

Stadium Station

Stadium Station construction was part of building Central Link. This station, along with the other Link initial segment stations, increases transit use by baseball, football and soccer fans and those visiting the Qwest Field Event Center.

The station platform was sized to handle event crowds. A new bicycle/pedestrian path was built alongside the light rail route that connects with the Mountains to Sound Greenway Trail.

Mode

Light rail

Highlights

Start of service: 2009

Location: 130 feet south of Royal Brougham Way, adjacent to the transit busway and King County Metro bus base.

Projected ridership: Between 170,000 and 250,000 annual boardings in 2020 (depends on the number and size of events at the stadiums and exhibition center).
