

Sound Transit and University of Washington Mobile App Workshop

The workshop will provide disadvantaged business enterprises (DBE) and small businesses an overview of mobile applications to improve business agility and efficiencies. Applications will focus on reducing cost through paper elimination, streamline document sharing, customer relationship management, and engagement in social collaboration.

The workshop will include selected University of Washington students who have been trained to explain and implement the applications. The students will work in small groups with the participants to demonstrate and explain the functions of the applications as well as provide any necessary solutions or assistance. In order to successfully implement the applications for business use, each business is encouraged to send multiple staff members to the workshop.

For this workshop, you will need to bring your laptop, tablet, or mobile device.

Date / Time:

April 21st | 2:00 P.M. – 5:00 P.M.

Location:

University of Washington, Paccar Hall – Paccar 292
