

West Seattle and Ballard Link Extensions

Elected Leadership Group | February 1, 2019

Agenda

- *Community engagement and collaboration*
- *Level 3 screening process*
- *Level 3 alternatives*
- *Level 3 evaluation results*
- *Potential mix-and-match opportunities*

Community engagement and collaboration

WHO IS SOUND TRANSIT?

We plan, build and operate regional transit systems and services to improve mobility in urban areas of King, Pierce and Snohomish counties.

Sounder
commuter rail

Our Sounder train routes connect Everett, Snohomish, Skagitway, Whatcom, Pierce, King, and Snohomish counties. Sounder trains provide a fast, reliable, and comfortable way to travel between major employment centers and downtown areas.

Link light rail

Link light rail provides a fast, reliable, and comfortable way to travel between major employment centers and downtown areas. Link light rail is a key component of the regional transit system.

Sound Transit bus

Sound Transit bus provides a fast, reliable, and comfortable way to travel between major employment centers and downtown areas. Sound Transit bus is a key component of the regional transit system.

Our Board
Sound Transit is governed by an 18-member Board made up of local elected officials and the Secretary of the Washington State Department of Transportation. The Board establishes policies and gives direction and oversight.

Funding
The system plan is paid for with a combination of state-funded local taxes, federal grants, federal revenues, local funds and interest revenues. By 2026, system operating costs will be paid for with local taxes, federal revenues, interest earnings, private sources and federal operating assistance.

 SOUNDTRANSIT

FUTURE SERVICE

Sound Transit System Expansion will:

- Build a 11.6-mile light rail network extending from Everett to Tacoma and from Seattle neighborhoods to Redmond and Issaquah.
- Establish Bus Rapid Transit (BRT) to the north, east and south of Lake Washington.
- Expand Sounder south line capacity and service adding two new train sets.
- Improve bus service at stations.

Community engagement and collaboration

Meeting dates subject to change.

External Engagement Report

Nov. 2018 – Jan. 24, 2019

99 comments and questions

33 community briefings

2 email update

engaging more than
4,330 subscribers

2 Stakeholder Advisory Group meetings

3 tabling events

engaging more than
80 community members

Nov-Dec briefings and tabling events

- ✓ State of SODO 2018 (11/8)
- ✓ Mercer Corridor Stakeholders Committee (11/15)
- ✓ Tiburon Condominiums, Board of Directors (11/15)
- ✓ Evergreen Treatment Center (11/16)
- ✓ Public Stadium Authority and Mariners (11/16)
- ✓ West Seattle JuNO (11/19)
- ✓ Magnolia Community Council (11/20)
- ✓ Recovery Café (11/26)
- ✓ NSIA (11/27)
- ✓ South Lake Union Community Council, Transportation Committee (11/28)
- ✓ City of Seattle Transit Advisory Board (11/28)
- ✓ Marine Exchange of Puget Sound (11/29)
- ✓ Helping Link (12/5)
- ✓ WestSide Baby (12/6)
- ✓ SODO BIA, Transportation Committee (12/7)
- ✓ CenterPoint Properties Trust (12/12)
- ✓ Real Change Vendor Meeting (12/12)
- ✓ GSBA Annual Meeting & Holiday Luncheon (12/12)
- ✓ Pacific Terminals (12/13)
- ✓ City of Seattle Planning Commission (12/13)
- ✓ SCIDpda Residential Property Managers (12/18)

Jan 1-24, 2019 briefings

- ✓ Coastal Transportation (1/4)
- ✓ South Downtown Stakeholders (1/8)
- ✓ Delridge Community Center (1/9)
- ✓ Meltec Foundry / Young Corp. (1/9)
- ✓ Delta Marine (1/10)
- ✓ Harbor Island Machine Works (1/10)
- ✓ Uwajimaya (1/10)
- ✓ SSA Terminals (1/11)
- ✓ Seattle Maritime Academy (1/15)
- ✓ White Center Community Development Association (1/16)
- ✓ Community Briefing at Youngstown Cultural Arts Center (1/16)
- ✓ Port of Seattle Neighborhood Advisory Committee (1/16)
- ✓ Downtown Seattle Association (1/17)
- ✓ Alliance for Pioneer Square (1/24)
- ✓ Seniors in Action Foundation (1/24)
- ✓ Eastern Hotel Apartments Listening Session (1/29)

