Sound Transit's expansion program presents an opportunity to address disadvantaged business enterprise and small business (DBE/SB) barriers that prevent their participation on contracts. We strongly encourage creative teaming arrangements that result in formal or informal partnerships of DBE/SBs with firms of similar professional capabilities having specialized experience or expertise needed on the project.

This training promotes inclusion excellence. It is designed to collect input from participants (primes and DBE/SBs), educate on recruitment strategies, and discuss how to source in an inclusive way. This interactive training will identify and develop strategies that are practical and set firms up for success.

Target audience:

Firms seeking to build business relationships in pursuant of Sound Transit contracts; primes, DBE/SBs, 1st tier subs
