

Overlake in Redmond

East Link Extension

2 Line opening 2023

Light rail is coming to the Eastside

The Overlake segment of East Link continues north from Bel-Red adjacent to SR 520, and will serve Overlake neighborhoods and businesses. When service begins in 2023, East Link will operate as part of the new 2 Line, serving 19 stations between Redmond Technology and Northgate. In 2024, 2-Line service will extend to Lynnwood and downtown Redmond with six additional stations.

Project benefits

- The 2 Line will connect Redmond, Bellevue, Mercer Island and Seattle with high-capacity, frequent service 20 hours per day.
- Supports the City of Redmond's Overlake Village Neighborhood Plan.
- Accommodates future growth and planned transportation improvements.
- Increases park-and-ride capacity at Redmond Technology Station.
- A pedestrian and bicycle bridge at Overlake Village Station, funded by the City of Redmond, will span SR 520 to connect neighboring communities with light rail service.
- Microsoft is redeveloping its central campus, which includes building a pedestrian bridge that links both sides of SR 520 to Redmond Technology Station.

Travel times from Redmond Technology:

- Chinatown/International District in 30 minutes
- University of Washington in 40 minutes
- Bellevue Transit Center in 10 minutes
- Sea-Tac Airport in 65 minutes
(with transfer to 1 Line at International District)

Overlake Village Station

Located northwest of the intersection of NE 24th Street and 152nd Avenue NE, the Overlake Village Station runs adjacent to SR 520. Riders will enter from the future Plaza Street, along 152nd Avenue NE. This station's design features two entrances, new bicycle and pedestrian connections and a passenger drop-off area.

Redmond Technology Station

Located along SR 520, Redmond Technology Station is a major transit hub linking public and private transportation services. The station will feature a park-and-ride facility for approximately 320 vehicles, a covered facility for bicycles, and will improve pedestrian connections.