What we've heard: Nov-Dec 2018

- Questions about timeline & process for property acquisition
- Request to locate and design stations with accessibility and safety in mind
- Request to be able to mix and match elements from Level 3 alternatives
- Requests to design and build new extensions faster
- Request for frequent bus service to stations for improved access
- Request for additional visualizations of proposed routes
- Questions and comments about freight mobility and industrial land effects

Level 3 screening process

Community engagement and collaboration

Meeting dates subject to change.

Alternatives development process

*The Sound Transit Board identifies preferred alternatives and other alternatives to study.

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

Level 3 alternatives

Level 3 evaluation results

Key considerations

Locations	Summary of Findings
Central Business District	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
Interway	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
GOO and Chinatown/International District	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
Downtown tunnel route	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
Smith Cove-Interbay	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
Salmon Bay crossing	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment
Ballard terminus station	• Bullet point to explain key findings in this segment • Another bullet point to explain key findings in this segment

Summary of findings

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

What is EIS Scoping?

- Start of federal environmental review process
- 30-day **public comment period**
- Seeks public **feedback on scope of EIS**
 - Range of alternatives
 - Topics to study
 - Purpose and need
- **Informs Board decision** on what to study in EIS*

* Scope of EIS also subject to Federal Transit Administration (FTA) oversight

How to provide scoping comments

- At **open house** / neighborhood forum
- Via **online** open house
- By **email** or USPS **mail** or voice **message** service

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

ELG Meeting #7 – Chinatown/ID

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station Focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

Screening process

Level 3 recommendations

- Interest in **additional scope** items
- Additional scope items **require 3rd party funding***
- Potential **recommendations**:
 - Preferred Alternative #1: If 3rd party funding **not** secured
 - Preferred Alternative #2: If 3rd party funding **is** secured

Level 3 recommendations

Informed by:

- Technical ***evaluation results***
- ***Public feedback*** gathered during scoping period and documented throughout the year
- ***Racial Equity Toolkit***, including findings from evaluation results and community input

Level 3 alternatives screening

SAG Meeting #12	Jan 30	Level 3 evaluation results
ELG Meeting #6	Feb 1	Level 3 evaluation results
EIS Scoping Open Houses / Neighborhood Forums	Feb/ Mar TBD	Level 3 evaluation results
ELG Meeting #7	March 29	CID station focus
SAG Meeting #13	April TBD	Level 3 recommendations
ELG Meeting #8	April TBD	Level 3 recommendations
Sound Transit Board System Expansion Committee	May 9	Identify preferred alternative (and other EIS alternatives)
Sound Transit Board Full Board	May 23	Identify preferred alternative (and other EIS alternatives)

***Level 3 evaluation
results***

Purpose and need

Purpose Statement	Symbol
Provide high quality rapid, reliable, and efficient peak and off-peak LRT service to communities in the project corridors as defined in ST3.	
Improve regional mobility by increasing connectivity and capacity through downtown Seattle to meet the projected transit demand.	
Connect regional centers as described in adopted regional and local land use, transportation, and economic development plans and Sound Transit's <i>Regional Transit Long-Range Plan</i> .	
Implement a system that is consistent with the <i>ST3 Plan</i> that established transit mode, corridor, and station locations and that is technically feasible and financially sustainable to build, operate, and maintain.	
Expand mobility for the corridor and region's residents, which include transit dependent, low income, and minority populations.	
Encourage equitable and sustainable urban growth in station areas through support of transit-oriented development, station access, and modal integration in a manner that is consistent with local land use plans and policies.	
Preserve and promote a healthy environment and economy by minimizing adverse impacts on the natural, built and social environments through sustainable practices.	

