Vertical Conveyance Asset Lifecycle Management

Citizen Oversight Panel

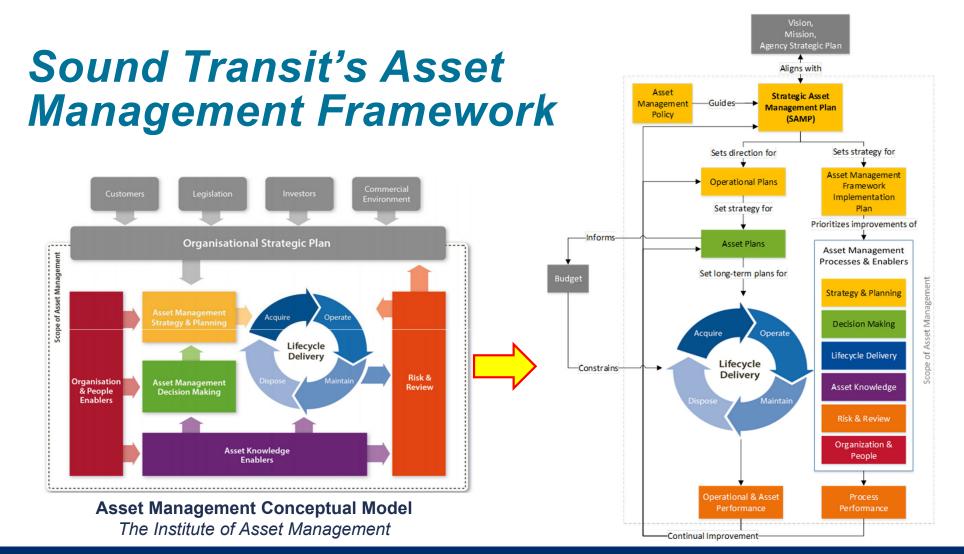

9/15/21

Why Are We Here

- To Provide an Overview of our Current Portfolio of Elevators and Escalators
- Briefly Discuss Estimated Expansion Growth through 2041
- Impact of Assuming Management of the Downtown Tunnel Assets
- Provide a Summary of our Approach to the Lifecycle Management of this Equipment

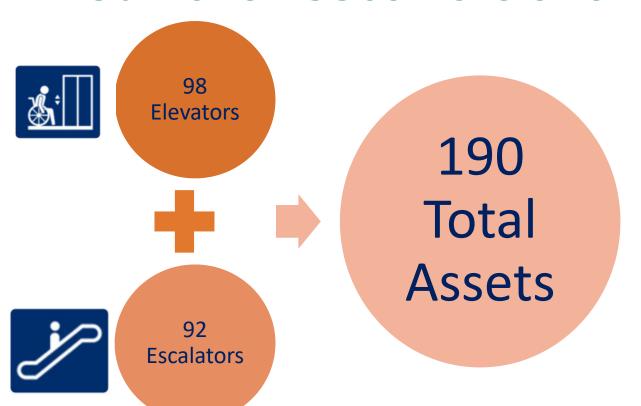

Conveyance Team Vision Statement

Create a **PASSENGER** focused vertical conveyance program centered on **SAFETY** and **RELIABILITY** by leveraging maintenance, technology & data to optimize performance and keep all stakeholders better informed.

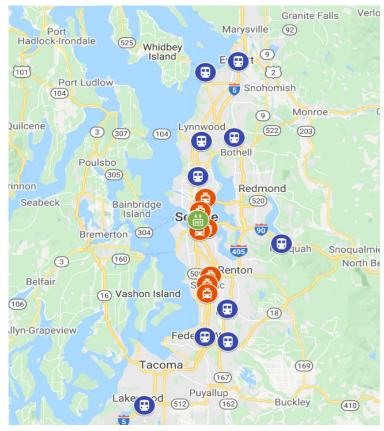

Current Asset Portfolio

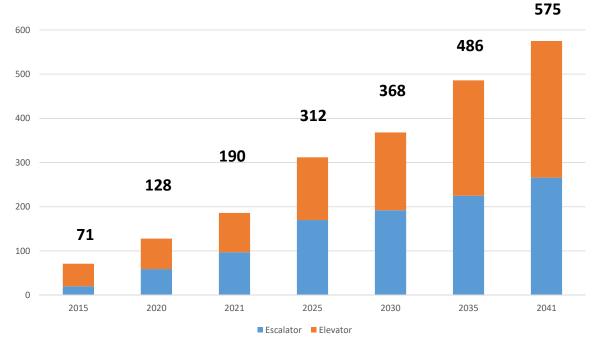

- Roughly 50/50 split elevators & escalators
- Includes all Northgate Link Extensions
- Includes Downtown Tunnel Assets

Projected Portfolio Growth

Spans from Everett to Lakewood - 70 Miles

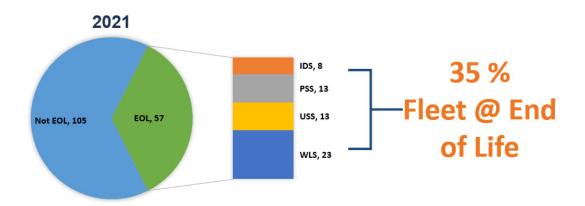

- Current fleet will grow by 60% through 2025
- Estimated to be a fleet of 575 by 2041

