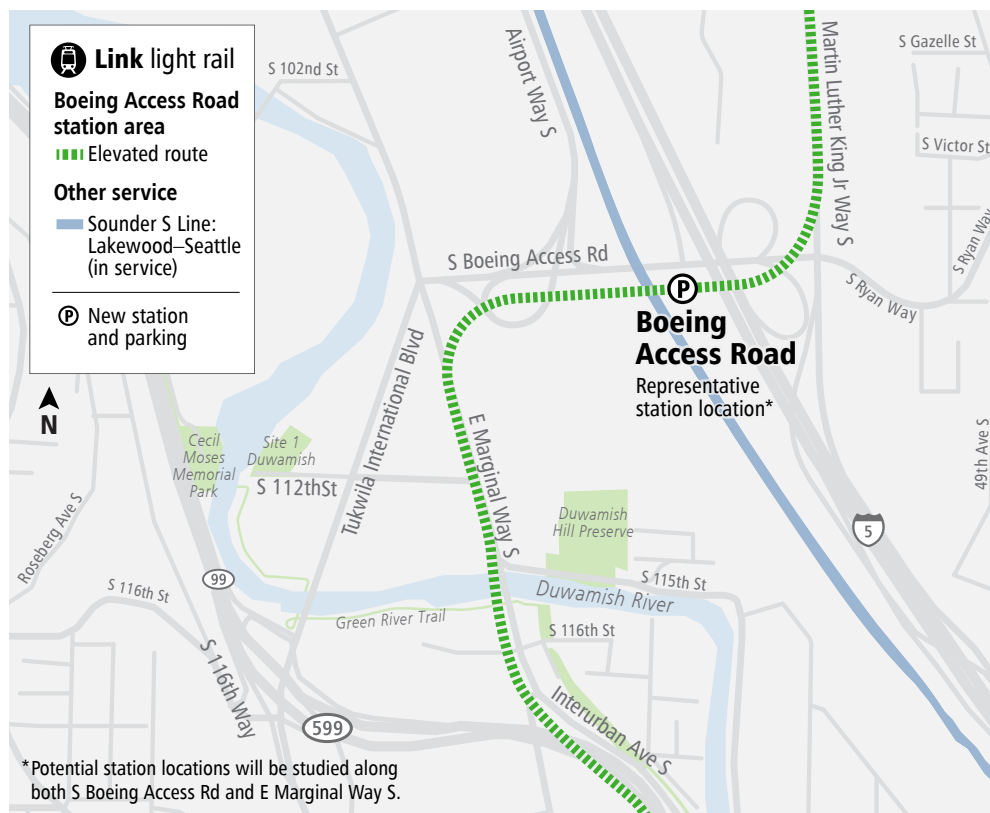

About the project

Sound Transit's Boeing Access Road Station Project will add a new station to the existing 1 Line of the Link light rail network near South Boeing Access Road, East Marginal Way, and Interstate 5 (I-5) in Tukwila. The station was included in the 1996 Sound Move Plan and the voter-approved Sound Transit 3 (ST3) system plan to enhance connectivity and accessibility in our region.

Project benefits and elements

Adding a new station at Boeing Access Road will:

- **Bridge the 5.5-mile gap between the Rainier Beach and Tukwila International Boulevard stations**, expanding access to high-capacity transit in the region.
- **Help people get to the places they need to go daily**, by increasing access to the 1 Line and larger Link light rail network.
- **Provide connections to Link light rail** by including a new parking facility as well as a bus transfer and layover facility.
- **Accommodate future growth** and planned transportation improvements in the project area.

Fast and frequent service to destinations:

- Boeing Access Road to Sea-Tac Airport: 10 minutes
- Boeing Access Road to downtown Seattle: 26 minutes

Current project status:
Planning

Equity and inclusion

At Sound Transit, we are committed to becoming an anti-racist organization and creating the conditions necessary to achieve racial equality within our agency and the broader community. We are challenging ourselves to plan, build, and operate public transit that provides equitable access to housing, education, medical facilities, and job opportunities, especially for those who have been most harmed by institutional and systemic racism.

Project timeline

Community engagement

The project is currently in the alternatives analysis phase, during which the project team evaluates potential station locations and associated elements. Along with technical considerations, community feedback will inform the identification of the preferred station location and associated elements. Community engagement and input helps Sound Transit plan and design a system that reflects the needs and desires of your community. There will be several opportunities to engage throughout the project.

Related projects

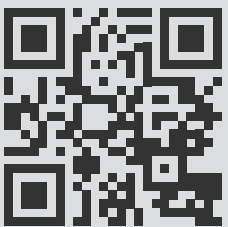

Boeing Access Road Station is one of many projects Sound Transit is building to enhance connectivity and accessibility in our region. Explore more projects at soundtransit.org/system-expansion.