Evaluation criteria

➤ *17 criteria consistent in all levels of evaluation*

- Reliable service
- Travel times
- Regional connectivity
- Transit capacity
- Projected transit demand
- Regional centers served
- ST Long-Range Plan consistency
- ST3 consistency
- Technical feasibility
- Financial sustainability
- Historically underserved populations
- Station area land use plan consistency
- Modal integration
- Station area development opportunities
- Environmental effects
- Traffic operations
- Economic effects

Measures and methods

- › *50+ quantitative and/or qualitative measures*
- › *Ratings for Lower, Medium and Higher performing*
- › *Key differentiators and considerations among alternatives*
- › *Findings focus on key decisions along corridor*

**Lower
Performing**

**Medium
Performing**

**Higher
Performing**

Cost assessment

- Purpose: To **inform comparison** of Level 3 alternatives
- **Comparative estimates** for end-to-end alternatives
 - Consistent methodology (2018\$; construction, real estate, etc.)
 - Based on limited conceptual design (less than 5% design)
 - Does not establish project budget
- **Project budget** established during final design (~ 2024)

Project budget

Evaluation Measures	ST3 Representative	West Seattle Elevated/C-ID 5th Ave/Downtown 6th Ave/Ballard Elevated		West Seattle Tunnel/C-ID 4th Ave/Downtown 5th Ave/Ballard Tunnel				
	Project	5th Ave Cut-and-Cover International District/ Chinatown Station	5th Ave Mined International District/ Chinatown Station	41st Ave Alaska Junction/4th Ave Cut-and-Cover/14th Ave Ballard	42nd Ave Alaska Junction Station	44th Ave Alaska Junction Station	4th Ave Mined International District/ Chinatown Station	15th Ave Ballard Station
Provide high quality rapid, reliable, and efficient peak and off-peak light rail transit service to communities in the project corridors defined in ST3.								
At-grade crossings	3	1		1				
Potential service interruptions/recoverability	Lower	Medium		Medium			Lower	Medium
LRT travel times (minutes)	6 to 7 / 13 to 14	6 to 7 / 13 to 14		6 to 7 / 13 to 14				
Transit travel time savings (minutes)	12 to 20	12 to 20		12 to 20				
Improve regional mobility by increasing connectivity and capacity through downtown Seattle to meet projected transit demand.								
Network integration	Lower	Medium		Higher			Medium	Higher
Passenger carrying capacity	Medium	Medium		Medium				
Average weekday trips on West Seattle/ Ballard extensions (2042)	35,000 to 40,000 / 123,000 to 163,000	35,000 to 39,000 / 120,000 to 158,000		35,000 to 41,000 / 125,000 to 165,000				
Connect regional centers as described in adopted regional and local land use, transportation, and economic development plans and Sound Transit's Regional Transit Long-Range Plan.								
PSRC growth centers served	5	5		5				
Pop/job densities served (2040)	38 / 39	39 / 39		37 / 38 to 39				
Accommodates future LRT extension	Lower	Medium		Higher		Medium	Higher	
Implement a system that is consistent with the ST3 Plan that established transit mode, corridor, and station locations and that is technically feasible and financially sustainable to build, operate, and maintain.								
Mode, route and stations per ST3	Higher	Higher		Higher				
Potential ST3 schedule effects	Higher	Higher	Medium	Lower				
Potential ST3 operating plan effects	Lower	Higher		Higher			Medium	Higher
Engineering constraints	Lower	Medium		Lower				
Constructability issues	Lower	Medium		Lower				
Operational constraints	Lower	Medium	Lower	Higher			Lower	Higher
Capital costs (2018\$)	-	+\$400M	+\$500M	+\$1,900M			+\$2,100M	+\$1,900M
Annual O&M costs on West Seattle/ Ballard extensions (2018\$ in millions)	\$25 to \$30 / \$55 to \$60	\$25 to \$30 / \$55 to \$60		\$25 to \$30 / \$55 to \$60				
Expand mobility for the corridor and region's residents, which include transit dependent, low income, and minority populations.								
Low-income/minority opportunities (activity nodes/rental units) ⁽¹⁾	Medium	Medium		Medium				
	23%	22%		23%				
Low-income population ^(1/2)	32% / 32%	32% / 32%		32% / 31%				
Minority population ^(1/2)	34% / 34%	34% / 35%		34% / 34 to 35%				
Youth population ^(1/2)	7% / 10%	7% / 9%		7% / 9 to 10%				
Elderly population ^(1/2)	14% / 11%	14% / 12%		14% / 11 to 12%				
Limited English Proficiency population ^(1/2)	7% / 8%	7% / 8%		7% / 7 to 8%				
Disabled population ^(1/2)	12% / 11%	12% / 11%		12% / 11%				

