

Budget Amendment for the Link Radio System Upgrade

Resolution No. R2020-14

7/2/20

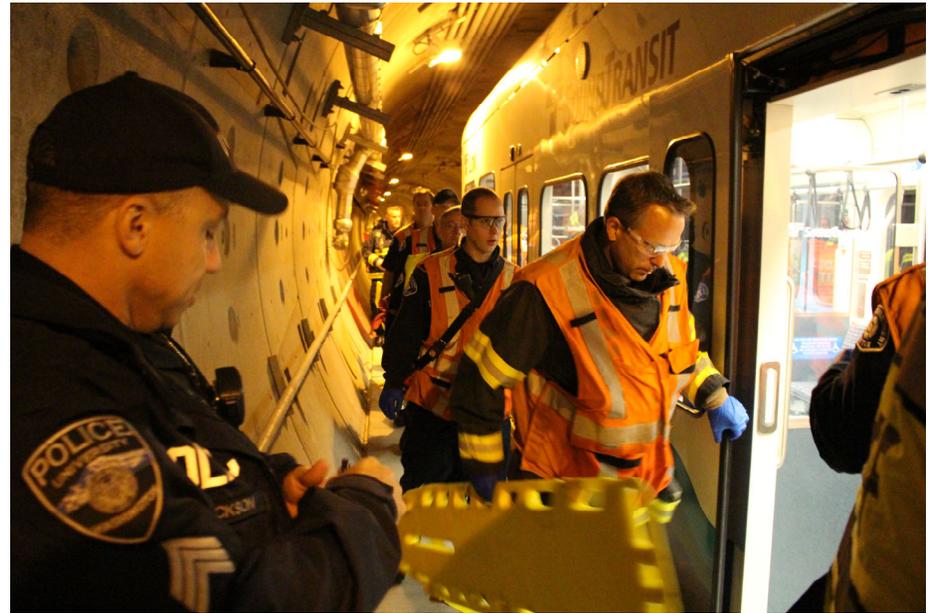

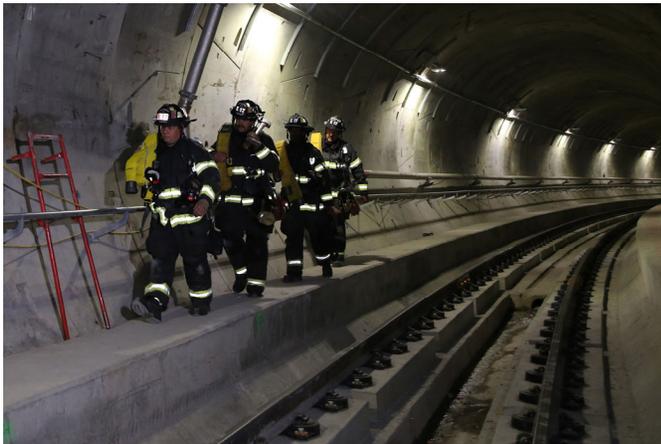

Why we are here

- Seeking Board approval for additional authorized project allocation
- The current Link Light Rail underground radio system is at end-of-life with no existing support options and uplift proposals have exceeded the budget request.
- These funds will be entirely offset and the overall agency budget is not increased.

Why do we need the funds

- Reliable Operations
- Emergency responders
- Radio is a vital safety system

When will the work be delivered

- With Notice to Proceed, anticipate starting construction in September 2020
- Construction will comply with COVID-19 safety protocols
- Project completion anticipated in December 2020

Thank you.
