

Stride: Bus Operations and Maintenance Facility

July 2025

Supporting the Stride battery-electric bus fleet

The Bus Operations and Maintenance Facility (OMF) is where buses for the bus rapid transit (BRT) system will be stored, cleaned, fueled or charged, and maintained. This will be the first facility built by Sound Transit to operate and maintain a bus fleet. The Bus OMF will be located in the Canyon Park Business Center in Bothell near the Canyon Park Park-and-Ride Lot.

Bus OMF will support the operations of the Stride BRT system. It will include buildings for offices and operations; areas of service and maintenance; space to store 120 buses; parking for employees and visitors; and charging stations for battery-electric buses.

Bus Operations and Maintenance Facility

Why this location?

The Bus OMF is located near routes it will serve, which will help lower maintenance costs and improve bus reliability. Being close to the routes also reduces travel time and costs at the start and end of bus service. The base will be built in an established business park on 20th Avenue SE in Bothell. The site is approximately 10 acres and meets selection criteria.

Facility features

The Bus OMF facility includes:

- An administration and operations building for staff, drivers, mechanics, and other Stride operating needs.
- A parking and service structure for bus storage and charging with parking above for employees, visitors, and other non-revenue vehicles.
- A bus maintenance building for servicing and maintaining buses.
- A service, fuel, and wash facility.
- A guard house.
- Two electrical yards to support building electrical needs and battery-electric bus charging infrastructure.

Estimated project timeline