(1) Within station walksheds; (2) Within 15 minute ride on connecting high frequency transit

Effects on transportation facilities	Lower		Medium			Medium		
Effects on freight movement	Lower		Medium			Medium		
Business and commerce effects	Medium		Medium			Medium		

(1) Within station walksheds and/or defined buffer of alignment; (2) On properties that overlap with the project footprint

Level 3 evaluation – Part 2 of 2

Overview of Key Differentiators

Lower Performing

Medium Performing

Higher Performing

A photograph of a light rail train at a station platform. The train is white and blue, with "CANTON SEATTLE" visible on its front. Several people are waiting on the platform, including a woman in a yellow hijab and white pants in the foreground. The platform has blue railings and a blue circular sign. The background shows trees and a clear sky.

Key considerations

Key considerations

- › West Seattle stations and guideway
- › Duwamish Waterway crossing
- › SODO and Chinatown/Int'l District
- › Downtown tunnel route
- › Smith Cove-Interbay
- › Salmon Bay crossing
- › Ballard terminus station

Key considerations

ST3 Representative Project

- East-west oriented elevated Alaska Junction Station complicates future LRT extension; constrained terminal station on SW Alaska Street
- High guideway on SW Genesee Street
- Park effects may require 4(f) avoidance alternative
- Delridge Station problematic proximity to freeway/Nucor

West Seattle Elevated

- More displacements between Alaska Junction and Avalon stations; similar number of displacements in Delridge
- Greatest disruption to neighborhood around Alaska Junction Station
- High guideway on SW Genesee Street
- Park effects may require 4(f) avoidance alternative

West Seattle Tunnel

- Fewer displacements w/ tunnel Alaska Junction Station; similar number of displacements in Delridge; Lower Delridge Station in neighborhood
- Tunnel facilitates lower guideway on SW Genesee St, but could increase implementation schedule and require 3rd Party funding
- Park effects may require 4(f) avoidance alternative

West Seattle Stations

Key considerations

West Seattle Stations and Guideway

ST3 Representative Project

- Engineering constraints with Pigeon Point steep slopes
- Some effects to Duwamish Greenbelt

West Seattle Elevated

- Engineering constraints with Pigeon Point steep slopes
- Some effects to Duwamish Greenbelt

West Seattle Tunnel

- North bridge crossing avoids Pigeon Point steep slope and effects to Duwamish Greenbelt
- Affects freight, port terminal facilities especially during construction

Key considerations

Duwamish Waterway Crossing

Duwamish Waterway Crossing

ST3 Representative Project

- More complex and costly elevated track
- Does not facilitate track interconnections
- Does not grade separate Lander and Holgate roadway crossings
- Infrastructure conflicts with WSDOT ramps

C-ID 5th Avenue

C-ID 4th Avenue

- At-grade track alignment reduces cost and complexity
- Grade separations of Lander and Holgate improve existing LRT/traffic operations

SODO

Key considerations

SODO and Chinatown/ International District – West Seattle extension

Chinatown/International District

ST3 Representative Project

- Cut-and-cover tunnel and station on 5th Ave S results in construction effects in C-ID
- Affects WSDOT ramps/foundations
- Impacts Ryerson bus base

C-ID 5th Avenue

- Cut-and-cover station on 5th Ave S results in construction effects in C-ID but bored tunnel limits effects
- Mined station has less convenient access, transfers, potential to extend schedule
- Affects future Central base expansion
- Mined station limits train acceleration and track crossovers