Downtown Tunnel Elevator/Escalator Impact

- Management transfer from KCM completed on January 1, 2021
- Assumed 58 total pieces of equipment of which 28 units were inoperable upon transfer

Strategy and Approach to the Downtown Tunnel

3 pronged approach

Get Equipment
Safe, Operable and
Available for
Passengers

SOGR & Life Extension Investments

Maintenance Program

Integrate Operable
Assets into existing
Maintenance
Contract

Strategically Prioritize Replacement

> VC Replacement Program

Short Term Downtown Tunnel Mitigation

- 2021 DSTT repair budget of \$3.2M (\$8.7M 2020 Board Motion)
- Replacing critical components such as chains, bull gears, door equipment, handrails and upgrading safety equipment

Downtown Tunnel Performance

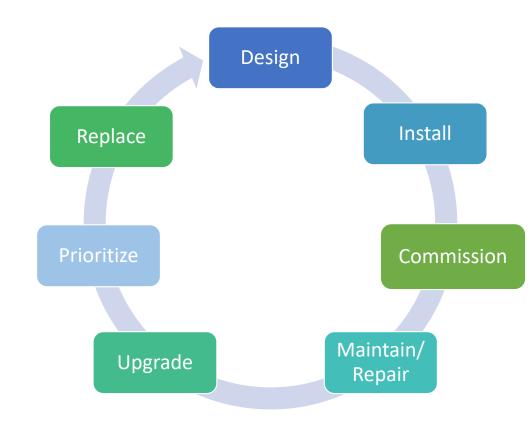

Westlake, University Street, Pioneer Square, International District Stations

- Increased elevator availability from 81.8% to 98% overall
- Increased escalator availability from 30.1% to 75% overall
- Inoperable units on January 1st 2021 28 of 58
- Current inoperable units 8

Elevator/Escalator Lifetime Cycle

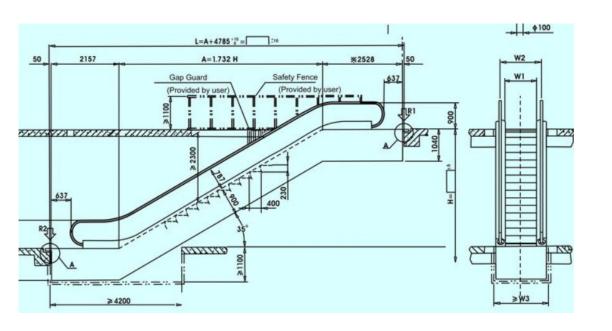

- General life expectancy for transit elevator/escalators is 25 Years
- 2024 will begin seeing replacement needs within the existing portfolio (4)*

*King Street & Union Station

Specifications and Design

Engaged Early in the Process

In Planning, Construction Specifications and Design Review

Installation/Commissioning

- Regular Inspections During Construction
- Conduct State Pre-Inspections
- Observe Initial Testing and Commissioning Events

Asset Information

- Determine Manufacturer Recommended Spare Parts and Maintenance
- Identify Critical Components of all Assets

Maintenance/Repair

- Monthly, Quarterly, Semi-Annual and Annual Tasks
- Contracted Response Times
- Spare Parts Inventory
- Contract Management Efforts

Data Gathering, Analysis and Reporting

- All Equipment Outages are Vetted Every Business Day
- Each Outage is Documented for Time, Category and Resolution
- Overall Monthly Availability Reports are Available at https://www.soundtransit.org

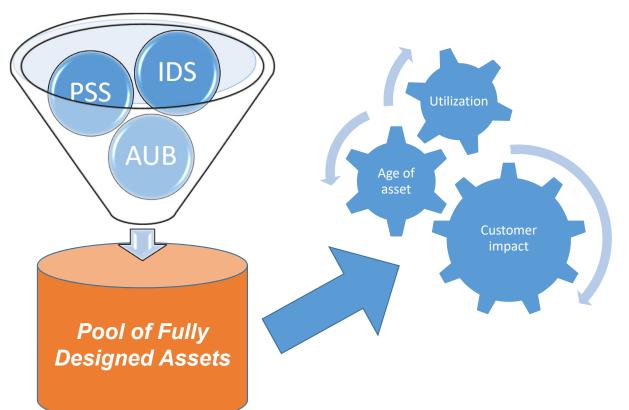

Programmatic Approach to Replacement

Construct new Identified Design & Prioritize Conveyance machine modernization SOGR Engineering equipment work 5 years within room(s) if completed portfolio prior to EOL necessary Year 19 Year 21-22 Year 23 Year 25 Year 20 Equipment Age **Additional Steps Additional Step** Additional Step **Additional Step** Equipment -Scope of Work -Identify if machine - Publish a public - Publish a public reaches EOL room(s) construction RFP for machine RFP for conveyance creation status room construction modernization is necessary -Funding

Annual Replacement Prioritization

- An annual asset prioritization will determine what assets are most in need of replacement
- VC Team scores each asset individually
- Scoring categories will include customer impact, age, overall availability and obsolete components

Continuous Improvement

- Enhance Data Reporting
- Better understand component service life expectancy
- Decrease number of unplanned outages
- Increase communication with all stakeholders
- Continue piloting new technology solutions

Thank you.
