

SR-900 Park-and-Ride Arterial Improvements

Sound Transit partnered with the Washington State Department of Transportation (WSDOT) to widen a section of State Route 900 by adding a southbound general purpose lane, a southbound business only lane and a northbound carpool lane.

The project improved transit and high-occupancy vehicle access between I-90 and the Issaquah Park-and-Ride located along SR 900.

Mode

Bus

Highlights

Construction complete: February 2005

Location: SR-900 between I-90 and Newport Way

Budget: \$7.4 million

Partners: Sound Transit, WSDOT, City of Issaquah