C-ID 4th Avenue

- Viaduct rebuild results in more construction complexity, traffic diversions, schedule delays; requires 3rd Party funding
- Mined station option increases traffic effects and has less convenient access, transfers and impacts Ryerson bus base
- Deep mined station does not allow for a pocket track so reduces operability

Key considerations

SODO and Chinatown/ International District – Ballard extension

This map of Seattle, Washington, illustrates the city's urban layout and major transportation routes. The city is divided into several distinct neighborhoods, each highlighted in green: **Westlake**, **South Lake Union**, **Denny**, **Midtown**, and **Seattle Center**. Major roads are clearly marked, including Interstate 5 (I-5) running north-south and Interstate 90 (I-90) running east-west. The map also shows the city's proximity to Elliott Bay, Lake Union, and the surrounding areas. Key landmarks and streets are labeled, providing a comprehensive overview of the city's geography and infrastructure.

- Impacts SR 99 off ramp and requires large sewer relocation
- Constrained right-of-way at Seattle Center Station
- North tunnel portal results in more acquisitions and displacements
- Infrastructure conflicts (sewer under Republican)

- Limited entrance options for Midtown Station
- Wider right-of-way for Seattle Center Station
- North tunnel portal located in poor soil conditions

- Higher ridership potential at South Lake Union Station due to better pedestrian access and bus connections
- Constrained right-of-way at Seattle Center Station
- North tunnel portal impacts SW Queen Anne Greenbelt in landslide hazard area

Downtown Tunnel Route

Smith Cove-Interbay

ST3 Representative Project

- Affects Elliott/15th Ave W
- Engineering constraints with landslide hazard area
- Affects SW Queen Anne Greenbelt

Ballard Elevated

- Avoids Elliott/15th Ave W
- Some potential impacts to existing infrastructure
- Park effects may require 4(f) avoidance alternatives

Ballard Tunnel

- Avoids Elliott/15th Ave W
- Engineering constraints with landslide hazard area
- Most effects to SW Queen Anne Greenbelt
- Park effects may require 4(f) avoidance alternatives

Key considerations

Smith Cove-Interbay

Salmon Bay Crossing

ST3 Representative Project

- Movable bridge has potential service interruptions and most in-water effects
- More effects to Fishermen's Terminal, maritime businesses and vessel navigation

Ballard Elevated

- Fixed bridge reduces in-water effects and avoids Fishermen's Terminal but has other potential maritime business effects
- Fixed bridge crossing would require high-level structure for navigational clearances

Ballard Tunnel

- Tunnel avoids columns in water and maritime/navigational effects
- Tunnel crossings add costs; require 3rd Party funding

Key considerations

Salmon Bay Crossing

Ballard Station

ST3 Representative Project

- Ballard Station on 15th Ave NW closer to Urban Village
- More acquisitions and displacements with elevated guideway, station and tail tracks on 15th Ave NW
- Movable bridge has potential service interruptions

Ballard Elevated

- Wider 14th Ave NW right-of-way better accommodates elevated guideway, station and tail tracks
- Ballard Station on 14th Ave NW farther from center of Urban Village than 15th Ave NW, but would have similar ridership and potentially better bus integration

Ballard Tunnel

- Wider 14th Ave NW right-of-way better accommodates station and tail tracks
- Ballard Station on 14th Ave NW farther from center of Urban Village than 15th Ave NW, but would have similar ridership and potentially better bus integration

