

# Overnight Service Proposals

## What do these routes do?

Improved early bird and night-time service

- When Link is not running, three routes would provide overnight service between:
  - Lakewood & Seattle via SeaTac
  - Redmond & Seattle via Redmond
  - Everett & Seattle

**APPROVED**

## How often might these buses run?

- These routes would be coordinated with the Link span of service, beginning shortly after the last trains depart, and ending shortly before the first trains begin service.
- Exact frequencies and timing are still being developed.
