This committee has not taken its responsibility seriously. An immense amount of time is wasted on issues that are not remotely pressing. Service on Sound Transit has continued to degrade and the conditions of facilities are appalling. I'm shocked that this body has refused to do the work it must to get things back on track. Do your jobs and fix our system or resign.

Absolutely trash (pun intended 😊) policy to not have trash cans in stations. When there is no designated place for trash, the entire station becomes a trash can. You should add trash cans in every single station immediately!