Key considerations

Ballard Terminus Station

Evaluation Measures	ST3 Representative	West Seattle Elevated/C-ID 5th Ave/Downtown 6th Ave/Ballard Elevated		West Seattle Tunnel/C-ID 4th Ave/Downtown 5th Ave/Ballard Tunnel				
	Project	5th Ave Cut-and-Cover International District/ Chinatown Station	5th Ave Mined International District/ Chinatown Station	41st Ave Alaska Junction/4th Ave Cut-and-Cover/14th Ave Ballard	42nd Ave Alaska Junction Station	44th Ave Alaska Junction Station	4th Ave Mined International District/ Chinatown Station	15th Ave Ballard Station
Provide high quality rapid, reliable, and efficient peak and off-peak light rail transit service to communities in the project corridors defined in ST3.								
At-grade crossings	3	1		1				
Potential service interruptions/recoverability	Lower	Medium		Medium			Lower	Medium
Improve regional mobility by increasing connectivity and capacity through downtown Seattle to meet projected transit demand.								
Network Integration	Lower	Medium		Higher			Medium	Higher
Connect regional centers as described in adopted regional and local land use, transportation, and economic development plans and Sound Transit’s Regional Transit Long-Range Plan.								
Accommodates future LRT extension	Lower	Medium		Higher		Medium	Higher	
Implement a system that is consistent with the ST3 Plan that established transit mode, corridor, and station locations and that is technically feasible and financially sustainable to build, operate, and maintain.								
Potential ST3 schedule effects	Higher	Higher	Medium	Lower				
Potential ST3 operating plan effects	Lower	Higher		Higher			Medium	Higher
Engineering constraints	Lower	Medium		Lower				
Constructability issues	Lower	Medium		Lower				
Operational constraints	Lower	Medium	Lower	Higher			Lower	Higher
Capital costs (2018\$)	-	+\$400M	+\$500M	+\$1,900M			+\$2,100M	+\$1,900M
Encourage equitable and sustainable urban growth in station areas through support of transit-oriented development, station access, and modal integration in a manner that is consistent with local land use plans and policies.								
Passenger transfers	Higher	Higher	Medium	Higher			Medium	Higher
Equitable development opportunities	Lower	Medium		Higher				
Preserve and promote a healthy environment and economy by minimizing adverse impacts on the natural, built and social environments through sustainable practices.								
Parks/recreational resource effects (acres)	1.4	5.3		5.7				
Water resource effects (acres)	0.8	0.5		<0.1				
Fish and wildlife habitat effects (acres)	15.0	6.0		15.0				
Hazardous materials sites ⁽¹⁾	50	60		40				
Visual effects to sensitive viewers (miles)	2.5	1.7		1.2				
Potentially affected properties	Medium	Lower		Higher				
Residential unit displacements	Medium	Lower		Higher				
Business displacements (square feet)	Higher	Lower		Higher				
Construction impacts	Lower	Lower	Medium	Medium			Lower	Medium
Burden on minority/low-income	Lower	Medium		Lower				
Traffic circulation and access effects	Lower	Medium		Higher				
Effects on transportation facilities	Lower	Medium		Medium				
Effects on freight movement	Lower	Medium		Medium				

(1) On properties that overlap with the project footprint

Lower Performing

Medium Performing

Higher Performing

Summary of differentiators

Key Considerations	Summary of Findings
West Seattle stations and guideway	• ST3 Representative Project's east-west oriented elevated Alaska Junction Station complicates future LRT extension • Tunnel alternatives could delay opening of West Seattle extension; require 3rd Party funding • Park effects in West Seattle may require 4(f) avoidance alternative
Duwamish Waterway crossing	• North bridge crossing avoids Pigeon Point steep slope and effects to Duwamish Greenbelt; affects freight, port terminal facilities especially during construction
SODO and Chinatown/International District	• ST3 Representative Project has more complex/costly elevated track in SODO; does not facilitate track interconnections • Deep mined C-ID station options (on 4th and 5th Aves) result in less convenient passenger access/transfers • 4th Ave S viaduct rebuild creates engineering/constructability issues, potential schedule delay, extensive traffic diversions during construction and requires 3rd Party funding
Downtown tunnel route	• ST3 Representative Project on Republican impacts SR 99 off ramp and requires large sewer relocation • Higher ridership potential at South Lake Union Station on Harrison due to better pedestrian access/bus connections
Smith Cove-Interbay	• ST3 Representative Project affects Elliott/15th Ave W • Alignments on east side of Elliott affect landslide hazard area and SW Queen Anne Greenbelt • Park effects in Interbay may require 4(f) avoidance alternative
Salmon Bay crossing	• Movable bridge has potential service interruptions and more in-water effects • Tunnel crossings add costs; require 3rd Party funding
Ballard terminus station	• Wider 14th Ave NW right-of-way better accommodates guideway, station and tail tracks • Ballard Station on 14th Ave NW farther from center of Urban Village than 15th Ave NW, but would have similar ridership and potentially better bus integration

