Hello,

I have frequently noticed individuals (in 1 person cars) without parking permits parking at the Lynnwood Light Rail Station. Today I saw an individual park in spot 2231 at 09:00 am on Wed Sep 30th 2026. I informed him that this was a permit spot, and he casually shrugged and said nobody is enforcing this. The number plate of his car was CSK7019, and he was parked in spot 2231. He was still parked there at 04:00 pm. I am sure your camera can also see this since it's parked right in front of it.

The permit system is a great mechanism, but only if it is enforced. If individuals know that there are no repercussions for violations, then the system will fail. Can we please ensure better enforcement of the permitted parking slots to ensure they are honestly utilized?

Can you please clarify as to what the current mechanism is to prevent non-permitted cars from parking in the HOV permit parking slots? Is the train data reviewed? Are the cars parked before 10 am in the permitted area reviewed for permit compliance?

Thank you.
