

Appendix G2

Potentially Affected Parcels by Alternative

Potentially Affected Parcels by Alternative

Building and operating the East Link light rail system would require acquiring property for right-of-way and other facilities and presumes displacing and relocating some of the existing uses. This appendix presents the likely property acquisitions based on the current conceptual designs. It is important to note that this list of acquisitions should not be interpreted as the final determination regarding property acquisition, and the list could be updated as the project design is refined. Furthermore, the estimates described in this appendix reflect the existing conditions at the time the analysis was conducted. Accordingly, the number and/or type of displacements could vary between what has been disclosed in this Final Environmental Impact Statement (EIS) and what is actually required because currently underdeveloped or vacant properties might be developed between the publication date of this EIS and the time of construction.

There are two types of property acquisitions:

- **Partial acquisitions** would acquire part of a parcel and generally would not displace the existing use. In a few instances, some of the businesses or residential limits on a parcel would be displaced.
- **Full acquisitions** would acquire the full parcel and displace the current use.

Full acquisitions include parcels that might not be fully needed for the project but would be affected to the extent that existing uses would be substantially impaired (e.g., loss of parking or access). This includes parcels that would be acquired for construction activities, although in some cases all or part of the parcels would be available for other use or for redevelopment after construction is complete.

Tables G2-1 through G2-31 in this appendix present information on the likely acquisitions by alternative, including property needed for elevated guideway easements, which are mapped on the Exhibits G2-1 through G2-54 following the tables. The tables list property mapping numbers unique to this project, parcel identification numbers, addresses, and the building or property name. When there is no building name, the general land use is provided (e.g., residential, vacant). The tables are numbered by segment and alternative.

In addition to the potential property acquisitions described, the project would also require subterranean easements, temporary construction easements, and use of public right-of-way not listed here.

G2.1 Segment B

TABLE G2-1

B2M to C11A: Potential Property Acquisitions for Preferred 112th SE Modified Alternative (B2M) connecting to Preferred 108th NE At-Grade Alternative (C11A)