Summary of key considerations

A photograph of a light rail train at a station platform. The train is white with blue accents and has "CANTON SEATTLE" on its front. People are waiting on the platform, including a woman in a yellow hijab and a child with a backpack. The platform has blue railings and a blue circular sign. The background shows trees and a clear sky.

Potential mix-and-match opportunities

Summary of Level 3 alternatives

➤ **ST3 Representative Project**

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated

- C-ID station options: 5th Ave Cut-and-Cover and 5th Ave Mined

➤ **West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel**

- Junction station options: 41st Ave, 42nd Ave and 44th Ave
- C-ID station options: 4th Ave Cut-and-Cover and 4th Ave Mined
- Ballard station options: 14th Ave and 15th Ave

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated – Potential mix-and-match opportunities

Duwamish Crossing:

Key differentiators

- Engineering constraints
- Fish and wildlife effects
- Property effects
- Freight movement effects
- Business and commerce effects
- Cost

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated **Crossing on north instead of south side**

Duamish Crossing

Key Differentiators	South	North
Engineering constraints	Pigeon Point steep slope	Avoids Pigeon Point steep slope
Fish and wildlife effects	Affects West Duamish Greenbelt	Avoids West Duamish Greenbelt
Property effects	Similar	Similar
Freight movement	Lessens freight, port terminal effects	Affects freight, port terminal especially during construction
Business and commerce effects	Could displace businesses that support trade	Could displace businesses that support trade; May displace some water-dependent business
Cost (2018\$)*	-	+ \$300M

*Compared to ST3 Representative Project

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated Crossing on north instead of south side

Downtown:

Key differentiators

- Midtown Station
- SLU Station
- Seattle Center Station
- North tunnel portal
- Cost

*West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/
Ballard Elevated 5th/Harrison route instead of 6th/Mercer*

Downtown

Key Differentiators	6th/Mercer	5th/Harrison
Midtown Station	Limited station entrance options	More station entrance options
South Lake Union Station	Higher ROW cost for off-street station	Higher ridership potential due to better ped and bus access
Seattle Center Station	Wider right-of-way on Mercer	Constrained ROW on Republican
North tunnel portal	Located in poor soil conditions	Affects SW Queen Anne Greenbelt in landslide area
Cost (2018\$)*	+ \$400M	-

*Compared to ST3 Representative Project

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated 5th/Harrison route instead of 6th/Mercer

Smith Cove:

Key differentiators

- Station location
- Engineering constraints
- Parks, fish and wildlife
- Property effects
- Cost

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated **Station near Prospect instead of Galer**

Smith Cove

Key Differentiators	Station at Galer St	Station at Prospect St
Station Location	West of Elliott Ave Access to Expedia via Galer St overpass	East of Elliott Ave Access to Expedia via Helix pedestrian bridge
Engineering Constraints	Station and guideway in poor soils Affects Interbay Pump Station and portion of existing bridge	Station and guideway in landslide hazard areas
Parks, Fish & Wildlife	Avoids SW Queen Anne Greenbelt	Affects SW Queen Anne Greenbelt
Property Effects	Similar (business displacement outside public right-of-way)	Similar (business displacement outside public right-of-way)
Cost (2018\$)*	+ \$100M	+ \$200M

*Compared to ST3 Representative Project

West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated **Station near Prospect instead of Galer**

Summary of Level 3 alternatives

› **ST3 Representative Project**

› **West Seattle Elevated/ C-ID 5th Ave/ Downtown 6th Ave/ Ballard Elevated**

- C-ID station options: 5th Ave Cut-and-Cover and 5th Ave Mined

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel

- Junction station options: 41st Ave, 42nd Ave and 44th Ave
- C-ID station options: 4th Ave Cut-and-Cover and 4th Ave Mined
- Ballard station options: 14th Ave and 15th Ave

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel – Potential mix-and-match opportunities

Alaska Junction:

Key differentiators

- Station location
- Property effects
- Guideway height in Delridge
- Cost

**West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/
Ballard Tunnel *Elevated instead of tunnel stations***

West Seattle

Key Differentiators	Elevated 41 st South of Alaska	Tunnel 41 st /Alaska	Tunnel 42 nd /Alaska	Tunnel 44 th /Alaska
Station location (Alaska Junction)	Farther away from bus routes on California Ave	Farther away from bus routes on California Ave	Closer to bus routes on California Ave than 41 st	Closer to bus routes on California Ave than 41 st and 42 nd
Property effects* (residential / business displacements)	More / Fewer	Fewer / Fewer	Fewer / Fewer	Fewer / Fewer
Guideway height in Delridge	Higher	Lower	Lower	Lower
Cost (2018\$)*	-	+ \$700M	+ \$700M	+ \$700M

*Compared to ST3 Representative Project

**West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/
Ballard Tunnel *Elevated instead of tunnel stations***

SODO and Chinatown-ID:

Key differentiators

- Ease of station access/passenger transfers
- Construction effects in C-ID
- Property effects
- Construction schedule
- Cost

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel 5th Ave instead of 4th Ave CID station

SODO and Chinatown-ID

Key Differentiators	5th Bored/ Cut-and-Cover	5th Bored/ Mined	4th Cut-and-Cover	4th Bored/ Mined
Ease of station access/transfers	Higher performing	Lower performing	Higher performing	Lower performing
Construction effects in C-ID	More construction effects	Least construction effects	More construction traffic effects	Most construction traffic effects
Property effects	Property effects in SODO at tunnel portal and 5 th Ave in C-ID; affects future Central Base expansion	Property effects in SODO at tunnel portal and 5 th Ave in C-ID; affects future Central Base expansion	Property effects on 4 th Ave; affects Ryerson Base	Property effects on 4 th Ave; displaces Ryerson Base
Construction schedule	Meets ST3 schedule	Higher schedule risk	Potential schedule delay	Potential schedule delay
Cost (2018\$)*	- \$200M	-	+ \$300M	+ \$500M**

*Compared to ST3 Representative Project

**Includes higher Downtown cost of \$100M

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel 5th Ave instead of 4th Ave CID station

Salmon Bay Crossing and Ballard Station:

Key differentiators

- Station location
- Water resources
- Business and commerce
- Property effects
- Cost

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/
Ballard Tunnel *Elevated instead of tunnel Ballard station*

Salmon Bay Crossing and Ballard Station

Key Differentiators	Fixed bridge crossing / Elevated station at 14th	Tunnel crossing / Tunnel station at 14th	Tunnel crossing / Tunnel station at 15th
Station Location	Straddles Market St Similar ridership, potentially better bus integration	Straddles Market St Similar ridership, potentially better bus integration	South of Market St Similar ridership, closer to center of urban village
Water Resources	Potential in-water effects	Avoids in-water effects	Avoids in-water effects
Business and Commerce	Potential maritime, freight business effects	Avoids maritime business effects	Avoids maritime business effects
Property Effects	Greater property effects south of Salmon Bay (elevated guideway outside public right-of-way)	Fewer property effects in Ballard (cut-and-cover station in 14th Ave right-of-way)	Greater property effects in Ballard (cut-and-cover station outside public right-of-way)
Cost (2018\$)	+ \$100M	+ \$350M	+ \$350M

*Compared to ST3 Representative Project

West Seattle Tunnel/ C-ID 4th Ave/ Downtown 5th Ave/ Ballard Tunnel *Elevated instead of tunnel Ballard station*

A photograph of a tram at a station platform. The tram is white with blue and green wavy patterns. Several people are boarding the tram, and others are walking on the platform. The scene is outdoors with buildings and trees in the background. A blue circular sign with a tram icon is visible on the platform.
